# PRESIDENT'S WELCOME

Welcome to DCU's Undergraduate Prospectus and thank you for your interest in our exceptional university.

With a mission to 'transform lives and societies', DCU is ranked amongst the world's best 'Young Universities' (*QS Top 100 Under 50*). We are recognised for our 'transformative student experience', which is driven by the passion and expertise of our teaching staff, our innovative programmes, and our state-of-the-art facilities in a beautiful part of the capital.

As Ireland's 'University of Enterprise', we continue to develop innovative programmes in collaboration with industry, such as the DCU Futures suite of degrees. This approach equips graduates with the skills and knowledge they will need in a rapidly changing economy. DCU was also the first University in Ireland to integrate workplace internships (INTRA) into its undergraduate courses. This real-world experience consistently puts DCU graduates at the top of the class in terms of employability.

DCU also puts personal development at the heart of the student experience and encourages students to get the most out of our vibrant campus community. With more than 140 clubs and societies, excellent sports facilities, numerous volunteering opportunities and a state-of-the-art student centre (*the U*), students have every chance to explore their interests and make lifelong friendships.

As a world leader in online Teaching and Learning, DCU is also Ireland's 'Future-Ready University'. DCU is home to the *National Institute for Digital Learning (NIDL)*, and our long track record of innovation has allowed us to maintain our standards of excellence, despite the challenges of recent times.

Our mission to 'transform lives and societies' is not just embedded in our teaching, it is also reflected in how we engage with the wider world. The Times Higher Education University Impact Rankings 2021, ranked DCU 23rd in the world for its approach to widening participation in higher education and its ongoing commitment to eradicating poverty. The University ranks 38th globally for its work in reducing inequality and 89th for gender equality.

As you can see, Dublin City University is a dynamic, welcoming, community devoted to our students' personal and professional development. This prospectus will provide a taste of that, but I hope that you will visit us on campus, to meet our students and staff in person, and to explore the many possibilities open to you at DCU.

Best Wishes,

Prof Daire Keogh  
President, Dublin City University

# Studying in Dublin

Whoever you are and wherever you are from, the city of Dublin probably doesn't need much introduction.

From its museums and galleries, to its historical landmarks, Dublin is rich with history. From its bars, nightclubs and music venues, to its cutting-edge range of cafes and restaurants, the city is very much part of the 21st century.

The skyline comprises an eclectic mix of Croke Park and Aviva Stadiums, St Patrick's Cathedral, Christ Church Cathedral, The 3 Arena, Ha'penny Bridge, the Spire and so much more.

Dublin provides a great springboard for your success. Proud of its distinctive Irish identity, it's also very much part of Europe. While there are a whole variety of metropolitan experiences, it's also on the threshold of a rural idyll. At DCU, our three very different, but complementary campuses provide solitude from the hustle and bustle of city life. However you engage with the city, the Dublin Bus, DART and LUAS transport systems will get you around quickly, safely and cheaply.

- 1 Botanic Gardens
- 2 The Casino of Marino
- 3 Croke Park
- 4 The Phoenix Park and Dublin Zoo

- 5 The Hugh Lane Gallery
- 6 The Spire, O'Connell Street
- 7 The 3 Arena
- 8 Christ Church Cathedral
- 9 St Patrick's Cathedral

- 10 St Stephen's Green
- 11 National Gallery of Ireland
- 12 National Museum of Ireland
- 13 The Aviva Stadium

# #1 IN IRELAND AND #19 IN THE WORLD FOR GRADUATE EMPLOYMENT RATE\*

\*QS Graduate Employability rankings 2020

At DCU we're committed to developing the whole person and preparing you for a life rich with purpose. After all, your purpose in life is likely to change a number of times over the course of your life. This means not only learning your subject, but learning all the other skills you need for the workplace and life as a whole. We are here to help you build your employment potential.

DCU provides industry-relevant and professionally oriented degree courses to help you find meaningful employment after you complete your degree. Most graduates find it's the skills and competencies, rather than purely discipline-specific knowledge, which differentiates them from other candidates.

At DCU we prioritise the development of your skills and competencies. We offer formal work placements on many of our courses, which allow you to experience the workplace as a fully-fledged part of the team.

Each student has access to a range of workshops, programmes, one-to-one consultations through our student support and development team. You may choose to participate in group workshops or hone your skills as a leader through our Leadership and Engagement Module, progressing to becoming a member of one of the student committees over time.

We also offer informal learning opportunities to develop skills such as adaptability, communication skills and problem-solving skills, which will set you apart in the workplace of tomorrow.

## **INTRA (INtegrated TRaining) Programme**

At DCU, we are committed to providing courses that are relevant as possible to today's industrial and commercial world. We also think it is important that you get to experience this world for yourself in conjunction with your academic training before you leave DCU. Only then can you fully appreciate what to expect when you graduate.

INTRA gives you an opportunity to gain degree-relevant work experience with companies in Ireland and overseas. Over the period of your placement, you will put your academic knowledge to the test in a real working environment that is relevant to your future ambitions.

### **What will you gain from your INTRA experience?**

The key purpose of your placement is for you to apply your knowledge to real-life working situations, so that you gain practical skills. And there are other benefits:

- You will build up your confidence and develop relationship skills
- By applying your knowledge in a working environment, you will be able to make realistic and informed career decisions. You might even find that a specialism you hadn't considered is now your preferred direction
- You will generate some very valuable employment contacts. In fact, many DCU graduates gain employment with their INTRA employer
- As you begin to see the relationship between your job and your course curriculum, your interest in academic work as well as your motivation will invariably increase too
- In the majority of cases, you are paid for the work you do

There is no guarantee that every student will secure an INTRA placement. If a suitable placement cannot be found following an interview, students will be given a course-related project by their academic department. If you have an INTRA placement/project, you will be assessed and awarded either a "pass" or a "fail".

**For more information, please visit [dcu.ie/intra](https://dcu.ie/intra)**

# Careers Service

## Empowering you to Shape your Future

The world of work is changing rapidly, both in existing occupations and in new emerging professions. Hybrid working is emerging as a core business structure, with companies embracing the virtual world. With this dynamic job market in mind, we help our students to develop the career management skills needed to embrace opportunities and successfully navigate the future of work.

We support you in developing your potential and empowering you to be successful in your future career.

Engage with us to:

- Develop your career skills with our digital toolkit - a comprehensive range of online resources from employability tips to international career guides and our career podcasts
- Develop your potential with our careers' skills sessions on topics such as: options with your degree; job search techniques; application process; interview preparation; exploring further study and career resilience
- Attend one-to-one consultations with our expert Careers Consultants
- Connect with employers at careers events, webinars and recruitment fairs
- Find the right job for you on our Careers Platform, MyCareer@dcu.ie. We advertise a wide range of opportunities, from seasonal work and summer internships to graduate-level roles

DCU Careers Service has a strong reputation for connecting students to employers and for supporting students seeking career enrichment. DCU is the number one university in Ireland and 19th in the world for graduate employment rate (QS Graduate Employability Rankings 2020).

### Careers Mentorship Programme

Our award-winning Mentorship Programme provides a fantastic opportunity to be mentored by an industry professional during the your second year of study. Our professionals come from a selected group of employers, including many DCU Alumni, who are uniquely placed to help explore career ideas, develop professional skills and build confidence, while giving valuable insights into the world of work.

### President's Award for Excellence in Teaching and Learning 2019

DCU Careers Service is the Team Winner of the DCU President's Awards for Excellence in Teaching and Learning 2019 for "curriculum delivery, career development initiatives, job applicant support, mentoring and networking, employer engagement and partnership development options which are tailored to the needs of each faculty."

For further information, please visit [dcu.ie/careers](https://dcu.ie/careers)

## The DCU Difference

This is an amazing time to be a student, and here in DCU your learning will be an innovative and inspiring journey that has you at the centre.

Our world is changing, and no one can know the boundaries of knowledge that future graduates will require. But we have created a radically different undergraduate learning experience, where you will develop your discipline knowledge, deepen your unique personal skills and gain extensive hands-on expertise, so that you will flourish in the unscripted world of the 21st century.

The classroom in DCU isn't a place where you sit and listen. We will explore the biggest problems facing the world today, and we want and expect you to think critically, to question how and why these problems exist, to challenge the boundaries and limitations of current understanding. Our teaching is student-centred and designed for active learning, using innovative teaching practices and cutting-edge technologies to enhance your learning. You will be working with classmates to understand and develop potential solutions to relevant real-world challenges. And as a valued member of our learning community, and a partner in every aspect of your learning journey, you will be involved in everything from curriculum design to programme assessment strategies.

Research-informed teaching is at the heart of what we do in DCU, and shapes your learning experience. It means that our teaching methods and assessment strategies are informed by the latest educational research from across the world. It also means that as discoveries are made in our research laboratories, you will learn about them in the classroom, as our internationally renowned researchers also teach in our undergraduate programmes. Finally, and most excitingly, it means that you will have opportunities to carry out research as part of your degree, perhaps designing your own research project or joining an international research team in your final year.

Your learning journey isn't confined to DCU. You will learn not just in our classrooms and our laboratories, but also on site in the environments where you will work after you graduate – on placements with our partner industries, hospitals, schools. We have blurred the boundaries between university and enterprise. When you are in DCU, what you are studying is co-designed with industry, many of your lecturers are based in industry, the challenges you will often be working on will be real problems for industry. When you are on placement in industry, your academic tutors will be helping you to apply and further develop critical skills.

Your future is not yet written, but with a DCU degree, you will have the skills to shape your future, one where you can follow your passion and thrive.

# STUDENT PROFILES

**Chloe**

Bachelor of Early  
Childhood Education

I joined DCU in 2019. Growing up in Ireland, I always noticed that there was a lack of people of colour in leadership positions in every aspect of life in this country and I was determined to do something about it. The whole Black Lives Matter Campaign came about when I was at the end of Year 1 at DCU, and it inspired me to push for change and have the voices of black students and students of colour heard and listened to within our university.

As a founding member of the BSSOC advisory group and a student of the Bachelor of Early Childhood Education, it has been incredible to have the university on board to ensure we have equal opportunities and support if we choose to run for leadership positions, we have our voices heard on different university boards and panels, have the chance to learn and participate in all aspects of student life which is becoming as diverse as ever.

DCU has supported our desire to change, which will always be stronger than our desire to stay the same!

## Nathan

BA in Politics and Law

I'm Nathan and studying BA in Politics and Law having applied with the assistance of the Access Programme.

I chose BA in Law and Media on my CAO application, however within the first week I realised these subjects were not for me so the Access Officer helped me change my subject choices. The Access Programme also offers financial support which is a great help. In the past year virtual learning has been arduous, but I've really enjoyed my time at DCU so far and look forward to life returning to campus.

I'm the Events Officer for the DCU Harry Potter Society and Secretary for the DCU Sinn Fein Society, which are great roles but challenging to adapt to virtual meetings and events – it's all a learning curve at the end of the day!

# STUDENT PROFILES

**Dean**

BSc in Psychology

I'm Dean (he/him), a BSc in Psychology Graduate and this year's VP for Wellbeing on DCU Students' Union.

Coming to DCU, I was a 17-year-old who knew nothing about anything. One thing I'll never forget is going to Clubs & Socs Signups. I wasn't out at the time (to myself or anyone!), but I couldn't help from signing up for DCU LGBTQIA; it was a gravitational pull. Going to my first event and seeing so many lesbian, gay, bisexual, trans, and queer people together changed my life.

I've experienced so many firsts in DCU LGBTQIA. My first trip abroad, first gay club, first job, first boyfriend, first heartbreak; so many firsts.

I never imagined I could do any of those things, or be who I am today. A lot can change in 4 or 5 years, I'm proof of it - my painted nails and Lady Gaga obsession and all.

## Bobbie

BA in Communications

My name is Bobbie Hickey and I am the VP for Diversity and Inclusion in DCU SU this. I have just finished studying the BA in Communications at DCU for the past three years. To get there, I completed a PLC in Journalism and Public Relations, because I didn't achieve high enough points in the leaving cert.

I live in Dublin with my family, I'm 22 and riding horses is my hobby. My life is made up of bus timetables and walking, because I can't drive. I'm legally blind, with 5% sight. My guide dog Josie comes everywhere with me, she's my partner in crime!

I have spent my entire life having people doubt me or saying no off the bat. I have worked and fought to get here and it is only the beginning of my life... I'm not stopping. You shouldn't either.

# DCU ALUMNI

Choosing DCU will mark the beginning of a lifelong relationship with the University. Upon graduating, you become part of our Alumni community, with over 85,000 graduates worldwide.

**Caitriona Perry**  
(BA Journalism and MA International Relations)

Journalist and Presenter at RTÉ

**Amber Barrett**  
(Professional Master of Education)

ReNew You' Education Ambassador

**Shay Walsh**  
(BEng Electronic Engineering)

Managing Director at BT Ireland

**Lorraine Twohill**  
(BA International Marketing and Languages)

Chief Marketing Officer at Google

**Joanna Donnelly**  
(BSc Applied Mathematics)

Meteorologist at Met Éireann

The DCU Alumni Office is committed to building a lifelong, mutually supportive relationship with all our graduates. By playing a key role in your student experience, and maintaining this strong communication with you upon graduating, we ensure that you have an opportunity to stay connected and engaged with DCU, both domestically and internationally from your professional career right through to retirement.

## Award-winning Mentorship Programme

We offer Mentoring opportunities for students to gain valuable advice and guidance from members of our Alumni community. One of these programmes is available to all second year undergraduate students.

The Structured Mentorship Programme won the prestigious IITD National Training Award for Excellence in Coaching and Mentoring for 2018, and has been shortlisted for the award for 2020 and 2021. It is a joint initiative, co-organised by Alumni and the Careers Service. The programme runs for six-months and pairs second-year students with Alumni mentors based on their areas of expertise and interests, for the purposes of career and personal development.

## Global engagement through our International Chapters

With International Chapters established in Abu Dhabi, Berlin, New York, Paris, Saudi Arabia, San Francisco, Singapore and Washington D.C., the DCU connection spreads all over the world, regardless of what stage of your professional life you are at. You will have opportunities to connect and network with fellow graduates of the university through various events and meet-ups throughout the year, as well as exclusive social networking groups.

## Alumni Awards

The DCU Alumni Awards honour alumni who, through their exceptional ability and leadership, have achieved excellence in their chosen fields of endeavour. You can find out more about the annual awards and the recipients at [dcu.ie/alumni/alumni-awards](https://dcu.ie/alumni/alumni-awards)

## Alumni Instagram Takeover

The DCU Alumni Instagram Takeover encourages our graduates to become a resource for you as a prospective DCU student by reflecting on their student experiences, from clubs and societies to course information, and the transition from student to graduate by sharing their career journey to date.

All Takeovers are now available to watch on the highlights section of our Instagram page, @DCUAlumni. For more information about DCU Alumni, please visit [dcu.ie/alumni](https://dcu.ie/alumni)

**Kevin Feely**

## DCU Graduates in profile

“  
Every aspect of our story to date has been influenced by DCU. From entrepreneurship societies events and mentorship from across the university community to finding our first customer and building the team, DCU has shaped our success to date in countless ways and will no doubt shape our future in ways we are yet to see.”

Daniel Kyne (Marketing, Innovation and Technology 2020) and Darragh O Flaherty (Computer Applications 2020) are the co-founders of OpinionX. Founded while they were in their final year of their degrees in late 2019, OpinionX helps product teams at scaling tech companies to identify the most important problems, features and ideas amongst their customers so that they can focus on prioritising the most impactful work possible.

Daniel and Darragh met through Enactus DCU, a social entrepreneurship society, where Daniel was one of the students overseeing the society and Darragh was a software engineer on a social impact project called GiveBack.ie. After securing their first round of funding in mid-2020, the team set out to hire their first employees and looked to the entrepreneurial alumni community in DCU. By late 2020, the team of 2 had doubled, adding Éamon Cullen (Marketing, Innovation and Technology 2020) and Eoin O Reilly (Enterprise Computing 2020). You can find more information about OpinionX at [opinionx.co](http://opinionx.co)

# Widening Participation

Widening Participation (WP) aims to promote inclusion and diversity by encouraging, advising and supporting individuals from under-represented groups who would like to access and complete a course at university. DCU is strategically committed to realising educational opportunity for all and actively engages with education providers to develop enhanced entry routes to DCU programmes. The DCU Access programme was established more than three decades ago and today supports over 1,200 access students. DCU aspires to increase the number of under-represented students in the University to ensure that our student body reflects the diversity of Irish society.

Our under-represented groups are:

- Students progressing to university from lower socio-economic groups
- Mature students
- Students progressing to university from Further Education Centres
- Students with a disability
- Irish Travellers
- Ethnic minorities

If you are the first in your family to go to university or new to living in Ireland, you may be unsure where to start the process.

If you have any questions about becoming a DCU student, be sure to get in touch with us.

For further information, please visit [dcu.ie/widening-participation](https://dcu.ie/widening-participation)

## Uaneen Award

DCU formally recognises and rewards the achievement of holistic education by accrediting a Module in Extra-Curricular Activities – the Uaneen Award. The Uaneen Award is a unique reflective practice module that helps students to identify and recognise transferable skills and learning acquired by students through clubs, societies, community work and extra-curricular activity in general. Depending on your degree programme, the Uaneen Award can be either a contributing 5 credit elective or a non-contributing optional additional 5 credit module.

The Uaneen Award is managed and administered by DCU's Office of Student Life and is endorsed by IBEC. The Uaneen Award is only available to final year students and is a year long programme.

## Interfaith Centre

The Interfaith Centre serves as a non-denominational base for students and staff of every religion. There is Catholic mass held Monday to Friday during the academic year as well as weekly Sunday mass. There are two Muslim prayer rooms for men and women as well as a quiet room available to those of all other faith traditions.

The Interfaith Centre also has two full time Chaplains who are available throughout the day. The chaplains are available to talk to for a lot of reasons, such as talking about personal or academic struggles, family illness or bereavement, or even talking about things such as questioning of faith. The chaplains will offer confidential and non-judgemental listening to your problems and can give great support and advice.

The Interfaith Centre also offers free tea and coffee for people who want to sit in and have a quiet chat.

## Study Abroad

A study abroad experience will allow you to develop a range of key skills, behaviours and attitudes that are much sought after by future employers.

### Within Europe

The Erasmus+ Programme is an EU-funded exchange programme that enables students to study in another country for a year or a semester and gain full academic recognition for their studies. You can even receive Erasmus+ funding for study with partner universities throughout Europe.

### Beyond Europe

DCU offers study abroad opportunities through more than 200 exchange partnerships worldwide. While many partnerships are based in Europe, you can choose exchanges with universities in Australia, Canada, China, Japan, Korea, Mexico and the USA.

For more information, please contact: [exchange@dcu.ie](mailto:exchange@dcu.ie)

# Accommodation

## Where can I stay?

No student wants to live too far away from campus - you might miss out on much of the benefits of university life. With over 1,400 rooms between the Glasnevin (1,100 rooms), St Patrick's (240 rooms) and All Hallows Campuses (100 rooms) for undergraduate students, there's a home to suit any student.

For first-year students who want to live on campus, DCU offers several purpose-built options.

## DCU Glasnevin Campus

Larkfield Apartments consists of two single-study bedrooms with a study desk, bookshelf, noticeboard and wardrobe, with a shared bathroom and kitchenette. Wi-Fi is available in all bedrooms. Wi-Fi and all other utilities are presented as separate charges on your student accommodation portal. Launderette facilities are available 24/7.

Hampstead Apartments contain four single ensuite bedrooms and one double ensuite bedroom, with a shared living/kitchen and dining area. Wi-Fi is available in all bedrooms. Wi-Fi and all other utilities are presented as separate charges on your student accommodation portal. Launderette facilities are available 24/7.

## DCU St Patrick's Campus

St Patrick's rooms provides student housing with single bedrooms, which have a single bed, study desk, bookshelves, noticeboard, wardrobe and wash-basin. Students share bathroom with several students on their floor. Each house has a common room with Wi-Fi, TV and kitchen facility. Wi-Fi and all other utilities are presented as separate charges on your student accommodation portal. Launderette facilities are available 24/7.

## How do CAO applicants apply for accommodation?

All CAO applicants can apply for on-campus accommodation from February 2022. You must have your CAO number to make an application. All applications must be made online on the accommodation website. To enter the lottery, you must set up your online profile and pay a €50 application fee on the student accommodation website. This is available from January 2022.

Information surrounding student accommodation is updated regularly. Please keep updated by visiting our website and social channels. As information changes, it will be updated online.

What if I don't want or can't get on-campus accommodation?

If you are unsuccessful on the first round of the lotteries, a number of further lotteries will be performed as rooms become available. For all off campus options, a list of useful websites with available house, apartments and house-shares is online at [dcusu.ie/accommodation-support](https://dcusu.ie/accommodation-support)

## Accommodation for international students

DCU welcomes international students from around the world. International students can choose a room on either the Glasnevin Campus or All Hallows Campus. We can also accommodate a limited number of students wishing to study at DCU for one semester only.

## How do international students apply for accommodation?

International students who apply through the CAO can apply for on-campus accommodation from February 2022. You must have your CAO number to make an application. Rooms are allocated by random lottery, which takes place in the first week of April. To enter the lottery, you must set up your online profile and pay a €50 application fee on the student accommodation website. This is available from January 2022.

The first round of offers will be made after the lottery in April 2022. Successful applicants will have 48 hours to pay their deposit to secure the room. Unsuccessful applicants can choose to go on a waiting list to be included in future lottery allotments.

Students who apply to the DCU International Office will receive information on how to apply for accommodation with their offer letter from the International Office.

## Costs

Rates for the current academic year 2021/2022 are available to view on the accommodation website

Rates for 2022/2023 will be published online at the end of January 2022 or further information will be provided at that time. Applications open in February 2022.

\*\*Information is all correct as of September 2021\*\*

# Student Services and Supports

We hope you'll remember your time at DCU forever. We think it should be a time of great personal development and fulfilment. That means different things to different students, but whatever it means to you, we'll be there to support you. We have a wide range of flexible services to suit our equally diverse student population.

Student Support staff provide online, group and one-to-one support and guidance on personal, professional and academic matters. Students are kept informed of opportunities to develop their skills while at university and encouraged to avail of the numerous supports which are offered by the following services:

- Access offers academic support to students entering through the HEAR programme
- Careers support students through their career decisions at third level
- Chaplaincy provides spiritual direction and a confidential ear for students
- Counselling and Personal Development provides personal support for students during difficult times
- Disability and Learning Support provides support for students with physical, mental health or learning difficulties
- Financial Assistance Service provides financial support for students during financially challenging times
- Internships and Work Placements are organised by INTRA (INtegrated TRaining), the School Placement Office and Professional Placement Office
- Mature Student Support helps mature students settle quickly into university life and offers study skills support and a mentoring course
- Student Advisers and Life Coaches are available to give advice and guidance for students at every stage of the student journey
- Student Health doctors and nurses promote a proactive approach to healthy living

Student Learning provide academic skills supports to all students throughout their journey

Autism Friendly Coordinator provides support to students alongside the Widening Participation Coordinator and other services.

Further information, please visit [dcu.ie/students](https://dcu.ie/students)

## Computer Services

Information Systems and Services (ISS) provide computing and networking facilities for use by the students and staff of DCU. As a student, you will be provided with:

- Free Wi-Fi for all devices throughout DCU
- Unlimited storage in your DCU apps account (which you keep after graduation)
- Shared access to hundreds of desktop computers
- Facilities to print in, or near to, to all computer laboratories
- Access to course-specific software in our computer laboratories

ISS can help with any questions you have about the use of IT facilities at DCU. They also provide support and advise on the use and configuration of your personal laptop.

For further information, please visit [dcu.ie/iss](https://dcu.ie/iss)

## Library

DCU Library has a presence on all three DCU campuses - O'Reilly library on Glasnevin, Cregan Library on St Patricks' and the brand new Woodlock Hall Library, opening in time for 2021/2022 on the All Hallows Campus. All you need for access to any library is your student card.

- We have dedicated teams of library staff in all sites for friendly expert support
- Huge print collections are available to borrow, covering all DCU subject areas
- Comfortable, modern study facilities with excellent WiFi and IT supports are available in all three libraries
- Our website acts as a portal to a vast collection of electronic resources: e-books, e-journals, databases, thesis and newspapers - available 24/7 with just your student username and password
- We also offer workshops and classes to enhance your research and information skills, as well as online supports such as e-tutorials, guides and instructional videos

Check our website [dcu.ie/library](https://dcu.ie/library) or follow us on Social Media to stay up to date on opening hours and service developments throughout the academic year.

 @DCULIB  
 dcu\_library

# STUDENTS' UNION

The Students' Union (SU) is your representative – it is an organisation run by students, for students, and directed by students. Each year, SU representatives are elected to ensure your voice is heard and your needs are looked after. The SU has 5 full-time roles, 11 part-time officers, and over 400+ class representatives for each course in DCU. Every student is a member of DCU SU and every student, across all three of our campuses, gets to vote for their representatives.

The SU works collaboratively with the University to improve your experience, and runs campaigns and events throughout the year on local and national levels. These can be highlighting student or social issues, or just to have fun! There's something for everyone.

Every officer in DCU SU has been a student in DCU. This year's full-time officers have all finished their degrees and the part-time officers and class reps are current students. Having trouble with something? Feel free to ask them. They've been there before!

Find out more about what each of our officers look after, why you may go to them for support, and how you can influence what the SU does for you at [dcusu.ie](https://dcusu.ie)

The SU offices are located in the U Building on Glasnevin Campus, and in E Block on St Patrick's Campus. Pop by if you have any questions.

## The U Building

The “U Building” is our student centre. It’s located in the centre of the Glasnevin Campus and has great space for socialising and support.

There’s ample seating for chatting to your friends, taking lunch, and even to do some work on assignments. The U also has sensory ‘quiet pods’ for those who may need a break from the hustle and bustle of the University.

Don’t forget, if you’re based on St Patrick’s Campus, you can always visit Java!

## SU Helpdesk

Next to the offices of the SU Officers is the SU Helpdesk. You can pop by here if you need to get your leap card, ask any questions, get directions, pick up merchandise, grab some free period products, and more.

## Clubs and Societies

Alongside the SU’s offices, the U Building is home to DCU Clubs and Societies. Joining a DCU Club or Society is one of the best ways to get involved in student life during your time here. We currently have over 140 Clubs and Societies spread across all campuses and there’s certainly something for everyone. From the Raising and Giving Society, to DCU Drama, to DCU Women’s Rugby Club, to DCU LGBTA Society, and even the Waffles and Pancakes (WAP) Society. If you’ve got an interest, there are other people who have it, too! Clubs and Socs are run by a committee of students who are provided funding to bring you events and activities throughout the year. Find out more on how you can join a club or society at [dcuclubsandsocs.ie](https://dcuclubsandsocs.ie)

## The Venue

The Venue is located on the ground floor of the U, right beside Nubar. Throughout the year, live acts of music, comedy, and large-scale celebrations are hosted here. Fitted with state-of-the-art production equipment, the Venue is utilised by an array of Clubs and Societies to put on productions, plays, and festivities.

## Entrepreneurial Hub, DCUFM, and Inclusivity

On the top floor of the U, you’ll find the Entrepreneurial Hub which provides space for students and societies involved in start-up or entrepreneurial activities to work and collaborate with guidance from DCU Staff. On the first floor of the U, DCUFM, which is DCU’s student run radio station, is operated by the long established Media Production Society (MPS).

Throughout the U, there is an array of LGBTQ+ Pride Flags and flags of all nationalities, too! The top floor of the U is host to gender-neutral bathrooms.

 DCU\_SU  
 DCUStudentsUnion  
 DublinCityUni  
 DCUSU

# CLUBS AND SOCIETIES

## DCU Sports Clubs

There are over 40 sports clubs in DCU that offer social and competitive sporting opportunities for students. From developing existing skills to trying something completely new, joining a DCU club is one of the best decisions you will make in DCU. Involvement in club activity gives you a welcome break from your academic studies, and the skills and competencies gained through club committee work will really enhance your CV and give you that extra edge in your future career. In addition, being involved in DCU clubs will enhance your social life and help you make lifelong friends, as well as creating memories to treasure for life.

## DCU Society Life

Whether you're interested in some amateur dramatics, kicking back and playing some Halo, or even strutting your stuff down a catwalk, DCU's society life covers it all. Drama or Debate; Paintballing or Style; Yoga or Friends; DCU has a society for almost any interest you can imagine. Societies meet at least once a week to hold regular activities. Style Society host their Fashion Show in the Helix with an audience of 1000 people, the Media Production Society run a full time radio station. So whatever your interest, DCU has something to offer outside of the classroom. University life is what you make of it, may yours epic.

# Scholarships

## Academic and Sporting

### Academic Scholarship Programme

Incoming students may be awarded a scholarship based on their performance in the Leaving Certificate or in equivalent exams. There is no application process. Students will automatically receive the scholarship if they: meet the scholarship criteria set by their Faculty, meet their course entry requirements and register in DCU. Students may only receive the scholarship in one academic year.

Students, along with their parents or guardians and former school principals, will be invited to DCU for an awards ceremony. Students will receive their scholarship and their former school principal will receive a plaque for the school to mark this significant achievement.

**Further information on all of DCU's scholarship opportunities can be found at [dcu.ie/prospective/scholarships](https://dcu.ie/prospective/scholarships)**

### Sport Scholarship Programme

DCU supports the holistic development of talented athletes and recognises their increasing need to successfully balance academic and sporting commitments. This is achieved through the Sport Scholarship Programme, which supports athletes who have the talent and dedication to combine an academic course with excellent in sport. It is tailored to the individual needs of each athlete. The benefits of a DCU Sports Scholarship award may include:

- Financial subsidy
- Membership of the DCU Sport Complex
- High Performance Education talks and workshops
- Academic support
- Sports science supports
- Goal setting and performance planning
- Career guidance support
- Access to national and international competitions

Please note that support services are dependent on the grade of scholarship awarded and may be paid in full or subsidised. For a Sport Scholarship application form and further information, please visit [dcu.ie/sportscholarships](https://dcu.ie/sportscholarships)

# Schools Liaison

The student recruitment team is here to let you know about the opportunities available to you at DCU. With so much to choose from, we are here to advise you and help you with those choices.

## School Visits

We are delighted to offer an 'in-person' or 'virtual' school visits programme this year – you decide which option suits you best. Students will gain an introduction to the full range of DCU courses, as well as an insight into student life, different pathways to university and scholarship opportunities. You can use this link to book your school visit:

[dcu.ie/studentrecruitment/School-Visits](https://dcu.ie/studentrecruitment/School-Visits)

## Open Days

DCU host a number of open days each year including:

**November Open Day:** Friday 19 and Saturday 20 November 2021

**CAO Information Session:** Tuesday 18 January 2022

**Spring Open Day:** Saturday 2 April 2022

**Transition Year Open Day:** Thursday 28 April 2022

**June Open Day:** Tuesday 28 June 2022

While we are hopeful that our open days will be 'in-person' events where you can physically visit our campuses, we will be guided by Public Health Guideline recommendations. For further information on all our open days and to register, please visit: [dcu.ie/studentrecruitment/opendays](https://dcu.ie/studentrecruitment/opendays)

## On Demand Recordings

Listen or watch at your leisure to our Student Ambassadors as they talk about why they chose their course, their work placement (INTRA) or study abroad (Erasmus) experiences, involvement in student life (clubs and societies) and many other topics. Our students offer great insight in these sessions and they are all available for you to listen back to on our CAO hub:

[dcu.ie/CAO](https://dcu.ie/CAO)

## Chat to DCU Students

Have you a question about a DCU course or DCU student life - why not start a conversation with one of our student ambassadors or read their blogs to find out more about what life is really like at DCU. Join the conversation here:

[dcu.ie/studentrecruitment/chat-dcustudents](https://dcu.ie/studentrecruitment/chat-dcustudents)

## CAO Hub

This is our central source of information and where you will find up to date information on our open day events. Also located here are on demand course video presentations, podcasts and blogs, as well as information for parents/guardians. Our inspirational lecturers talk about what motivates them to teach. You will find information on access routes to DCU, sport and wellbeing, autism friendly university, scholarships and so much more – all in one location - [dcu.ie/CAO](https://dcu.ie/CAO)

## Campus Tours

Get to know DCU better by taking a virtual tour of our three vibrant campuses. We've also created many shorter videos featuring DCU highlights that you would normally see as part of an in-person campus tour. Check them all out from our CAO Hub – [dcu.ie/CAO](https://dcu.ie/CAO)

You can contact us directly if you wish to visit one of our campuses.

# DCU Sports and Wellbeing

For many students sport, physical activity and wellbeing plays an important part in university life. For some, it's about the challenge of trying something new, making friends with similar interests, socialising, volunteering and developing leadership skills. Other students enjoy representing their university at the highest level and achieving intervarsity success. At DCU we want you to get involved and to develop and succeed at whatever level you choose to participate. Whatever your goal, the opportunities are endless at DCU. DCU Sports and Wellbeing is responsible for the development of student sport and programmes focus on health and wellbeing initiatives, sport at social, recreational and competitive levels, as well as developing student leaders through volunteering. DCU is proud to provide a wide range of sports for students to choose from with over 40 student run sports clubs.

DCU has a very proud tradition of sports participation and representation and have held many third level titles including Archery, Athletics, Basketball, Gaelic Games, Rugby, Soccer, Tennis and much more. A significant number of DCU students have also been selected for Irish squads at European, World University Games and Olympic Games. For further information visit [dcu.ie/sports-wellbeing](https://dcu.ie/sports-wellbeing)

## DCU Performance Sport Programmes

DCU is now one of the leading third level institutions in Ireland for sporting and academic excellence and is committed to enhancing the academic and sporting development of young sports men and women in Ireland, as well as making a positive impact on the future of Irish sport. DCU fulfils this vision through two Performance Sport Programmes:

1. DCU Performance Sport – CAO Points Concession
2. DCU Performance Sport - Sport Scholarships

## CAO Points Concession

DCU has put in place a special academic entry scheme for performance athletes for all its undergraduate degree courses. A number of academic places offering a CAO points concession are reserved for outstanding candidates who have achieved a very high level of sporting performance and who are committed to continuing to develop their sporting and academic careers. Under this scheme, applications are not assessed solely on the basis of academic performance, but sporting achievements are also taken into consideration. For further information visit [dcu.ie/registry/dcu-performance-sport](https://dcu.ie/registry/dcu-performance-sport)

## Sport Scholarships

DCU supports the holistic development of performance athletes and recognises their increasing need to successfully balance academic and sporting commitments. This is achieved through the Sport Scholarship Programme, which supports athletes during their time at DCU who have the talent and dedication to combine an academic course with excellence in sport. It is tailored to the individual needs of each athlete. The benefits of a DCU Sports Scholarship award may include:

- Financial subsidy
- Membership to the DCU Sports Complex
- High Performance Education Talks and Workshops
- Academic support
- Sports Science Supports
- Goal Setting and Performance Planning
- Career Guidance Support
- Access to National and International competitions

## DCU Healthy

DCU Healthy is a university-wide initiative to promote the health and well-being of the DCU campus community.

During your time in DCU, we encourage you to make your health a priority and to continually look for ways to improve your health and wellbeing. As a university we are committed to developing a culture and learning environment that has health and wellbeing at the core. We aim to encourage collaboration, empower individual responsibility, promote healthy lifestyle choices and develop best practice to inspire healthy behaviours.

At DCU, we aspire to create a campus community where the healthy choice is the easy choice, through our DCU Healthy themes:

- Think Healthy (Mental Health and Wellbeing)
- Eat Healthy (Healthy Eating)
- Move Healthy (Physical Activities)
- Live Healthy (Alcohol and other drugs)
- Feel Healthy (Sexual Health and Wellbeing)
- Breathe Healthy (Smoking)

For further information, please visit [dcu.ie/dcuhealthy](https://dcu.ie/dcuhealthy)

## DCU Sports

DCU Sport is responsible for providing a quality experience for student, staff and external stakeholders through the provision of facilities, services and programmes to encourage participation. This encourages recreational, high performance and wellness activity within the one environment. At DCU we believe in a 'sport for all' philosophy. To promote this, DCU Sport has a huge variety of facilities and programmes for you to choose from.

## Sports Facilities on the DCU Glasnevin Campus

The Sports Complex on the Glasnevin campus is a state-of-the-art facility, incorporating health, wellness and sports to meet all your exercise and leisure needs. We offer a number of exciting group fitness classes, such as kettle bells, TRX and spinning. We are home to a pristine 25m swimming pool surrounded by extremely high standard spa facilities such as, as spa pool, sauna, steam room and a tepidarium.

The DCU Sports Arena hosts a number of sports, such a super-league basketball, badminton and volleyball and can facilitate a number of other activities. We also have a climbing wall, one squash court, a racquetball/handball court and several studios for an array of programme activities.

Our Sports Grounds facilities include a 3G all weather GAA pitch, squad high performance centre, athletics 5 lane sprint track, long jump and high jump and throws area. The DCU high performance centre provides a world class training environment in DCU Sport for DCU scholarship athletes and international level athletes in a range of sports from athletics, boxing, rowing, weightlifting, inter-county level GAA players and many more.

Our Soccer Centre has five 5-a-side pitches for recreational games and leagues, and a 7-a-side pitch for squad training. Included in this centre is a covered, four-lane, 75-metre sprint track.

## Sports Facilities on the DCU St Patrick's Campus

St Patrick's Campus has a number of sports facilities. The fitness studio has a free-weights section, cardio section, stretching / recovery section and a number of strength machines. It is our intention to increase an energetic presence and to develop sporting facilities available to students on the St Patrick's Campus. There are two full size sports halls, along with a number of sports equipment stored in each hall. Each hall has separate changing/showering facilities for both male and female students. Outside, there is one full size GAA pitch and one full size soccer pitch. Both of these pitches have two outdoor changing/showering facilities to cater for players and teams.

For more information, please visit [dcu.ie/dcusport](http://dcu.ie/dcusport)

# List of Courses by Subject Area

Our courses are grouped below under five major subject areas. If you know the subject area but not the name of the course you are interested in, then take a look at the listings below.

## Business

Including Marketing, Human Resource Management, Law, Economics, Management and Finance

Digital Business and Innovation (new course)	40
Business Studies	44
Business Studies International	46
Aviation Management / Aviation Management with Pilot Studies / Aviation Management with Air Traffic Controller Studies	48
Global Business [France, Germany, Spain, USA, Canada]	50
Accounting and Finance	52
Marketing, Innovation and Technology	54
Gnó agus Gaeilge [Business and Irish, Irish-medium]	142
Economics, Politics and Law	148
Computing for Business	182

## Science and Health

### Chemical Sciences

Analytical Science	82
Chemical and Pharmaceutical Sciences	84
Chemical Sciences General Entry	78
Environmental Science and Technology	86
Science Education	100

### Physical Sciences

Physics General Entry	88
Environmental Science and Technology	86
Science Education	100

### Biotechnology

Biotechnology	74

Follow us

@businessDCU

Join the dynamic environment of our globally ranked Business School, where ambitious students, bright ideas and inquiring minds find their place and have their opportunity to shape the future of business.

At DCU Business School we place innovation at the heart of everything we do. We respond to the needs of people, organisations and societies with agility and dynamism. We do this to ensure our graduates enter the world of work equipped with the latest and most relevant knowledge and skills, informed by the needs of industry. Our longstanding connection to industry has been the hallmark of our approach to education since our foundation in 1980.

With eleven undergraduate business degrees on offer, you can choose between broad or specialised business degrees and amongst courses integrating languages and study abroad, INTRA and more. Our graduates work in large global companies, SMEs and even launch their own companies, across a variety of industries and throughout the world.

As a first year student at DCU Business School you'll participate in our new module, Learning Innovation for Enterprise (LIFE), winner of two global awards for its innovative approach to teaching. Our unique first year introductory programme forms an excellent foundation to your study of business, no matter which aspect of business you choose to focus on or pursue a career in.

A warm and welcoming learning environment, with innovation at its core, awaits you at DCU Business School.

# BSc in Digital Business and Innovation

## Learn how companies leverage digital technologies to innovate, transform and succeed

### Why DCU?

- Benefit from a deep understanding of how key enabling technologies work, as well as their business, economic, and social impacts
- Combine practical knowledge and experience in applying digital technologies in a range of contexts to achieve business objectives
- Develop an innovation mindset and insights into how to ideate and create new products, services, and markets that leverage digital technologies
- Gain the ability to acquire the knowledge and skills needed to support digitalisation and digital transformation initiatives
- 12-month paid work placement (INTRA) in Year 3

### About You

Do you want to be prepared for an exciting and rewarding career in a dynamic and growing field developing smart, connected products, experiences and services? Do you see yourself applying digital knowledge and skills in projects with real world clients whilst learning about and through technology? Then this new and exciting course is for you.

### Additional Requirements

In addition to the general entry requirements for admission to the University (see pages 232), the following entry requirements apply: O4 or H6 in Mathematics.

### Understanding: Digital Business and Innovation

This new four-year course is designed to prepare graduates with the competencies and skills to leverage digitalisation to innovate and transform businesses and succeed in a future world of work permeated by digital technologies. This course, designed in conjunction with industry, will help future proof you with an innovation mindset and industry-relevant knowledge and skills in emerging technologies including: Cloud Computing; Social Media; Big Data Analytics; Mobile Technologies; The Internet of Things; Smart Contracts and Blockchain; and Augmented and Virtual Reality.

### Course Structure

Unlike more conventional undergraduate courses, the BSc in Digital Business and Innovation will give you practical learning opportunities through the use of technology. It will provide you with regular opportunities to gain experience applying your digital knowledge and skills on projects with real world clients including a 12-month immersion experience through paid work placement (INTRA) in Year 3. The course will equip graduates with two highly in-demand skills of innovation and digital agility to exploit the ever-increasing opportunities in digital business. The course will prepare you for an exciting and rewarding career in a dynamic and growing field developing smart, connected products, experiences and services.

### General Information

The data-driven economy requires new types of evidence-based managers and analysts equipped with the latest techniques to capture, analyse and make strategic and real-time decisions. To this end, the new data analytics pathway on our Business Studies degree (DC111) provides students with business analytics capabilities that are in high demand in every sector.

### Why Is It Exciting?

Business Analytics provides enriched understanding about the nature of a business and key business decisions. Understanding analytics and asking the right questions of data is a critical foundation for success in this data-driven era.

### What Will I Study?

Students on our business analytics pathway will learn about converting business data into valuable information through the use of statistical techniques and advanced software. The pathway will commence with a solid foundation in statistics in Year 1. The analytics modules will teach you how to deal with large quantities of data, through combined tools of statistical analysis and software, to solve problems and make sound business and management decisions. Through the specialist modules in final year, you will be equipped with the tools of the trade, learning about, through and with a wide range of software technologies and dashboards, including R, Tableau, SPSS and programming languages like Python. You will also gain experience in evidence based logic and data visualisation.

### How To Apply

Applicants to this option must apply via DC111 Business Studies.

### Student Outcomes

On completion of this specialism you will have obtained:

- A solid grounding in the statistical and technical methods of data analysis
- Practical skills and experience in using business analytics to support a range of business processes, problems and contexts
- The ability to articulate how Big Data and advances in analytical intelligence can generate and capture business value and support effective business strategies

Graduates will benefit from enhanced employability in the management consulting sector in Ireland or in roles as business analysts in a wide range of industries driven by digital transformation, all of which are major sources of employment. Future roles include those of Business Analyst, Business Intelligence Analyst, Management Consultant and Business/Data Analytics Project Manager. These industries require workers with diverse analytical, technical, social and strategic mind-sets and skills, as well as hands-on experience.

### Additional Information

To study Business Analytics, you must join our Bachelor of Business Studies DC111 and choose this option at the end of Year 3.

# Bachelor of Business Studies

## Providing you with the essential toolkit for a career in the world of business

### Why DCU?

---

- General business degree offering you a wide choice of specialisms in your final year
- Gain valuable experience and a competitive edge with an optional 12-month paid work placement (INTRA)
- Specialise in a key business area (management, marketing, human resource (HR) management, business economics, business analytics or finance) in final year
- Develop skills in communications, IT, teamwork and problem solving
- Strong entrepreneurial focus to encourage innovation and creativity

### About You

---

Do you find the world of business an interesting place? Do you see yourself enjoying a career in one of the many areas of business that could take you from management and finance to marketing and HR? Then this exciting course is for you.

### Additional Requirements

---

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: O4 or H6 in Mathematics.

### Understanding: Business Studies

---

Today's business world is rapidly evolving, and the key to success in this world is creativity and innovation. These values are at the core of our Business Studies degree – a course that is constantly innovating to reflect best practice in business education and relevance to management and business practice in the real world. Since the early 1980s, the Bachelor of Business Studies course has introduced many new ideas to undergraduate education. Through elements like business simulations and new enterprise development projects, we set out to stimulate and foster imaginative thinking among our students, giving you the skills to arrive at solutions to real business problems.

### Course Structure

---

The Business Studies degree course is designed to introduce you to all aspects of business. Once you have the foundations, you can choose the particular area of business that you want to specialise in. In this way, the course caters both for those who already have a clear idea about what they want to do and for those who need to find out more before making a final decision.

You can opt for either a three or four-year course of study. The four-year course includes an 11-month paid work placement (INTRA) at the end of Year 2, which gives you the opportunity to experience working in a real business environment. Alternatively, you can opt to spend a year at one of DCU Business School's top partner universities in Europe.

The degree is structured around three elements: core subjects, skills and specialisms.

The core modules in Years 1 and 2 provide a solid business foundation. In your final year, you will be able to specialise in one of six areas of business.

Throughout this course, you will develop skills in areas such as communications, IT, teamwork, project management and problem solving.

### Additional Information

This course is recognised by the Teaching Council for teaching Business Studies (see page 258 for further details).

## What Our Current Students Say

The Bachelor of Business Studies has given me a great overview of business and its different areas. I have gained skills in communications, problems-solving, critical thinking, entrepreneurial skills and team work.

It has enabled me to work for an international investment bank during my INTRA placement and will allow me specialise in final year, leaving me highly employable in my chosen field with real industry experience and has also given me great direction in where I would like to take my career. It's a course that you get back what you put in to it!

*Seán Coffey, Bachelor of Business Studies*

# Bachelor of Business Studies International

## Develop specialised business, language and cultural knowledge for today's international business environment

### Why DCU?

---

- This degree combines the skills and knowledge needed for a career in business with language competence
- Be one of only 3% of Irish third-level students to study language at third-level
- Experience another culture at first hand while you study at one of our partner institutions in Austria, Belgium, China, France, Germany, Japan, Mexico and Spain
- Develop important new perspectives on the international business world
- Cultivate a global network of contacts, connections and job prospects

### About You

---

Do you like travelling and experiencing diverse cultures? Are you interested in learning about business in different markets and countries while honing your language skills? Are you excited by the prospect of studying abroad? This degree offers you all of these benefits and more.

### Additional Requirements

---

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: O4 or H6 in Mathematics plus H4 in a language other than English or Irish.

### Understanding: Business Studies International

---

DCU's Business Studies International degree offers a truly international option to ambitious students who wish to complement their business studies with the study of a foreign language. Business is international and this degree can take your career global. You'll advance your language skills, opening up new possibilities and opportunities to work overseas. You will spend a year at one of DCU Business School's top partner universities in Europe, Japan or China, to prepare you for a career in Ireland or abroad.

### How do I choose my language?

---

Students must choose a language option upon entry into the course;

French or German or Spanish (intermediate level only)  
or  
Chinese or Japanese (beginners level)

Students who choose French or German or Spanish must have a minimum of H4 in the language they wish to study.

Students who choose Chinese and Japanese - no language requirement.

### Course Structure

---

The Business Studies International degree is designed to create a group of graduates with a high level of language competency, in addition to their degree in Business.

The course will introduce you to the key disciplines of business with specialist focus on the international business environment. You will also acquire proficiency in the foreign language of your choice (French, German, Spanish, Chinese or Japanese). Throughout the course, you will develop vital business skills in areas such as communication, information technology, teamwork and problem solving. The combination of your business knowledge, language proficiency and cultural competence will make you stand out in the global workforce of today. You will specialise in a particular business discipline in the final year of the degree.

You will spend a year studying in a country where your chosen language is spoken. We are particularly proud of the calibre of our international exchange partners, who rank among the top academic institutions in their respective countries. Year-abroad destinations include Austria, Belgium, China, France, Germany, Japan, Mexico and Spain.

Studying abroad is an exciting and challenging experience. In addition to the opportunity to travel, you will experience a foreign culture and open yourself up to a global network of friends, colleagues, contacts and opportunities. By learning about business in a different country, you will gain valuable new perspectives on the world of business.

When you return to us in Year 4, you will build on your specialist knowledge with a suite of subjects designed to make you truly work-ready for an international environment.

## What Our Graduates Say

A degree in Business Studies International with a language offers a wide variety of career opportunities, alongside a wealth of cultural experience. I decided to study this course as the attributes associated with a student who has an in-depth knowledge of business, proficiency in a foreign language, and cultural experience will make me stand out from the crowd in a global workforce. With one-third of studies focused on improving my language skills and two-thirds directed at the business side of things, I really enjoy the diversity of the course. The contact hours allow me time to experience student life in DCU, alongside my studies, by getting involved with clubs and societies. There are many opportunities and events that will allow you to gain a greater knowledge of business and your chosen language, outside of the lecture theatres.

I look forward to graduating with a degree in Bachelor of Business Studies International and Spanish. The opportunities are endless with this degree, and the world really does become your oyster.

*Laura Foody, Business Studies International*

# BSc in Aviation Management/BSc in Aviation Management with Pilot Studies/BSc in Aviation Management with Air Traffic Controller Studies

## Take your knowledge to new heights and gain the skills for a successful career in aviation

### Why DCU?

- First university degree in Ireland to combine aviation and management studies with the option to train in your last year either as a commercial pilot or as an air traffic controller or in aviation management
- Private, public and the third-level sector are all looking for people who are creative, who are trained in the methods and processes of innovation and who can see beyond the obvious opportunities and make exciting things happen
- Gives a broad insight into all aspects of the structures, operations and management of the aviation industry
- Substantial industry placement in Year 3 allows you to gain valuable work experience in the industry (INTRA)
- Choice of final-year specialisms (Pilot Studies, Air Traffic Controller Studies or Aviation Management) offers you considerable flexibility

### About You

Do you find the world of aviation an exciting place? Do you see yourself playing a key role in the management and development of the aviation sector? Or do you see yourself enjoying a career as a commercial pilot or air traffic controller? This course can take you there.

### Additional Requirements

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: O4 or H6 in Mathematics.

### Understanding: Aviation Management

Aviation is a high-tech, dynamic and competitive industry operating in a global arena. For those who plan to enter the world of aviation – whether as a commercial pilot, air traffic controller (ATCO) or manager – a sound foundation in the business management principles of the aviation industry is key to success.

The aviation industry spans the airlines, airports and air traffic control as well as ancillary activities directly connecting the airline business with other sectors, such as tourism or logistics, that are dependent on international trade.

It is well recognised that within the aviation industry there will be a significant shortage of skilled aviation professionals in the near future. In the next 20 years, airlines expect to add 25,000 new aircraft to the current 17,000 strong commercial fleet. These aircraft will require pilots and other trained support staff to operate them. Increasing the fleet will also involve the expansion of services provided by staff at airports.

### Course Structure

This exciting course develops capability in the aviation sector by educating a new generation of managers specialised in aviation management. In addition to a general management education, this course provides you with specialist knowledge in all areas of aviation and qualifies you for careers in demanding positions in this growing industry sector.

It offers a route to a professional qualification as a commercial pilot or air traffic controller, combined with a strong background in business education.

Years 1 and 2 of the course provide a general introduction to business analysis, the aviation sector and technical aspects of piloting. DCU is a Registered Training Facility (RTF) recognised by the Irish Aviation Authority (IAA) to supply some of the theoretical knowledge needed to acquire a Private Pilot's Licence (PPL). However, DCU does not itself train you as a pilot (whether private or commercial). To become a pilot you will need to attend a pilot school outside the University.

Year 3 of the course begins with a four to 6-month paid work placement (INTRA) in an aviation setting. The second half of Year 3 comprises of both specialist business and aviation modules.

In Year 4, the course divides into three streams. Some students will opt to pursue integrated flight training at an approved Flight Training Organisation with a view to qualifying as a commercial pilot (Airline Transport Pilot Licence (ATPL))\*.

A second stream will pursue training as air traffic controllers (for instance at the Irish Aviation Authority). The final stream will follow more specialist studies in aviation management here in DCU. Note that while all students who pass their DCU Year 3 exams will qualify to proceed to their final year of study, if you seek a piloting or ATCO career you will also need to pass a selection process to be admitted to a pilot training college or ATCO training.

A number of our students have been successful applicants for the Aer Lingus and Air Corps Cadet programmes.

**If you wish to qualify, as a commercial pilot, you should be aware that this option involves considerable costs. Pilot training is estimated to cost around €100,000.**

Flight Training Organisations currently approved by DCU include:

- Atlantic Flight Training Academy (Cork) [www.atfa.ie](http://www.atfa.ie)
- National Flight Centre (Leixlip) [www.nfc.ie](http://www.nfc.ie)
- National Flight Training Europe (Jerez, Spain) – [www.ftejerez.com](http://www.ftejerez.com)
- Oxford Aviation Academy (Oxford, UK) [www.oaa.com](http://www.oaa.com)

DCU is also open to approving other flight training schools that hold accreditation from the European Aviation Safety Agency (EASA).

### What Will I Study?

#### Year 1

Critical Thinking | Learning Innovation for Enterprise | Accounting | Aviation Sector and Flying Theory 1 | Aviation Policy | Economics | Foundations for Aviation Studies | Airport Operations | Business Analytics | Mathematics

#### Year 2

Operations Management | Airline Structures and Standards | Airline Economics and Finance | Aviation Sector and Flying Theory 2 | Sustainable Aviation | Financial Management | HR Management | Applied Business Analytics | The Innovators Toolkit | Critical Thinking for Business

### What Our Graduates Say

The aviation management course in DCU provides the perfect mix of specialised aviation knowledge combined with commercial understanding. In Years 1 and 2 modules are split 60/40 between aviation and business lectures. This helped me to understand the ins and outs of the industry as a whole. In semester one of Year 3 I completed my INTRA work placement at Ryanair in their Flight Operations and Safety and Compliance departments. Coming back to DCU I found that my lectures made a lot more sense having completed my placement. I am now even more confident that I made the right decision in choosing the aviation industry for my career and DCU's Aviation Management for my degree. I cannot wait to be back on campus and to see what final year holds.

*Kate Goodman, BSc in Aviation Management*

#### Year 3

# BA in Global Business

## Gain two business degrees, experience two countries and complete two work placements

### Why DCU?

- A course that is truly unique in Ireland, allowing you to gain two qualifications, awarded by DCU and another top international business school
- Benefit from two work placements - one in Ireland and one abroad
- Learn about business while immersing yourself in two different social, cultural and political environments
- Have the option of specialising in a specific area of business in your final year

### About You

Are you interested in pursuing a career in business with an international dimension? Are you excited by the prospect of spending two years in a leading university abroad? Would you like the opportunity to study with a diverse group of students from all over the world and really immerse yourself in that culture? If so, this course is for you.

### Additional Requirements

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: O4 or H6 in Mathematics plus H4 in French (DC112), German (DC113) or Spanish (DC114).

### Understanding: Global Business

The BA in Global Business is a unique course, combining a broad understanding of international business with intercultural experience and work placements. As such, you will gain the necessary knowledge and skills to work in the challenging and diverse world of international business.

### Course Structure

This degree is the only one of its type in Ireland, is a unique and exciting way to learn business. You will spend Years 1 and 2 in DCU (including a work placement in Ireland) and Years 3 and 4 in the relevant partner institution abroad, where you study through that country's language and university system. You will also go on a second work placement while abroad.

At the end of your four years of study, you will graduate with two degrees, one from DCU and one from the partner institution.

**Business:** The main emphasis is on business subjects. Over the four years, you will gain an understanding of the principles of business, especially international business. In Years 1 and 2, you will study subjects such as accounting, finance, economics and marketing. On transferring to the partner institution in Year 3, the focus on international business continues, and in Year 4, you have the opportunity to specialise in a variety of business areas.

**Language and Culture:** For students on DC112, DC113 and DC114, the course includes the study of European political, cultural and social developments. These are combined with the study of French, German or Spanish, which will be your working language of Years 3 and 4 of the course. Overseas students have the opportunity to learn another language in Years 1 and 2.

Students on the USA and Canada courses, study North American history, politics and business practice, and also have the option to study a second language.

We offer the course in cooperation with our partners from the International Partnership of Business Schools.

**France:** Neoma Business School was formed in 2013 through a merger of Rouen Business School and Reims Management School. It is one of France's largest and best-known business schools, with 8,000 students across three campuses ([www.neoma-bs.com](http://www.neoma-bs.com)).

**Germany:** European School of Business, Reutlingen, Germany is over 100 years old, has more than 3,000 students in 11 faculties and maintains relationships with numerous institutions in other countries. It has an excellent reputation for delivering rigorous programmes of education and for producing highly successful graduates ([www.esb-reutlingen.de](http://www.esb-reutlingen.de)).

**Spain:** ICADE in Madrid is part of the faculty of business and enterprise at the Universidad Pontificia Comillas. It is one of Spain's oldest and most highly regarded business schools ([www.icade.es](http://www.icade.es)).

**USA:** Northeastern University, Boston, is one of the leading universities in the United States. It has been ranked number one among those US universities which offer work placements as part of their programme ([www.neu.edu](http://www.neu.edu)).

The University of San Diego is located approximately two miles north of downtown San Diego on the west coast of the United States. It is ranked the 53rd Best Undergraduate Business School in the United States by Bloomberg Businessweek ([www.sandiego.edu](http://www.sandiego.edu)).

**Canada:** Brock University, founded in 1964, is located in Ontario, Canada. Situated at the centre of the Niagara Peninsula, it is the only university in Canada in a UNESCO Biosphere Reserve, ([www.brocku.ca](http://www.brocku.ca)).

**Contact Details**  
E [studenthelp@dcu.ie](mailto:studenthelp@dcu.ie)

**Visit Us Online**  
[dcu.ie/DC112](http://dcu.ie/DC112)  
[dcu.ie/DC113](http://dcu.ie/DC113)  
[dcu.ie/DC114](http://dcu.ie/DC114)  
[dcu.ie/DC116](http://dcu.ie/DC116)  
[dcu.ie/DC119](http://dcu.ie/DC119)

You will graduate with two qualifications - the BA in Global Business from DCU and one of the following:

- The DESEM (Diplome d'Études Supérieures Européennes de Management) from Neoma Business School (France)
- The BSc in International Management from the European School of Business, Reutlingen (Germany)
- The Graduado Superior en Ciencias Empresariales Internacionales from the Universidad Pontificia Comillas (Spain)
- The BSc in International Business from Northeastern University (USA)
- Bachelor of Business Administration from University of San Diego (USA)
- The Bachelor of Business Administration (BBA) from Brock University (Canada)

You do not pay additional tuition fees at the partner university; you continue to pay DCU tuition fees while studying at the partner university. You should however budget for living costs which vary depending on the location.

### What Our Current Students Say

The Global Business (France) dual degree has provided me with an international business mind-set which has been cultivated through a combination of work placements in multinational companies and studying in NEOMA BS, Reims, France. This experience has allowed me to develop, not only academically, but also in terms of broadening my appreciation for multicultural collaboration.

*Orla McMahon, BA in Global Business (France)*

### What Will I Study?

#### Year 1

Economics | Accounting | Business Mathematics | Finance | Psychology in Organisations | Global Business Environment's | Business Analytics | Critical Thinking | Learning Innovation for Enterprise | Marketing | Language and Culture of Chosen Country (France/Germany/Spain/USA/Canada)

#### Year 2

Economic Policy | Finance | Management | Accounting | Business Information Systems | Business Analytics | INTRA | Language and Culture of Chosen Country (France/Germany/Spain/USA/Canada)

#### Year 3 and Year 4

You will spend Years 3 and 4 in France, Germany, Spain, USA or Canada. While there, you will have the opportunity to specialise in a variety of business areas and undertake a second work placement. You will have the option to return to DCU for Year 4. If you choose this option, only one qualification – the DCU degree – will be awarded.

# BA in Accounting and Finance

## Become a leading professional in the Accounting and go anywhere with your business career

### Why DCU?

- Generous exemptions from examinations of professional accounting bodies
- Continued high level of recruitment by all the leading accounting firms
- Options to specialise in a range of areas, including accounting, finance and management, or go on to a one-year Masters upon completion of Year 3
- Student-friendly, congenial environment with excellent, supportive and friendly lecturers
- Sponsored prizes from KPMG, PricewaterhouseCoopers, Grant Thornton, Mazars, Kavanaghfennel and CIMA - awarded to top students (see [dcu.ie/DC115](http://dcu.ie/DC115) for more details)

### About You

Accounting is for logical thinkers. If you like problem solving and are interested in how businesses and organisations operate in adding value to their activities, then this is the course for you. If you have not studied accounting previously, don't worry. Prior knowledge of accounting is not a specific course entry requirement and introductory classes will be provided to give you the basics you will need.

If you are looking for an exciting and dynamic career where you can work in any business sector anywhere in the world, the BA in Accounting and Finance is for you.

### Additional Requirements

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of O4 or H6 in Mathematics.

### Understanding: Accounting and Finance

The BA in Accounting and Finance at DCU is Ireland's premier degree for those wishing to pursue careers as accountants and financial services professionals. This is an extremely popular course, which was the first of its kind in Ireland and continues to be highly regarded by the accounting and financial services professions.

### Course Structure

The course develops top-quality graduates who can think critically and creatively, and who have technical expertise and well-developed decision-making and problem-solving skills. The goal of the course is to give you in-depth knowledge of the theoretical and practical aspects of accounting and finance, as well as an understanding of the business, legal, taxation and IT context of this work. These skills will help you to succeed in accounting, finance, taxation or related careers.

The degree is structured around three main areas:

- **Accounting:** financial and management accounting are studied from Irish and international perspectives. Taxation, auditing and professional ethics modules are also offered
- **Finance:** a thorough foundation in the principles of economics, corporate finance and topics such as investments is provided
- **Business:** a rounded understanding of the principles of business is developed through the study of subjects such as commercial and company law, psychology, marketing, HR, management, communications, business analytics, business strategy and new enterprise development

If you wish, you may choose to study one of three European languages (French or German or Spanish) as part of the course. You can study a language throughout your degree or in Year 1 only, depending on your preference.

### Exemptions

Graduates are granted generous exemptions from the examinations of professional accountancy bodies. Current exemptions include:

- 1 Chartered Accountants Ireland (CAI): 2.2 Honours graduates – gain full exemption from the CAP1
- 2 Association of Chartered Certified Accountants (ACCA): Exemption from F1, F2, F3, F4, F5, F7, F8, F9 at fundamental level
- 3 Chartered Institute of Management Accountants (CIMA): Exemption from BA1, BA2, BA3, BA4, P1, P2, F1
- 4 Institute of Certified Public Accountants in Ireland (ICPAI): Formation Levels - full exemption; Professional Level 1 - exemption from Auditing and Corporate Reporting
- 5 Irish Taxation Institute (ITI): Exemption from three out of four papers of Part 1

Note: All exemptions awarded are subject to annual review and revision by the various professional bodies, and depend on your achieving clear passes on completion of specific modules.

**Additional Information**

This course is recognised by the Teaching Council for teaching Accounting and Business Studies (see page 258 for further details).

**What Our Graduates Say**

I chose Accounting and Finance at DCU because I wanted to go into the world of business and knew the importance of accounting in everyday business, regardless of where you work.

Lecturers teach for all levels, so having accountancy from your leaving cert or previous study is not a requirement. The course teaches you everything you need to know about the accounting standards, lays a strong foundation to build your knowledge in the world of finance.

Whilst at DCU I was chair of the DCU Soccer Soc and ran my own society called the Student Business Consultants (SBC). I've met so many amazing people and have become very close friends with lots from my course. Finding the balance between my academics, extra-circular, and social life was tough at first, but managing my time is a new skill I'm very glad to have and it has made me appreciate every aspect of DCU life. DCU is so much more than just your college.

*Rory Keenan, BA in Accounting and Finance*

# BSc in Marketing, Innovation and Technology

## Develop an entrepreneurial outlook and excel in an innovative marketing world led by technology

### Why DCU?

- Unique degree in Ireland that is aligned with organisational demands for creative, innovative people who will lead the digital transformation of their organisations
- Private, public and the third-level sector are all looking for graduates who are creative, who are trained in the methods, processes of innovation and who can see beyond the obvious opportunities and make exciting things happen
- 12-month paid work placement (INTRA)
- Strong focus on creativity, innovation and high-tech entrepreneurship across multiple disciplines
- International summer school opportunity
- CEO-led seminars enable you to learn from senior industry professionals

### About You

This course will suit you if you have an interest in marketing and how innovation adds value to the evolving world of business. You are a creative thinker and have a genuine curiosity about the technologies that are changing our world. You'll apply your marketing skills, knowledge of the innovation process and good understanding of technologies to your future career.

### Additional Requirements

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of O4 or H6 in Mathematics.

### Understanding: Marketing, Innovation and Technology (MINT)

This is a really exciting time to be in business especially if you have the skills we focus on in MINT. It is a time when originality, agility, creativity are all in high demand and well rewarded. Covid-19 has accelerated what is being called the Great Reset in Business. It has intensified pressure on organisations to transition to a digital-first business model. Graduates who are experts in the latest technology, its applications and the opportunities it presents, the ways in which it can be marketed, will have an opportunity to make a big and positive impact in the organisations that they choose to join. Our course really emphasises innovation, technology and marketing. These are the dominant themes in business today. We work with leading practitioners to bring the voice of business into the lecture hall. This degree prepares you to earn a reputation for being able to hit the ground running in any organisation that is committed to growing their business through technology, marketing and innovation. As Peter Drucker said - 'Marketing and innovation produce results; all the rest are costs.'

You will explore the new technological challenges that organisations face, such as:

- Information and communications technologies (mobile devices, big data, social media marketing, marketing automation)
- Biotechnologies (advances in pharmaceuticals, biofuels and fine chemicals)
- Physical sciences (laser, x-rays, nanotechnology)

In the new business environment, marketing needs to be integrated within all functions of the organisation. By developing an entrepreneurial outlook (a hallmark of this degree), you will learn to anticipate and respond to consumer needs, and to develop and market these technologies in a way that makes sense in today's marketplace.

### Course Structure

The course is the only one of its kind in Ireland, offering a solid foundation in marketing while incorporating cutting-edge technology and design to meet the growing demand for expertise in all these areas.

You will be introduced to a range of technologies, from information and communication technology to emerging life sciences and biotechnology. You will also study creativity, discovery and innovation. By the end of Year 4, you will have gained:

- An in-depth understanding of marketing techniques
- A core grounding in science and technology
- Knowledge of web design, communications and industrial design
- An entrepreneurial outlook
- An understanding of the processes involved in new product development

You will learn through lectures, case studies and research projects, and from the vast knowledge of visiting practitioners. In some projects, you will work in multidisciplinary teams alongside engineers, scientists and biotechnology students, reflecting real-life scenarios.

Although (INTRA) has become an optional part of the MINT degree, we strongly recommend students avail of it. INTRA will provide you with a chance to work in a real world environment before you graduate. We expect 90% of your classmates will be doing INTRA. This 12-month, paid, work placement (INTRA) in Year 3, gives you a unique and valuable opportunity to appreciate the relevance of your study to the real business world. We find that students who have been on INTRA have a significant competitive edge when seeking employment after graduation.

**Additional Information**

Graduates of this course are eligible for membership of the Irish Computer Society, the national representative body for IT professionals. You will also be eligible for the graduateship examination of the Marketing Institute of Ireland, the professional body for marketing professionals in Ireland.

**What Our Current Students Say**

I chose Marketing, Innovation and Technology as it perfectly combined marketing principles, creativity and innovation and real world experience with a 12-month industry placement in Year 3.

DCU Business School has allowed me to grow professionally with an emphasis building on skills for life after college.

*Thomas Bird, BSc in Marketing, Innovation and Technology*

**Future Careers**

- Brand Account Manager
- Brand Ambassador
- Digital Account Executive
- Direct Marketing Executive
- Sales Manager
- Technology Consultant
- Agency Strategist
- Product Development
- Creative Strategist
- Innovation Specialist
- Innovation Lead

**In These Areas**

- Technology
- Healthcare
- Pharmaceuticals
- Biotechnology
- Software and IT
- Telecoms
- High-Tech Manufacture Firms

## Course Requirements

CAO CODE	COURSE TITLE	DURATION	POINTS
DC241	<b>BSc in Digital Business and Innovation</b>	4 years	509

### SUBJECTS REQUIRED

Leaving Certificate GCE A Level	Minimum of O4 or H6 in Mathematics GCE A Level D or GCE AS Level C or GCSE C Mathematics
------------------------------------	---

### OTHER ENTRY PATHS

QQI/FET Level 5	For details of QQI/FET requirements and relevant codes please see <a href="http://cao.ie/index.php?page=fetac_search">cao.ie/index.php?page=fetac_search</a> . Simply enter the DC code for the course you are interested in or if you are not sure of the code enter DC in the Select by Institution option, then click on Go.
Transfer Applications	Whilst transfer applications are welcomed from holders of qualifications in Business Studies, Marketing or related subjects for admission to Year 1 of this course, there is no advanced entry path into Year 2.

CAO CODE	COURSE TITLE	DURATION	POINTS
DC111	<b>Bachelor of Business Studies</b>	3 or 4 years	511

### SUBJECTS REQUIRED

Leaving Certificate GCE A Level	Minimum of O4 or H6 in Mathematics GCE A Level D or GCE AS Level C or GCSE C Mathematics
------------------------------------	---

### OTHER ENTRY PATHS

QQI/FET Level 5	For details of QQI/FET requirements and relevant codes please see <a href="http://cao.ie/index.php?page=fetac_search">cao.ie/index.php?page=fetac_search</a> . Simply enter the DC code for the course you are interested in or if you are not sure of the code enter DC in the Select by Institution option, then click on Go.
Transfer Applications	Holders of a Higher Certificate/National Certificate in Business Studies with Distinction may be considered for admission into Year 2. Holders of a Bachelor (Ordinary) Degree/National Diploma in Business Studies with Merit or Distinction may also be considered for admission into Year 2. No additional exemptions will be awarded from Year 2.

CAO CODE	COURSE TITLE	DURATION	POINTS
DC110	<b>Bachelor of Business Studies International</b>	4 years	498

### SUBJECTS REQUIRED

Leaving Certificate GCE A Level	Minimum of O4 or H6 in Mathematics and H4 in a language other than English or Irish GCE A Level D or GCE AS Level C or GCSE C Mathematics and GCE A Level C in a language other than English or Irish
------------------------------------	--

### OTHER ENTRY PATHS

The Faculty of Science and Health - a place to discover, problem solve, experiment and explore. An inclusive environment that serves to innovate and inspire.

The Faculty of Science and Health is an internationally recognised centre of excellence in scientific innovation and health transformation. We are committed to delivering an education that will equip students with a skill set appropriate to a successful and rewarding career that is of global significance and has direct social, environmental and economic benefit.

FACULTY OF SCIENCE AND HEALTH

# BSc in Psychology and Mathematics

## Develop numeracy, analytic and problem-solving skills to further the scientific study of the human mind and behaviour

### Why DCU?

- First integrated Psychology and Mathematics course in Ireland. Uniquely meets industry demand for graduates with the knowledge of how to apply numeracy and analytical skills to interpret how humans think, act, react and interact
- Small class sizes that allow for individual attention, delivered by a dynamic interdisciplinary, research-active lecturing team, with innovative teaching methodologies and student supports
- Work experience (INTRA) providing practical expertise in the application of mathematics and psychology to examine real-world problems in industry, clinical, education and other relevant settings
- Student-centred learning philosophy that places major emphasis on gaining digital, analytical, problem-solving and transferable skills
- High-quality research laboratories and research skills training supports with a capstone independent final-year project working with academic supervisors in Psychology and Mathematics to deliver research-driven solutions

### About You

You have an interest in human behaviour and an aptitude for high-level mathematics and scientific inquiry. You should possess very good verbal, written and interpersonal skills, be flexible, hard-working, creative, with an enquiring mind and the ability to think critically.

### Additional Requirements

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of H3 in Mathematics.

### Understanding: Psychology and Mathematics

The BSc in Psychology and Mathematics is the first course in Ireland to integrate these subjects for students interested in a career that combines the interpretation of human behaviour with high-level numeracy, analytical and problem solving skills. DCU is uniquely positioned to offer this course, building on core strengths in both disciplines.

'Psychology' is concerned with all aspects of behaviour, including the thoughts, feelings and motivations underlying such behaviour. While psychologists differ in their interests within the field of psychology and in the type of work that they do, they all approach the study of psychology in a scientific way.

'Mathematics' is key to understanding the modern world and mathematical training develops both specific numeracy skills and broad analytical expertise, which are valued in many professions. The course provides the opportunity to gain an in-depth knowledge and understanding of each discipline alongside a broad critical perspective on key areas of contemporary society. It is designed to develop a diverse set of transferable skills including an understanding of human behaviour, critical thinking, problem-solving, research methods, communication, and the ability to disseminate findings to varied audiences; skills increasingly demanded by national and international employers.

### Course Structure

The four-year BSc in Psychology and Mathematics course is structured to cover introductory to advanced levels of Psychology across the five pillars of undergraduate training: development and lifespan psychology; biological psychology and neuropsychology; social psychology; cognitive psychology and the psychology of individual difference; in combination with introductory to advanced levels of Mathematics including calculus,

probability, computing, statistics and data analysis. Research literacy is a core focus of the course and it is supported by a combination of practical and online laboratory activities.

The course covers an existing range of applied subjects (e.g. Psychological Assessment and Measurement, Social Psychology and Contemporary Issues, Coding and Cryptography and Deep Learning) and offers cutting-edge options specifically designed for this course. Thanks to our extensive networks with industry, business, partner hospital/clinics, schools and researchers, we are the first to have established integrated credited undergraduate Psychology and Mathematics internships.

Our Year 3 work placements (INTRA) can be in various fields including clinical, behavioural and cognitive neuroscience; financial and health-related industries, organisational and corporate psychology; and applied behaviour analysis.

In Year 4 the course offers the exciting opportunity to conduct an independent final-year research project combining psychological and mathematical tools and techniques to address a contemporary real-world psychological question.

### Additional Information

Graduates of this course will be well placed to undertake further studies and research in Psychology and Mathematics.

The course provides a pathway to a postgraduate qualification in teaching.

**Additional Information**

With appropriate choices of final year modules, graduates will meet the subject requirements of the Teaching Council in relation to Mathematics (see page 258 for details). This course has been developed in line with the pre-professional Psychological Society of Ireland principles and is currently pending accreditation.

# BSc in Psychology and Disruptive Technologies

## Study psychology in combination with disruptive technologies that are transforming lives and driving behavioural and societal change

### Why DCU?

- A unique opportunity to study psychology and understand human behaviour in combination with disruptive technologies that are fundamentally transforming lives and driving behavioural and societal change, sometimes raising challenges
- An accredited pre-professional route to further training in Psychology and applied progression routes in Disruptive Technologies
- High-quality research laboratories and research skills training supports
- Small class sizes that allow for individual attention, delivered by a dynamic interdisciplinary, research-active lecturing team, with innovative teaching methodologies and students supports
- Work experience (INTRA) providing practical expertise in various fields

### About You

Do you have an interest in studying Psychology and applied progression routes in Disruptive Technologies, coupled with employment opportunities in careers where high level digital innovation, transformative and problem-solving skills are prized, where the advanced interpretation of data and human behaviour is critical; where an awareness of how to address challenges posed by disruptive technologies is key, and where you have the collaborative and transferable skills required to move forward in society filled with digital and technological innovation?

You should possess very good verbal, written and interpersonal skills, be flexible, hard-working, creative, with an enquiring mind and the ability to think critically.

### Additional Requirements

In addition to the general entry requirements for admission to the University (see pages 232), the following entry requirements apply: O4 or H6 in Mathematics.

### Understanding: Psychology and Disruptive Technologies

Develop an understanding of the human mind and behaviour and the way in which disruptive technologies are enhancing, eliminating and creating entirely new solution spaces for societal issues, and the opportunities and challenges these present for contemporary society.

We are living through an era that has seen accelerated technological innovation and advancement with global reach and transformative impacts on every aspect of daily living. This is an exciting age of disruption reshaping how we think, behave and also engage with our environment. You will learn the skills, expertise and values needed to be able to work in a rapidly changing and diverse technological environment in behaviour change, mental wellbeing, health, enhancement and rehabilitation, and innovation. DCU's four-year BSc in Psychology and Disruptive Technologies course is structured to cover introductory to advanced levels of psychology across the five core pillars of undergraduate training: developmental and lifespan psychology; biological psychology; social psychology; cognitive psychology and the psychology of individual difference.

A core focus running throughout the course is research literacy supported by a combination of practical and virtual laboratory activities and digital innovation based on cutting edge technologies that positively disrupt the status quo and underpin societal change.

### Course Structure

The course will cover a dynamic range of applied areas and cutting edge options from the Psychology of Innovation and Disruption across diverse education, health, business and industry settings. Throughout the course, you will also develop a detailed understanding of the theories and innovations of disruptive technologies that significantly reshape the world that we live in, and also examine mechanisms for building trust in digital interactions.

In Year 3, you will complete an internship in various fields including digital technology and learning, digital therapeutics, and other applied areas within education, health and wellbeing, industry and community sectors.

In Year 4, you will have an exciting opportunity to complete a final year project bringing together your advanced and unique training in Psychology and Disruptive Technologies.

**Additional Information**

This course has been developed in line with pre-professional Psychological Society of Ireland (PSI) accreditation principles and is currently pending accreditation.

# Common Entry into Actuarial and Financial Mathematics

## Applying mathematics in the real world

### Why DCU?

- Choose between two qualifications
- At the end of Year 2, you decide between Actuarial Mathematics and Financial Mathematics
- BSc in Actuarial Mathematics may offer exemptions from the Core Principles examinations of the Institute and Faculty of Actuaries (IFoA) UK - CS1, CS2, CM1, CM2, CB1 and CB2
- BSc in Financial Mathematics opens up a wide range of financial careers
- Employers value the high-level mathematical training we offer

### About You

You have an interest in and aptitude for high-level mathematics and enjoy the challenge of problem solving. If you want flexibility in deciding on your eventual career path, choose Common Entry. It gives you the choice of two BSc degree courses: Actuarial Mathematics and Financial Mathematics.

### Additional Requirements

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of H3 in Mathematics.

### Understanding: Actuarial and Financial Mathematics

DC127 is a Common Entry route to two BSc courses in the areas of actuarial and financial mathematics. The advantage of Common Entry into two courses is that after two years of study, you will be better placed to know which of the options you will most enjoy.

They are:

- BSc in Actuarial Mathematics
- BSc in Financial Mathematics

Entry to Actuarial Mathematics is on a competitive basis, and is subject to performance in Years 1 and 2 and to availability of places. The BSc in Actuarial Mathematics also has a direct entry route. If you wish to directly enter the Actuarial Mathematics course, you should apply to the BSc in Actuarial Mathematics ([dcu.ie/DC126](http://dcu.ie/DC126)).

Access to Financial Mathematics is exclusively through the Common Entry route.

A report on the future of the international financial services sector in Ireland by Deloitte concludes that, "It is imperative that Ireland builds its pool of mathematically literate skill sets as they will be a key enabler to a successful, high-value financial centre". These BSc courses address this imperative.

### Course Structure

Both of the courses emerging from Common Entry last for four years in total. At the end of Year 2, you choose which course to follow. The structure allows you to make an informed decision about which stream to specialise in after studying fundamental courses such as analysis, algebra and probability, together with computing and statistics. The number of students in Year 3 of each course is limited and entry to a specific stream will be on merit, based on performance in Years 1 and 2.

In light of this, we offer the following advice:

- If you are certain that you want to pursue an actuarial career, apply for the DC126 BSc in Actuarial Mathematics
- If you wish to keep your options open with the actuarial/financial range, apply for DC127 Common Entry
- If you wish to maximise your chances of accessing an actuarial or financial course, you should apply for both DC127 Common Entry and DC126 BSc in Actuarial Mathematics in the order that reflects your priorities

You will have the opportunity to undertake a paid work placement (INTRA) in the actuarial or financial industry. Our INTRA offers you relevant work experience. It gives you a wonderful opportunity to experience a real work environment, make more informed decisions about your career choice and make useful contacts with prospective employers.

If you select the BSc in Financial Mathematics, you will study how random processes can develop over time, and apply these mathematical methods to examine how financial phenomena can evolve. You will also learn how to employ sophisticated statistical techniques to investigate large quantities of financial data and develop cutting-edge and data-driven models of the stock market. You will study high-level modern probability, and apply it to designing and pricing complex financial products such as derivatives and swaps. You will also learn how to make the large scale computer simulations needed to price exotic financial securities.

### Additional Information

Graduates of Actuarial and Financial Mathematics are well placed to undertake a postgraduate qualification in teaching, and have completed at least 50 of the 60 credits of mathematics required for Teaching Council recognition.

# BSc in Actuarial Mathematics

## Managing financial risk – turn risk management into a career

### Why DCU?

- Fully accredited by the Institute and Faculty of Actuaries (IFoA) UK
- Paid work experience provides practical actuarial experience and enables you to make informed career decisions
- Specialise in the latest in applications of mathematics to finance
- Industry sponsored prize awarded each year to the graduate with the best academic performance
- BSc in Actuarial Mathematics may offer exemptions from the Core Principles examinations of the Institute and Faculty of Actuaries, (IFoA) UK - CS1, CS2, CM1, CM2, CB1 and CB2

### About You

If you excel in mathematics and problem solving, and want to apply your talents to a career in the actuarial profession or in finance, then come and join our course.

### Additional Requirements

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of H3 in Mathematics.

### Understanding: Actuarial Mathematics

How long will people live and how much should they insure their lives for? Can we understand and predict the movement of stock prices? What is the rate of return on capital on an investment venture – and should that project be funded? These are some of the questions we will help you to answer at DCU.

The BSc in Actuarial Mathematics prepares you to pursue a career as an actuary or, more generally, for a career in finance. Actuaries are involved in quantifying and managing risk and work in areas as diverse as banking, insurance and healthcare. As financial markets become increasingly complex, there is a growing need for professionals who combine mathematical and financial expertise.

### Course Structure

In Years 1 and 2 of your degree you will cover the fundamental mathematical principles that underpin the financial models studied in later years. You also study practical and finance-related subjects such as computer programming, economics and accounting. In Years 3 and 4 you apply sophisticated mathematical techniques to real-world problems in insurance, finance and banking.

In Year 3, you will have the opportunity to undertake paid work placement (INTRA) in the actuarial or financial industry.

The placements are, typically, with major insurance companies, actuarial consultancies, investment banks or trading houses. This is a key opportunity for you to gain practical skills and experience in a commercial environment and will help you make an informed career choice upon graduation.

### Additional Information

The BSc in Actuarial Mathematics is fully accredited by the Institute and Faculty of Actuaries (IFoA). These are the initial examinations required in order to qualify as an actuary in Ireland and the UK. Exemptions depend on examination performance during the degree and achieving all exemptions can significantly reduce the time taken to qualify as an actuary.

Graduates of this course are well placed to undertake further studies and research in actuarial science, mathematics, financial mathematics, economics and finance. The course provides a strong foundation for those who wish to pursue a postgraduate qualification in teaching and covers over 90% of the mathematics required for Teaching Council recognition (see page 258 for further details).

### Additional Information

Graduates of Actuarial Mathematics are well placed to undertake a postgraduate qualification in teaching, and have completed at least 50 of the 60 credits of mathematics required for Teaching Council recognition.

### What Our Current Students Say

Actuarial Mathematics is a deeply satisfying course perfect for those with a keen interest in mathematics. This course is ideal for those who wish to become an Actuary, as it gives you the opportunity to get exceptions from some of the Actuarial Exams after college, and ultimately reduce your time studying post-degree!

*Luca Crone, BSc in Actuarial Mathematics*

### Future Careers

- Actuarial Consultancy
- Risk Management
- Investments
- Life and Health Insurance

# Biological Sciences General Entry

## Biology, Biotechnology, Genetics, Cell Biology, Bioprocessing

### Why DCU?

---

- Chance to explore biology in Year 1 before choosing the BSc in Biotechnology (DC181), BSc in Genetics and Cell Biology (DC168), or the new BSc in Bioprocessing (entry via DC181 only) degrees for Years 2, 3 and 4
- Student-centred blended learning approach aimed at developing your core scientific and bioprocessing skills
- Hands-on laboratory training covering all areas of science in Year 1
- Opportunity to apply basic scientific concepts for real societal impact

### About You

---

If you like studying biology, have an inquisitive and analytical mind and are interested in the basic sciences then Biological Sciences General Entry is a great option for you.

This general entry route provides you the fundamentals of the biological sciences before you make a choice of your preferred award.

### Additional Requirements

---

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of O3 or H6 in Mathematics PLUS minimum of O3 or H5 in one of Physics, Chemistry, Biology, Physics with Chemistry, Agricultural Science or Computer Science.

### Understanding: Biological Sciences General Entry

---

Biology is an increasingly diverse area with a wide array of topics. Our understanding of molecules, cells and life is central to human society and progress. Within this option, you can do the BSc in Biotechnology (DC181), the BSc in Genetics and Cell Biology (DC168), or the new BSc in Bioprocessing.

The BSc in Biotechnology focuses more on applying our knowledge of biology and bioprocess engineering to make molecules, such as pharmaceuticals, on an industrial scale.

The new BSc in Bioprocessing will contain a little bit more bioprocess engineering than the BSc in Biotechnology (DC181) course, but, importantly, will involve a brand new approach to teaching and learning. There will be far less emphasis on lectures and examinations and much more emphasis on multidisciplinary projects and teamwork.

The third option, the BSc in Genetics and Cell Biology (DC181), will provide you with the knowledge and skills to investigate how life works at a molecular and cellular level. The sub-disciplines that you will study include immunology, cell and molecular biology, microbiology and biochemistry, and computational biology (bioinformatics).

### Course Structure

---

Part of Year 1 is taken in common with other science courses, so you will be studying biology, chemistry, physics and a module in which you will develop the basic skills required to thrive at third level. You will also study a newly-designed mathematics course which will use adaptive learning methods so that students can progress at a pace that suits them.

At the end of Year 1 you will be prepared to progress to Years 2, 3 and 4 of your chosen Biological Science degree, which include:

- BSc in Bioprocessing (via DC180)
- BSc in Biotechnology (DC181)
- BSc in Genetics and Cell Biology (DC168)

**Additional Information**

At the end of Year 1 you will progress to Year 2 of your chosen Biological Science degree, choosing one of the following:  
 BSc in Biotechnology  
 BSc in Genetics and Cell Biology  
 BSc in Bioprocessing

# BSc in Bioprocessing

## Entry via DC180 Biological Sciences General Entry

CAO code  
**DC180**

Years  
**1+3**

Internship  
**Yes**

### General Information

The BSc in Bioprocessing is an interactive and dynamic course that will develop your knowledge and appreciation of the scientific and engineering bases for bioprocess design and operation.

### Why Is It Exciting?

Bioprocessing is at the heart of the biopharmaceutical and related industries. Bioprocessing involves the integrated application of biological sciences and bioprocess engineering principles to the manufacturing of pharmaceuticals, enzymes, food, and related products, on a commercial scale. This course will develop your understanding of the fundamental biological principles and methods involved in the development of new drugs and related products. You will also come to understand the problems posed by the demands of large-scale production, and you will develop the bioprocess and biomolecular engineering knowledge and skills to solve those problems.

As a budding bioprocessing specialist, you will have a unique appreciation of the integrated nature of bioprocessing and you will be able to combine your knowledge of biochemistry, microbiology and genetics with your expertise in bioprocess control, data analysis and process modelling and simulation. Your strong knowledge of both biology and bioprocess engineering, and your ability to integrate these disciplines, will place you in the perfect position to work, research and innovate in the rapidly changing bioprocessing sector.

### What Will I Study?

At the start of the BSc in Bioprocessing, you will be introduced to the basic sciences, mathematics and data analytics. As you progress, you will delve more deeply into the fundamentals of both biology and bioprocess engineering, putting in place the foundations to be able to integrate these disciplines.

In Year 3, you will begin to focus on real-world bioprocessing problems and have the opportunity to spend 9-months in industry as part of our industrial training programme (INTRA).

In Year 4, you will continue to develop your ability to integrate biology and bioprocess engineering. You will complete an industry-focused research project and take part in a team-based product innovation challenge. You will also contribute to a research-focused journal club with your fellow students and your lecturers.

### How To Apply

Applicants to this course must apply via DC180 Biological Sciences General Entry. Upon successful completion of Year 1 of the degree choices are:

- BSc in Bioprocessing (via DC180)
- BSc in Biotechnology (DC181)
- BSc in Genetics and Cell Biology (DC168)

### Additional Information

To study Bioprocessing, you must join our Biological Sciences General Entry (DC180) and choose this option at the end of Year 1.

# BSc in Biotechnology

## Apply biology to improve the quality of human life

### Why DCU?

---

- Longest established biotechnology course in Ireland
- Modern course integrating emerging new technologies
- Multidisciplinary academic staff within the School of Biotechnology
- Opportunities to do a 9-month paid work placement (INTRA) at home or abroad in Year 3

### About You

---

If you have an inquisitive and analytical mind, are interested in the application of the basic sciences and have a basic competency in mathematics, then you should thrive in Biotechnology.

### Additional Requirements

---

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of O3 or H6 in Mathematics PLUS minimum of O3 or H5 in one of Physics, Chemistry, Biology, Physics with Chemistry, Agricultural Science or Computer Science.

### Understanding: Biotechnology

---

Biotechnology is making significant contributions to global society. By studying the components of living cells, we can learn how to control, fix and modify them to our benefit. This knowledge is already leading to the creation and manufacture of products that help in the diagnosis and treatment of disease (e.g. the production of antibiotics, insulin and other genetically engineered medicines, such as safer recombinant vaccines). Biotechnology also contributes to services in areas like healthcare, food, agriculture, energy and the environment.

Biotechnologists find new and innovative solutions to problems encountered in society. They need a good fundamental grasp of the biochemistry underlying biological systems and a good knowledge of the exciting innovations occurring in genetics, immunology and bioinformatics. To understand how solutions apply on a commercial industrial scale, they also need a good understanding of the underlying physical and chemical engineering principles pertaining to living cells.

### Course Structure

---

By studying a wide range of scientific and engineering subjects, you will gain the necessary skills to succeed in the emerging, technology-driven biotech industry.

In Year 1, you will study the basic sciences and mathematics, with an introduction to bioprocessing. Year 2 develops the biological and engineering aspects of Biotechnology. Year 3 introduces specialist areas of biology, such as immunology, genetic engineering and cell culture. In engineering, you will be introduced to bioreactors, primary separations and downstream processing. In addition, in Year 3 you will have the opportunity to do a 9-month paid work placement (INTRA).

In Year 4, the underlying biological and engineering principles of biotechnical processes are developed in an integrated manner, and you can choose either a BioPharma specialisation, which includes content focusing on the biopharmaceutical industry, or a Research specialisation that includes an 8-week research project conducted in the research laboratory of your project supervisor. Here you will work with postgraduate and postdoctoral researchers on cutting edge problems in biology and bioprocess engineering.

### Additional Information

With an appropriate selection of modules and upon successful completion of this Honours Bachelor Degree (NFQ Level 8), graduates applying for registration on or after the 1st of January 2023 will satisfy the Teaching Council subject curricular requirements for the teaching of Biology at post-primary level, (see page 258 for further details).

# BSc in Genetics and Cell Biology

## Explore biology from molecules to cells to systems

### Why DCU?

---

- Emphasis on investigative science
- Extensive hands-on training in laboratory-based and computational experiments
- Biopharmaceutical stream option
- 7-month paid work placement (INTRA)
- Final year project in research lab

### About You

---

You will enjoy the course in Genetics and Cell Biology if you like studying biology and are interested in recent scientific breakthroughs in human disease, molecular biology and research at the cellular level.

### Additional Requirements

---

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of O3 or H6 in Mathematics PLUS minimum of O3 or H5 in one of Physics, Chemistry, Biology, Physics with Chemistry, Agricultural Science or Computer Science.

### Understanding: Genetics and Cell Biology

---

Science is progressing at an extraordinary and unprecedented pace. This is especially true of genetics and cell biology. With our ever-increasing knowledge of genetics, we can better understand what controls and contributes to our development and individuality. We can apply these new findings in cell biology to explore exciting scientific applications that benefit all.

Our improved understanding of the genetic basis for life has opened up new approaches for the investigation, diagnosis and treatment of disease. As a result, we are in a new era in the development and production of medical devices, therapies and drugs. The course has been developed to incorporate the theoretical and practical aspects of molecular and cellular biology, providing you with the knowledge and expertise you will need for future careers in industry, research and beyond. You will have the opportunity to develop your interest in biology and learn the laboratory and computational skills that are the basis for key scientific breakthroughs. You will also gain a full appreciation of how the improved knowledge of genetics and cell biology affects society.

### Course Structure

---

Part of Year 1 is taken in common with other science courses, so you will be studying biology, chemistry, physics, biostatistics and bioinformatics. Prior knowledge of one science subject and mathematics is required.

In Year 2, you will develop a deeper understanding of genetics, biochemistry, microbiology, cell biology, bioinformatics and pharmacology.

In the first semester of Year 3, you will gain the practical skills and techniques that form the basis of cell and gene technologies, including cell manipulation, gene cloning and genomics. With this knowledge, you will be well-prepared for your 7-month paid work placement (INTRA).

In Year 4, you will explore the advances arising from research in genetics, cancer research and cell biology as well as medical products. If you take the Genetics and Life Science stream, you will do a semester-long research project. If you opt for the Biopharma Stream, you will study courses related to biopharmaceutical science, industry and production processes.

### Additional Information

With an appropriate selection of modules and upon successful completion of this Honours Bachelor Degree (NFQ Level 8), graduates applying for registration on or after the 1st of January 2023 will satisfy the Teaching Council subject curricular requirements for the teaching of Biology at post-primary level, (see page 258 for further details).

# Chemical Sciences General Entry

## Explore analytical, chemical and pharmaceutical science and chemistry with artificial intelligence

### Why DCU?

- Chemistry is the key to understanding the world we live in
- Unlock the secrets of how drugs and pharmaceuticals work, enabling us to make treatments for diseases and infections
- Chemistry holds the key to our future, developing tomorrow's innovations, creating possibilities for a greener, sustainable future
- Opportunity to study different areas of chemistry, to see which field inspires you most
- Gain unparalleled hands-on experience in our industry standard laboratories
- National award-winning undergraduate teaching labs (Education Lab of the Year) under the Irish Laboratory Awards (ILA) programme

### About You

Do you have an inquisitive mind and a keen interest in science? Are you interested in how the world works? Do you enjoy a challenge and finding solutions to problems, from individual to global issue? Then Chemical Sciences General Entry may be the course for you.

### Additional Requirements

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of O3 or H6 in Mathematics PLUS minimum of O3 or H5 in one of Physics, Chemistry, Biology, Physics with Chemistry, Agricultural Science or Computer Science.

### Understanding: Chemical Sciences General Entry

The Chemical Sciences General Entry course allows you to study a variety of chemistry, biology, physics and mathematics in Year 1. You will study the fundamental basis of chemistry, and build on this to learn how medicines work, what causes climate change, how to drive reactions to go faster, how to determine and conduct analysis on the source of a water pollution event for example and much more.

The range of dynamic laboratory practical sessions you will carry out each semester ensures you develop excellent laboratory skills to support a successful career as a scientist in the chemical and biopharmaceutical industries or in research.

You will learn in small student groups within student-focused laboratories, assisted by fully trained lab tutors, getting hands-on experience on the instruments and techniques that are used in industry. Our award winning laboratory teaching teams work to ensure an excellent student centred laboratory learning experience for each student.

### Course Structure

In Year 1 you will discover the fundamental basis of chemistry, learning all about molecules; how they react with each other; why and how we study and analyse them; providing you with an excellent foundation for the rest of your studies. To support this, you will take modules in biology, physics, mathematics, computing and IT skills, and carry out practical laboratory sessions in chemistry, biology and physics.

At the end of Year 1 you will be prepared to progress to Year 2, 3 and 4 of your chosen Chemical Science degree:

- BSc in Chemistry with Artificial Intelligence (via DC163)
- BSc in Analytical Science (DC161)
- BSc in Chemical and Pharmaceutical Sciences (DC162)

Note that Year 3 will include a 6-month industry-based paid work placement (INTRA) providing you with an excellent opportunity to apply your knowledge and skills learned within a company while also gaining invaluable work experience.

Year 4 will include carrying out a semester long research project, developing your own personal research skills and have the opportunity to do cutting edge research in an area of particular interest to you.

**Additional Information**

All the Chemical Sciences General Entry designated degree programmes satisfy the current subject curricular requirements for teaching chemistry at post primary level set by the Teaching Council, (see page 258 for further details).

# BSc in Chemistry with Artificial Intelligence

## Entry via DC163 Chemical Sciences General Entry

CAO code  
**DC163**

Years  
**1+3**

Internship  
**Yes**

### General Information

The BSc in Chemistry with Artificial Intelligence is run by the DCU School of Chemical Sciences in collaboration with the DCU School of Computing. In this groundbreaking degree, one of the first of its kind, you will learn the chemistry and computing skills needed to harness the enormous potential of applying Artificial Intelligence to Chemistry.

### Why Is It Exciting?

Artificial Intelligence (AI) is revolutionising how drugs are discovered, developed and produced. For example, it is helping drug development scientists bring Covid-19 vaccines to market faster, by rapidly accelerating potential discoveries, identifying potential side effects, and making the production process faster. That's not all, as globally, scientists are beginning to unlock the power of AI to help them find new medicines and sustainable materials. In fact, they are creating a new tomorrow.

### What Will I Study?

You will begin studying a variety of chemistry topics in Years 1 and 2. You will study the fundamental basis of chemistry, and build on this to learn how medicines work, what causes climate change, how to drive reactions to go faster, how to determine the source of a water pollution event, and so much more.

Our student-focused laboratory practical sessions are a combination of wet labs and virtual components. In these you will learn in small student groups, assisted by fully trained laboratory tutors and our award-winning technical team, getting hands-on experience on the instruments and techniques used in industry. The AI strand begins in Year 2, with modules in programming and machine learning throughout Years 2-4.

In Year 3 you will have the opportunity to work in industry as part of our industrial training programme (INTRA). In Years 3 and 4 you will also study the skills and theory you need to apply AI to chemistry. A major element of final year is the capstone research project, in which you get to pursue independent research in an area of applied chemistry.

The use of AI is only going to further increase in drugs and materials firms, and the course has been designed to ensure graduate employability into the future. Industry partners will be actively involved throughout the four years, helping to develop the course, deciding skill sets, suggesting software, providing assignments and offering assessments.

### How To Apply

Applicants to this course must apply via DC163 Chemical Sciences General Entry. Upon successful completion of Year 1 of the degree choices are:

- BSc in Chemistry with Artificial Intelligence (via DC163)
- BSc in Analytical Science (DC161)
- BSc in Chemical and Pharmaceutical Sciences (DC162)

### Additional Information

To study Chemistry with Artificial Intelligence, you must join our Chemical Sciences General Entry (DC163) and choose this option at the end of Year 1. Successful completion of this Honours Bachelor Degree (NFQ Level 8) satisfies the current Teaching Council subject curricular requirements for the teaching of chemistry at post-primary level. (See page 258 for further details).

# BSc in Analytical Science

## Analysis, detection and measurement – solve problems of critical importance

### Why DCU?

---

- National award-winning undergraduate teaching labs under the Irish Laboratory Awards (ILA) programme
- Highly qualified and accessible staff to guide your progress
- Paid work placement (INTRA)
- Access to modern, industry-standard, analytical equipment
- Project options in chemistry, biology and environmental science
- The first Analytical Science (chemistry option) degree course in Ireland to be awarded the Eurobachelor label, for details, please visit [ectn.eu/committees/label/labels/](http://ectn.eu/committees/label/labels/)

### About You

---

If you have an interest in science, have an analytical and problem-solving approach to life, and are looking for a bright and productive career, then Analytical Science is the degree for you.

### Additional Requirements

---

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of O3 or H6 in Mathematics PLUS minimum of O3 or H5 in one of Physics, Chemistry, Biology, Physics with Chemistry, Agricultural Science or Computer Science.

### Understanding: Analytical Science

---

Analytical Science is the term given to the science of detection and measurement. It is of fundamental importance in today's information society. We see, use and benefit from it every day – from tests to check the purity of medicines to the daily monitoring of industrial waste or to analysis in the forensic laboratory. Through analytical science, we solve problems of critical importance.

The BSc in Analytical Science employs an interdisciplinary approach, educating you in both theoretical and practical aspects of chemical, biochemical and microbiological analyses. The ever-increasing demand for more detailed and accurate data from within these disciplines means your services as a trained analytical scientist will be in constant demand.

### Course Structure

---

Year 1 provides the essential background knowledge of mathematics, chemistry, physics and biology. These are of vital importance in later years. Thought-provoking laboratory work is an integral part of the course.

The major emphasis in Years 2 and 3 is on analytical science, with chemical and biological aspects being developed in parallel. In Year 3, you can choose between a chemistry stream or a biology stream, so you can specialise in the area that suits you best. Both streams cover major, modern, state-of-the-art analytical techniques, and you'll enjoy plenty of hands-on experience in our exceptionally well-equipped facilities.

Your period of paid work placement (INTRA) before your final year ensures that you gain valuable work experience in a real-life setting, putting the many things you have learned on the course to the test.

Year 4 covers more specialised methods and applications of analytical science, which, when integrated with the basic analytical techniques you have already learned, offer you the opportunity to develop your own analytical approach to solving complex problems. Chemistry and biology specialist options are maintained, ensuring that you still gain the multidisciplinary education that modern employers demand. The final part of your course is a full-time project taken in the last semester.

### Additional Information

Successful completion of this Honours Bachelor Degree (NFQ Level 8) satisfies the current Teaching Council subject curricular requirements for the teaching of chemistry at post-primary level, see page 258 for further details).

## What Our Current Students Say

I am going into Year 4 of Analytical Science at DCU. The combination of biology, chemistry and labs is challenging but enjoyable and equips you with a great base of knowledge and skills for INTRA and final year. The option to specialise in Year 3 allows you to focus on what you enjoy most and are best at. By far the highlight has to be my INTRA placement. This course is industry focused and prepared me perfectly for working as a student in a quality control lab in a pharmaceutical company. Getting work experience outside of the classroom, before you graduate, is what makes this course so unique.

# BSc in Chemical and Pharmaceutical Sciences

## Applying the fundamentals of chemistry to develop pharmaceutically relevant molecules and materials

### Why DCU?

---

- Award-winning technical team (RSC 2019 Higher Education Technical Excellence Award)
- National award-winning undergraduate teaching labs under the Irish Laboratory Awards (ILA) programme
- High practical content (intensive laboratory modules) and IT courses
- Specialist workshops in Spectroscopy and Drug Design
- Strong innovative research profile and opportunities for further study at MSc and PhD level
- The first Chemical and Pharmaceutical Sciences degree course in Ireland to be awarded the Eurobachelor label. For details, please visit [ectn.eu/committees/label/labels/](http://ectn.eu/committees/label/labels/)

### About You

---

If you are creative, focused, hard-working and keen to develop your understanding and skills in chemical and pharmaceutical sciences, then this course is for you.

### Additional Requirements

---

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of O3 or H6 in Mathematics PLUS minimum of O3 or H5 in one of Physics, Chemistry, Biology, Physics with Chemistry, Agricultural Science or Computer Science.

### Understanding: Chemical and Pharmaceutical Sciences

---

Considered by most scientists to be the central science among the science subjects, chemistry has a wide range of industrial applications that affect our daily lives. Chemists develop new materials, drugs and pharmaceuticals and they design cleaner and more efficient reaction processes to produce them. On this degree course, you will have the opportunity to develop your understanding and skills in chemistry within both a theoretical and applied context.

The emphasis is on applications and industrial relevance, particularly within the pharmaceutical industry, with the theoretical and practical aspects taught through application. This will lead to a familiarity with the basic principles of chemistry, ensuring you develop an impressive range of problem-solving skills.

### Course Structure

---

Year 1 provides the essential background knowledge of mathematics, chemistry, physics and biology. These are of vital importance in later years. Working in the laboratory plays a key role in your learning.

In Year 2, the mainstream chemistry lectures and laboratories are developed with relevant topics in pharmaceutical chemistry, mathematics, computing and biochemistry.

An integral part of Year 3 is paid work placement (INTRA), which ensures you gain first-hand experience in the applications of chemistry during a period of industrial placement.

The final year of the course concentrates on your knowledge and development of more advanced topics. A major element in this final year is your individual research project, which consists of a literature survey on a particular topic, followed by laboratory-based research work in your general area of interest.

#### Additional Information

Successful completion of this Honours Bachelor Degree (NFQ Level 8) satisfies the current Teaching Council subject curricular requirements for the teaching of chemistry at post-primary level. (see page 258 for further details).

# BSc in Environmental Science and Technology

## Gain the skills to apply science for the good of our environment

### Why DCU?

- The only degree of its kind in Ireland to develop your knowledge and understanding of the science behind climate change, pollution, water, soil, waste and recycling
- Use this scientific knowledge in your subsequent career to help improve and protect our environment
- Be involved in environmentally relevant research projects and undertake multiple dedicated field trips and educational project
- Opportunities to do a paid work placement (INTRA) in industry, academia and Non Governmental Organisations (NGO's)
- Environmental science and technology are growth areas, offering excellent career prospects

### About You

If you are interested in our environment, and are looking for a career exploring and understanding the impact of changes to it, then Environmental Science and Technology can provide you with the skills and experience you need.

### Additional Requirements

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of O3 or H6 in Mathematics PLUS minimum of O3 or H5 in one of Physics, Chemistry, Biology, Physics with Chemistry, Agricultural Science.

### Understanding: Environmental Science and Technology

Climate change, species extinction, pollution, managing waste and recycling are huge challenges that we face and are now at the forefront of public discourse and debate. These are complex phenomena that we must understand in order to address. Environmental scientists are needed to provide technical solutions and advanced innovations through the application of chemistry, physics and biology. This degree explores the environment, the technologies used for its analysis, and how it is impacted by our activities from a scientific perspective. You will consider and probe the problems we face and investigate means for reducing our negative impact on the environment. As a graduate of this degree you will have the scientific and technological background required to positively influence our common future.

### Course Structure

One of the core objectives of this course is to integrate elements of physics, chemistry and biotechnology in a multidisciplinary way, ensuring that you understand all the sciences from an environmental perspective. This will give you a greater working knowledge of the influences on the environment and, as a result, will present you with greater job opportunities when you graduate.

The following modules will provide the scientific understanding of our environment that is required for graduates to make a positive impact on the environment and in their careers.

Modules such as:

- Climate and Aquatic Science
- Climate Related Field Trips
- Soil, Energy and Waste
- Analysis of the Environment
- Environmental Monitoring and
- Data Analysis
- Environmental Field Trips
- Renewable Energy

Year 1 provides the essential background knowledge of mathematics, chemistry, physics and biology that are the basis for a career in environmental science. The first field trip occurs in semester 2.

In Year 2, you will continue to build on the four areas of study in year 1 as well as develop IT and computing skills.

In Year 3, climate change science is introduced, and the study of climate is encouraged through field work. A field trip module includes visits to:

- The world renowned Burren region in Co Clare to study past climates and how this knowledge is required to predict the future
- Water treatment plants
- Energy facilities
- Dublin Bay water quality monitoring sites
- Wind farms

You will continue to develop in environmental aspects of biotechnology, chemistry and physics and you will gain experience on a paid work placement (INTRA).

In Year 4 you will carry out a semester-long research project, with topics offered from across the entire Science and Health Faculty.

### Additional Information

With an appropriate selection of modules and upon successful completion of this Honours Bachelor Degree (NFQ Level 8) the graduate satisfies the current Teaching Council subject curricular requirements for the teaching of Biology or Chemistry at post-primary level, (see page 258 for further details).

### What Our Graduates Say

I decided to study Environmental Science and Technology as I had an interest in sustainability, environmentalism and also wanted a science degree with lots of lab experience. The course includes many field trips which gives you lots of opportunities to make great friends with similar interests. Another unique aspect of the course is the paid work placement (INTRA) in Year 3 which can be done anywhere environmentally relevant. One thing that stood out to me when choosing this course was the emphasis on getting an introduction to chemistry, biology and physics in Year 1 which prepares you for all the great modules in the next three years of the course.

*Aisling Hurley, BSc in Environmental Science and Technology*

### Future Careers

- Climate Science
- Environmental Protection
- Environmental Science
- Waste Management
- Wastewater Treatment
- Sustainable Energy
- Earth Science

# Physics General Entry

## Apply the science of physics to unravel the mysteries of the universe

### Why DCU?

- Study a wide range of physics topics in Year 1
- Pursue one of four Physics degree courses from Year 2 onwards, BSc in Applied Physics, BSc in Physics with Astronomy, BSc in Physics with Biomedical Science or BSc in Physics with Data Analytics
- Highly qualified and internationally recognised staff who are enthusiastic and accessible
- Classes exclusive to physics students means more personal attention
- Emphasis on employability and real-life skills to suit a rapidly changing work environment

### About You

If you are interested in how the world works and how science seeks to answer the big questions, if you have a logical mind and competency in mathematics then Physics General Entry may be the course for you.

### Additional Requirements

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of O3 or H6 in Mathematics PLUS minimum of O3 or H5 in one of Physics, Chemistry, Biology, Physics with Chemistry, Applied Mathematics in one of Physics, Chemistry, Biology, Physics with Chemistry or Applied Mathematics.

### Understanding: Physics General Entry

Physics is the most fundamental science. It explains the mysteries of the universe and has fueled many of the scientific and technological developments that we take for granted. Physicists also pioneered modern technologies as diverse as the Internet, Nuclear Power and MRI scanners. Today physicists continue to generate new knowledge about our world and lead innovation in yet-to-be exploited realms such as quantum information and communications technology, nano-systems design, ultrafast molecular switching and terahertz medical imaging.

Upon successful completion of Physics General Entry, Year 1, you will enter into Year 2 of one of the following 4 degree courses:

- BSc in Applied Physics
- BSc in Physics with Astronomy
- BSc in Physics with Biomedical Sciences
- BSc in Physics with Data Analytics

### Course Structure

Physics General Entry provides you with the opportunity to gain a solid foundation in physics, mathematics, laboratory and IT skills before progressing to your chosen degree.

Your chosen degree will combine lectures, tutorials and stimulating laboratory work and projects with fundamental physics concepts and exciting, real-life technological skills and applications. The basic foundations of physics will be laid in Years 1 and 2, while in Years 3 and 4, you will choose to study more specialist topics.

Your period of industrial placement INTRA in Year 3 ensures that you gain valuable paid work experience and for those who wish to pursue a research career, you will have the option of spending your placement working in one of our research groups. Your Year 4 project is a real highlight which you conduct in our world-class laboratories and where you will experience the excitement and personal achievement associated with scientific research.

On several occasions, final-year physics students have received national and international awards from the Undergraduate Awards, the Institute of Physics and the International Society of Automation on the basis of their project work.

During your chosen course, you will be encouraged to apply for scientific internship schemes, including visiting fellowships in organisations such as the European Organisation for Nuclear Research (CERN) and the European Space Agency (ESA).

**Additional Information**

All the Physics General Entry designated degree programmes satisfy the current subject curricular requirements for teaching physics at post primary level set by the Teaching Council, (see page 258 for further details).

# Physics General Entry

## Apply the science of physics to unravel the mysteries of the universe

### **BSc in Applied Physics** (Entry via DC175 Physics General Entry)

---

DCU's BSc in Applied Physics degree provides a solid physics foundation and invaluable laboratory exposure, with an overarching emphasis on real-life technological skills and applications. The analytical abilities and problem-solving skills you'll develop will also make you a standout candidate on the job market and serve you throughout your career.

You will enter BSc in Applied Physics via the Physics General Entry route (DC175), confirming your choice at the end of Year 1. This degree combines lectures, tutorials and stimulating laboratory work and projects with fundamental physics concepts and exciting, real-life technological skills and applications. The basic foundations of physics will be laid in Years 1 and 2, while in Years 3 and 4, you can choose to study specialist topics, such as instrumentation, nanotechnology, semiconductor materials, plasma physics and microfluidics.

Successful completion of this Honours Bachelor Degree (NFQ level 8) satisfies the current Teaching Council subject curricular requirements for the teaching of physics at post-primary level, see page 258 for further details.

### **BSc in Physics with Astronomy** (Entry via DC175 Physics General Entry)

---

The oldest of the sciences, astronomy is an almost boundless field, encompassing aspects of physics, astronomy, astrophysics, and the growing field of space science and technology. This course is designed to appeal to everyone with an interest in physics, astronomy, astrophysics, space science and technology. You will gain a solid background in fundamental physics as well as optics, high-end computing and image processing. You will have the chance to learn about the exciting subject of observational astronomy and the instruments and techniques used to study the stars. You will also learn about the growing field of space science and technology, which is intimately linked to many aspects of astronomy. It is a truly exciting course that knows no bounds.

You will enter BSc in Physics with Astronomy via the Physics General Entry route (DC175), confirming your choice at the end of Year 1. This degree combines lectures, tutorials and stimulating laboratory work and projects including work with real astronomical data from a variety of telescopes and observatories worldwide. This will develop your analytical and problem-solving skills.

Students always find this course rewarding and enjoyable as it gives great scope for individual initiative and students have the opportunity of working with professional astronomers on the academic staff at DCU, whose work is at the forefront of international astronomical research.

Successful completion of this Honours Bachelor Degree (NFQ level 8) satisfies the current Teaching Council subject curricular requirements for the teaching of physics at post-primary level, see page 258 for further details.

### **BSc in Physics with Biomedical Sciences** (Entry via DC175 Physics General Entry)

---

This course has been designed to provide a solid background in physics and in the principles which underpin the chemical, biological and life sciences, and an understanding of the most recent developments in the area, such as nanosystem design or ultrafast molecular switching. It is ideally suited to the needs of students who intend to pursue a career in physics and technology related to medical research, clinical services or biomedical industries.

You will enter BSc in Physics with Biomedical Science via the Physics General Entry route (DC175), confirming your choice at the end of Year 1. In Years 1 and 2, you will study the basic foundations of physics and the fundamentals of chemistry, cell biology, anatomy and physiology. In Years 3 and 4, you will study a selection of more advanced physics topics, such as Quantum Mechanics or Laser Physics, which underpin applications in the biomedical sciences. Application courses at the interface between the physical and life sciences, such as Biomechanics of Human Movement, will also be offered. In Year 4, expert academic staff will teach medical physics subjects such as Medical Imaging or Medical Applications of Lasers.

Throughout your course, you will be working in a custom-designed physics building equipped with state-of-the-art undergraduate and research laboratories. Seminars are delivered by international experts and eminent DCU researchers. Visits to internationally renowned biomedical research institutes will also be important parts of the course.

Successful completion of this Honours Bachelor Degree (NFQ level 8) satisfies the current Teaching Council subject curricular requirements for the teaching of physics at post-primary level, see page 258 for further details.

# BSc in Physics with Data Analytics

## Entry via DC175 Physics General Entry

CAO code  
**DC163**

Years  
**1+3**

Internship  
**Yes**

### General Information

The BSc in Physics with Data Analytics is run by the DCU School of Physical Sciences in collaboration with partners across DCU and industry.

Here in the School of Physical Science in DCU we are always looking for more ways to push the boundaries of learning. In this ground-breaking degree, you will combine the skills and knowledge of a Physics degree with the advanced data analytics tools you need to solve real-world problems in new and exciting ways.

### Why Is It Exciting?

Physics is the most fundamental science. It explains the mysteries of the universe and has fuelled many of the scientific and technological developments that we take for granted. Physicists have pioneered modern technologies as diverse as the internet, digital cameras and MRI scanners. Today physicists continue to generate new knowledge about our world and lead innovation in yet-to-be exploited realms such as quantum information and communications technology, Nano-systems design, ultrafast molecular switching and terahertz medical imaging while also spearheading research on sustainable energy production and other global challenges. Our technology-infused world generates massive amounts of data and physicists are among those working to interpret that data and revolutionise how technologies are harnessed. The methods to process data are not only used in physics but applied across disciplines and sectors, including the semiconductor industry, pharmaceutical industry, finance, and software development giving you an exciting range of options.

### What Will I Study?

You will begin studying a variety of physics topics in Years 1 and 2. This degree combines lectures, tutorials and stimulating laboratory work and projects with fundamental physics concepts and exciting, real-life technological skills and applications.

The basic foundations of physics, maths, and programming will be laid in Years 1 and 2, while in Years 3 and 4, more specialist topics on machine learning, artificial intelligence and quantum computing are introduced.

In Year 3, you will have the opportunity to work in industry as part of our industrial training programme (INTRA) or optionally spend your placement working in one of the research groups in the School of Physical Sciences or DCU affiliated research centres, where you will assist with cutting-edge research projects.

In Year 4, your choices include: nanotechnology, plasma physics and physics of medical diagnostics. Throughout your degree, you will also explore mathematics, statistics, programming, cloud and high-performance computing. You will then learn how to apply these computational tools to industry-relevant physical and societal scenarios using real-world data from industry partners and learn to communicate the results.

You will conduct your Year 4 project in DCU's world-class laboratories and research centres, experiencing the excitement and personal achievement associated with scientific research. A second part of the final year project will team you up into interdisciplinary teams tackling industrial led real life problems in a collaborative manner.

### How To Apply

Applicants to this course must apply via DC175 Physics General Entry. Upon successful completion of Year 1 of the degree choices are:

- BSs in Physics Data Analytics
- BSc in Applied Physics
- BSc in Physics with Astronomy
- BSc in Physics with Biomedical Sciences

### Additional Information

Successful completion of this Honours Bachelor Degree (NFQ level 8) satisfies the current Teaching Council subject curricular requirements for the teaching of physics at post-primary level.

# BSc in Sport Science and Health

## Apply science to enhance sports performance and physical activity

### Why DCU?

---

- A unique course developed to meet the changing needs of students and employers in sport, exercise and health settings
- A course supported by state-of-the-art physiology, biomechanics and psychology laboratories
- Relatively small classes allow for individual attention from high-quality staff
- A mixture of sport and exercise practical classes, laboratory classes, lectures, tutorials and seminars
- A limited number of places for elite sportspeople and top-level coaches

### About You

---

If you have an aptitude for science and an enthusiasm for sport, health and exercise and physical activity, then this course will appeal to you. It is a stimulating and challenging course that requires hard work, dedication, commitment and enthusiasm.

### Additional Requirements

---

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of O4 or H6 in Mathematics PLUS minimum of O4 or H6 in one of Physics, Chemistry, Biology, Physics with Chemistry, Agricultural Science.

### Understanding: Sport Science and Health

---

Sport and exercise scientists study, research and advise on the scientific factors influencing sport and exercise. With their detailed knowledge, they can give specialist, evidence-based advice to improve performance and health.

They also design and administer appropriate methods of assessment and create exercise or training programmes of a technical, physiological or psychological nature to improve health or sporting performance.

Areas covered include exercise testing, conditioning, exercise rehabilitation, psychological preparation for competition, performance and movement analysis, dietary considerations and strength training.

### Course Structure

---

You will develop a detailed understanding of the scientific aspects of sport, health and exercise. You will also learn how these are investigated and applied. The objective of the course is to produce well-informed science graduates who think critically and creatively, can apply knowledge and are prepared for employment in a variety of sectors.

In Year 1, you will be introduced to the key science subjects that form the backbone of this degree. These include chemistry, physiology and psychology. In addition, there are a range of practical classes and sessions in sport and physical activity.

In Year 2, you will learn how the scientific subjects of Year 1 are applied to the study of sport, exercise and health. The topics included illustrate the wide range of material covered in this exciting course - from nutrition and genetics to psychology, anatomy and sociology of sport. Vocational aspects like fitness assessment, coaching studies and health promotion are covered in Years 2 and 3. These will serve you well during your 6-month placement (INTRA) in Year 3.

In Year 4, you have a choice between focusing on the sport or health aspects of the course. There is also a major research project and group projects, which will help you combine your knowledge of the theoretical and practical areas of sport and exercise.

### Additional Information

Further study will allow specialisation in clinical exercise, strength and conditioning, performance and movement analysis, nutrition, athletic therapy, physiotherapy, coaching and education and sport psychology.

# BSc in Athletic Therapy and Training

## Prevent, treat and rehabilitate injuries in sport and physical activity

### Why DCU?

---

- Specialises in management of musculoskeletal injury in sporting and non-sporting groups
- Emphasis on pitch-side skills including initial injury assessment, emergency care and end stage sport-specific rehabilitation
- Intensive training in the development of consultation, interpersonal and clinical skills
- Extensive practical experience through placement with sports teams, student-led musculoskeletal clinics and rehabilitation clinics, plus an international placement option in Year 4
- Degree accredited by Athletic Rehabilitation Therapy Ireland (ARTI), the Irish governing body for Certified Athletic Therapists

### About You

---

You should be passionate about looking after the health of athletes and the general public, specifically in the area of musculoskeletal health. It is not necessary to be physically active yourself, but an interest in sport or physical activity is essential.

### Additional Requirements

---

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of O4 or H6 in Mathematics PLUS minimum of O4 or H6 in one of Physics, Chemistry, Biology, Physics with Chemistry, Agricultural Science.

### Understanding: Athletic Therapy and Training

---

We all know that physical activity is a necessary and important part of daily life. Unfortunately, injuries – musculoskeletal injuries in particular – are incurred by people during physical activity in sport, leisure and work. An Athletic Therapist and Trainer (ATT) is an important part of the healthcare profession, who specialises in the prevention, assessment, treatment and rehabilitation of musculoskeletal injuries. Such injuries can occur at all ages and standards of sporting ability and among all population types (including, for example, people with disabilities).

We want you to qualify with excellent medical knowledge, clinical skills, communication skills, confidence, problem-solving skills and extensive practical experience. Importantly, you should also develop a profound respect for patients and a highly professional approach when dealing with them.

### How does an ATT differ from a physiotherapist?

Physiotherapy is a broad-based healthcare profession that not only addresses musculoskeletal care of the physically active but also deals with a number of diverse medical fields, including oncology, obstetrics, gynaecology, paediatrics, rheumatology, respiratory and neurological illnesses and burn injuries.

In contrast, Athletic Therapy and Training specialises in musculoskeletal injuries related to physical activity. Such specialisation allows students of Athletic Therapy and Training to examine this area in much greater detail than a student of physiotherapy.

### Course Structure

---

Year 1 begins with anatomy and the basic sciences, giving you an understanding of the pathophysiology of injury. You will also study the theory and practice that underpin physical conditioning to prevent and rehabilitate injury, and enhance health and performance.

In Year 2, you will start to learn how to assess, treat and rehabilitate injuries and further develop the theory and practice of training. You will also undertake First Aid and Emergency Care to enable you to provide pitch-side assistance in various sports. In addition, you will start the clinical modules that will continue each semester for the remainder of the course. These modules will provide you with clinical field experience as well as allow you to assist in the student-led sports injury clinic based within the School.

Year 3 will see you expand your knowledge, as well as learn in-depth principles of rehabilitation, therapeutic modalities and soft tissue therapies.

In the first half of Year 4, you will gain 3 to 5-months experience working full-time in a clinical setting in Ireland or abroad (including athletic therapy and training facilities in American universities). You also have the opportunity to gain Cardiac and Emergency First Response certification with the Pre-Hospital Emergency Care Council of Ireland (PHECC). The latter half of Year 4 includes a major research project. At all times, how you communicate and work professionally with patients will be emphasised.

# BSc in Physical Education with Biology

## Physical education: make it an essential part of our children's education and development

### Why DCU?

- A unique opportunity to study the human body and its role in physical activity, sport and health
- A mixture of applied physical education classes, laboratories, lectures, tutorials and seminars
- A course supported by state-of-the-art teaching and physiology, biomechanics and psychology laboratories
- A small number of places reserved for elite sportspeople
- Relatively small classes that allow for individual attention from high-quality staff

### About You

To succeed on this course you will need:

- A passion for sport, exercise and science
- Evidence of past participation in, enjoyment of and enthusiasm for involvement in sport and exercise
- A willingness to teach others and to help them learn
- An analytical mind, particularly in relation to the body and how it works
- An interest in applying scientific principles to the body and how it works
- An enthusiasm for learning and understanding how others learn and develop through good teaching

### Additional Requirements

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of O4 or H6 in Mathematics PLUS minimum of O4 or H6 in one of Physics, Chemistry, Biology, Physics with Chemistry, Agricultural Science.

### Garda Vetting

Garda vetting has been introduced for students who have unsupervised access to children and vulnerable adults as part of their studies at DCU. You must successfully pass the Garda vetting process in order to complete the process of registration.

### Understanding: Physical Education with Biology

Physical education has an important influence on the long-term health of our children. As such, it is an integral part of the education process, one that promotes the physical, social, emotional and intellectual development of a child, as well as their attitude to activity, learning and each other. This is embraced through involvement in games, health-related fitness, aquatics, gymnastics, dance, athletics and outdoor adventure education. The BSc in Physical Education with Biology is a modern course developed to meet the changing needs of young people today in relation to physical activity, exercise and sport. You will be qualified to teach PE to Leaving Certificate level.

### Biology and Junior Cycle Science

Biology is fundamental to the knowledge and understanding of the body and how it works and is a natural subject to combine with physical education. As a graduate, you will be qualified to teach general science to Junior Certificate level and Biology to Leaving Certificate level.

Both the PE and Biology elements of this course are approved by the Teaching Council of Ireland for registration as a secondary school teacher.

### Course Structure

This course involves three strands – Physical Education, Biology and Education Studies.

#### Physical Education

The physical education element of the course has theoretical and practical aspects. The theoretical part involves the academic study of human movement through subjects like psychology, biomechanics (the science of movement) and sociology. The practical elements will enhance your teaching skills by engaging you in a range of competitive, aesthetic, adventure, aquatic and artistic activities.

#### Biology

You will learn the core elements of the biology curriculum, including mammalian anatomy and physiology, cell biology, genetics, health and junior cycle physics and chemistry. These are enhanced through exposure to laboratory work, ensuring that your theoretical knowledge is put into practice.

In Year 2, you will cover elements of the junior cycle physics and chemistry syllabi in an innovative and stimulating way.

Years 3 and 4 allow you to specialise in sport and exercise physiology from a theoretical and practical perspective..

#### Education Studies

This part of the course integrates educational theory and practice through 'coaching rather than teaching'. This involves group work, reflective diaries, online reporting and reflection, case studies and other problem-based learning approached. We aim to help you gain the skills, knowledge and mind-set necessary to teaching in a changing environment.

### Additional Information

This four-year course is recognised by the Teaching Council for teaching PE and Biology (see page 258 for further details).

### Contact Details

E [studenthelp@dcu.ie](mailto:studenthelp@dcu.ie)

### Visit Us Online

[dcu.ie/DC205](http://dcu.ie/DC205)

### School Placement

To put all of this into practice and to provide you with invaluable experience, you will be placed in schools during Years 2, 3 and 4. This gives you an opportunity to explore and clarify many of the key issues you will encounter as a teacher.

### What Will I Study?

#### Year 1

Applied Studies in Athletics and Games | History and Sociology in PE and School Sports | Cell Biology and Biochemistry | Physiology | Teaching HRA in PE | Motor Control and Learning | Microteaching and Teaching Preparation | Microbiology and Genetics | Practical Biology | Studies in Aesthetic Activities | Chemistry

#### Year 2

Applied Studies in Games, Aquatics and Gymnastics | Teaching and Assessing Junior Cycle Science | Microteaching and School Placement | School Placement | Athletics and Health Related Fitness | Physics | Irish Education: History, Structure and Development | Physical Activity, Psychology and Motor Development | Programme Decisions and Policy in PE and Sports | Chemistry Laboratory

### What Our Current Students Say

BSc Physical Education with Biology is an amazing, hands-on course that provides a broad insight into science education, physical education and post-primary education. Practical teaching sessions, laboratory experiments, various physical activities and experience within various school environments provides students with the necessary skills to become experienced and effective post-primary teachers. This course incorporates a broad range of theoretical and practical elements to enhance your understanding of biology, science and physical education. If you have a passion for sport, science and education this course will equip you with skills necessary to become an effective post-primary physical education, biology and science teacher.

*Sarah Jane Brady, BSc in Physical Education with Biology*

#### Year 3

Applied Study in Dance | Inclusion and Adaptation in PE and Physical Activity | Mammalian and Anatomy Physiology | Philosophical Perspectives on Education | Bioscience and Society | Plant Science | Cell and Molecular Physiology | Pollution and Biosphere | Developmental Psychology and Individual Differences | Teaching Strategies and Professional Preparation | Teaching and Learning in PE | School Placement | Project

#### Year 4

Sport and Exercise Physiology | Adventure Activities | Teaching and Assessing Senior Cycle Biology | Curriculum Development and Evaluation | Access, Disadvantage and Equality | Preparation and Professional Development | School Placement | Research Methods | Project

# BSc in Physical Education with Mathematics

## Physical education: make it an essential part of our children's education and development

### Why DCU?

- A unique opportunity to study the human body and its role in physical activity, sport and health
- A mixture of applied physical education classes, laboratories, lectures, tutorials and seminars
- A course supported by state-of-the-art teaching and physiology, biomechanics and psychology laboratories
- A small number of places reserved for elite sportspeople
- Relatively small classes that allow for individual attention from high-quality staff

### About You

To succeed on this course you will need:

- A passion for sport and exercise
- Evidence of past participation in, enjoyment of and enthusiasm for involvement in sport and exercise
- An analytical mind with a passion for mathematics
- A willingness to teach others and to help them learn
- An enthusiasm for learning and understanding how others learn and develop through good teaching

### Additional Requirements

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of O1 or H6 in Mathematics PLUS minimum of O4 or H6 in one of Physics, Chemistry, Biology, Physics with Chemistry, Agricultural Science.

### Garda Vetting

Garda vetting has been introduced for students who have unsupervised access to children and vulnerable adults as part of their studies at DCU. You must successfully pass the Garda vetting process in order to complete the process of registration.

### Understanding: Physical Education with Mathematics

Physical education has an important influence on the long-term health of our children. As such, it is an integral part of the education process, one that promotes the physical, social, emotional and intellectual development of a child, as well as their attitude to activity, learning and each other. This is embraced through involvement in games, health-related fitness, aquatics, gymnastics, dance, athletics and outdoor adventure education. The BSc in Physical Education with Biology is a modern course developed to meet the changing needs of young people today in relation to physical activity, exercise and sport. You will be qualified to teach PE to Leaving Certificate level.

### Mathematics

Mathematics is key to understanding the modern world, being necessary in areas as diverse as international financial systems and the use of statistics in sport. This makes the job of teaching mathematics hugely important. As a graduate, you will be qualified to teach PE and Mathematics to Leaving Certificate level. Both the PE and Mathematics elements of this course have approval from the Teaching Council for registration as a secondary teacher.

This is a modern course developed to meet the changing needs of young people today in relation to physical activity, exercise and sport.

### Course Structure

This course involves three strands – Physical Education, Mathematics and Education Studies.

### Physical Education

The physical education element of the course has theoretical and practical aspects. The theoretical part involves the academic study of human movement through subjects like psychology, biomechanics (the science of movement) and sociology. The practical elements will enhance your teaching skills by engaging you in a range of competitive, aesthetic, adventure, aquatic and artistic activities.

### Mathematics

You will learn the core elements of the mathematics curriculum, including mathematics for the physical sciences, linear mathematics, calculus, differential equations, numerical methods and abstract algebra. In addition, you will complete a number of modules focused on how to teach mathematics in second-level schools.

### Education Studies

This part of the course integrates educational theory and practice through 'coaching rather than teaching'. This involves group work, reflective diaries, online reporting and reflection, case studies and other problem-based learning approaches. We aim to help you gain the skills, knowledge and mind-set necessary to teach in a changing environment.

### School Placement

To put all of this into practice and to provide you with invaluable experience, you will be placed in schools during Years 2, 3 and 4. This gives you an opportunity to explore and clarify many of the key issues that will define you as a teacher.

### Additional Information

This four-year course is recognised by the Teaching Council for teaching PE and Mathematics (see page 258 for further details).

## What Our Current Students Say

As a mature student I am truly enjoying the BSc in Physical Education with Mathematics course thus far. The course provides an opportunity to help you grow as a teacher, develop new skills and build confidence within the classroom (sports hall). The small class sizes allow you to create a unique rapport with your fellow students and lecturers. I look forward to the next few years especially the teaching placement episodes. Returning to University has been one of my best decisions, to follow my dream to become a PE and maths teacher.

*Gary Quinn, BSc in Physical Education with Mathematics*

## Future Careers

# BSc in Science Education

## Be part of the next generation of inspiring second level science teachers

### Why DCU?

- Graduates obtain an Honours teaching qualification recognised by the Teaching Council – a direct route into post-primary teaching
- Teacher education modules run concurrently with science, mathematics and technology modules, plus school-based placements in Years 3 and 4
- You will be recognised to teach two Leaving Certificate subjects - choose from chemistry, physics and mathematics
- Strong STEM background for alternative careers

### About You

If you are enthusiastic about science and mathematics and want to share this enthusiasm with young people, then this course is the place to start.

### Additional Requirements

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of O1 or H6 in Mathematics PLUS minimum of O4 or H6 in one of Physics, Chemistry, Biology, Physics with Chemistry, Agricultural Science.

### Garda Vetting

Garda vetting has been introduced for students who have unsupervised access to children and vulnerable adults as part of their studies at DCU. You must successfully pass the Garda vetting process in order to complete the process of registration.

### Understanding: Science Education

Mathematics, science and technology play vital roles in our day-to-day lives, so having an understanding of these subjects is important for everyone. As a science/mathematics teacher, you will develop your students' understanding of the world in which they live and you will educate future generations of business people, scientists, engineers and technologists. You will help young minds develop and you will prepare them for an increasingly technological and information-based future.

You will also play a vital role in Ireland's economic recovery by teaching subjects that will be central to developing a scientifically, mathematically, and technologically literate citizenry and a sustainable and successful future for the country. Science Education will give you a teaching qualification with a specialisation in two of chemistry, physics and mathematics, and strong elements of information and communication technology (ICT).

Teachers with this degree are highly skilled and motivated and are highly sought after in the second-level education system.

### Course Structure

First year students take modules in biology as well as in physics, chemistry and mathematics. In Year 1, most science and mathematics modules will be taken in common with other first-year science students. There are also further specialist modules in mathematics and education.

Years 2 to 4 build on this content and integrate science and mathematics with education. At the beginning of Year 2, you choose two subjects in which to specialise (chemistry/physics, mathematics/physics or chemistry/mathematics) and then continue with your two chosen subjects through Years 2 to 4. You will be qualified to teach both of your two speciality subjects to Higher Leaving Certificate level. In Years 3 and 4, you will also complete an

action-based education research project and projects linking your chosen subjects (chemistry, physics, mathematics) to the teaching of those subjects.

You will study a variety of topics in education over the duration of the course, from the history, philosophy and psychology of education to curriculum development and digital learning. There will be a particular focus on the teaching of science and mathematics, not only in the modules dedicated to teaching preparation but also embedded within a number of chemistry, physics and mathematics modules.

### School Placement

Over the four years of the course you will have various opportunities to gain valuable teaching experience in a range of settings such as micro-teaching, peer-teaching, observation in schools and school-based teaching. These will allow you to practise and develop the teaching skills you have learnt in the course. By engaging in micro-teaching in Years 1 and 2, you will design, plan, teach and receive feedback on micro-lessons. In Year 3, you will spend eight weeks in post-primary schools taking classes up to Junior Certificate level. Finally, all of the second semester in Year 4 is spent taking both junior and senior cycle classes in your chosen subjects.

You will enjoy strong support from DCU throughout your teaching assignments, which makes it easier to go from being a student to professional teaching.

### Additional Information

Graduates of this four-year undergraduate course are recognised by the Teaching Council as qualified to teach two Leaving Certificate subjects (choose from chemistry, physics and mathematics). (see page 258 for further details).

## What Our Graduates Say

Personally, I love the way the subjects and modules we study for this course are often tailored specifically for the purpose of teaching science and maths. Not only do we gain new analytical skills and scientific knowledge but we also develop pedagogical teaching methods to use in the classroom. The blocks of work placement we do as a part of this course allowed me to become comfortable and confident in my abilities as a teacher and the coordinators and lecturers in DCU were a great support to me in arranging and helping me get ready for these placements. This teaching experience was invaluable to me as I learned so much about myself and the career I am pursuing. I am now going into third year and feel more confident than ever that this is the course for me.

*Mary Walsh, BSc in Science Education*

## Future Careers

- Teaching
- Technical Training in Science-based Industries

# BSc in Psychology

## Applying science to the study of the human mind and behaviour: how we think, act, react and interact

### Why DCU?

- A world-class course, accredited by the Psychological Society of Ireland (PSI)
- Immersion in psychology as the main focus of study, with innovative teaching methodologies
- Small class sizes that allow for individual attention, delivered by a dynamic interdisciplinary, research-active lecturing team
- Student-centred learning philosophy that places major emphasis on gaining digital and transferable skills
- High-quality research laboratories and research skills training supports

### About You

You should possess very good verbal, written and interpersonal skills and be flexible, hard-working and creative, with an enquiring mind and the ability to think critically.

### Additional Requirements

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of O4 or H6 in Mathematics.

### Understanding: Psychology

Psychology is concerned with all aspects of behaviour, including the thoughts, feelings and motivations underlying such behaviour. While psychologists differ in their interests within the field of psychology and in the type of work they do, they all approach the study of psychology in a scientific manner.

### Course Structure

The four-year BSc in Psychology course is structured to cover introductory to advanced levels of psychology across the five core pillars of undergraduate training: developmental and lifespan psychology; biological psychology and neuropsychology; social psychology; cognitive psychology and the psychology of individual differences.

A core focus running throughout the course is research literacy supported by a combination of practical and online laboratory activities.

Thanks to our extensive networks with partner hospitals/clinics, schools, industry and researchers, we are the first to have established credited undergraduate psychology internships - our Year 3 work placements (INTRA) - in various fields including clinical and behavioural neuroscience; organisational and corporate psychology and applied behaviour analysis.

Our course covers an exciting range of applied subjects (e.g. Health Psychology, Educational Psychology, Organisational Psychology, Clinical Neuropsychology and Sports Psychology) and offers cutting-edge options (e.g. Disability and Illness, Law and Neuroscience, Crime and Psychology, Applied Behaviour Analysis and Psychopharmacology).

### Additional Information

Students benefit from a personal tutor system and regular feedback sessions. Students can also avail of online support via LOOP - an online learning environment where academic peer fora may be established with support and advice from academic staff.

The BSc in Psychology is accredited by the Psychological Society of Ireland. This ensures that the course meets the highest standards for undergraduate pre-professional training in psychology.

**Additional Information**

The BSc in Psychology is accredited by the Psychological Society of Ireland.

**What Our Current Students Say**

Psychology is the scientific study of mind and behaviour. As a result, the study of psychology casts a wide net! From business to biology, there are so many strands of research and career paths for students to pursue. My experience is that DCU ensures this range is taught to students in a practical environment, allowing for educated career choices. At times, this course can be challenging, but learning about how to make a real difference in the lives of the people around you makes the challenge worth it. I would wholeheartedly recommend the psychology course at DCU for those who are curious about those around them.

*Calm Flood, BSc in Psychology*

# BSc in Health and Society

## From cellular to global: taking action to achieve positive health outcomes

### Why DCU?

---

- You will explore health issues from multiple perspectives – biological, social, political, ethical, psychological and philosophical
- A strong emphasis is placed on research inquiry into, and action on, key contemporary health issues
- There is potential to focus on health issues of personal relevance and interest to you
- You will have opportunities for engagement in research projects and campaigns locally, nationally and globally
- You will work with a dynamic lecturing team that has diverse health-related expertise and experience

### About You

---

You should be interested in health issues, and especially in the idea of health inquiry and action: in doing something to achieve positive health outcomes. You should be keen to work with others, ready to challenge and to be challenged, and willing to work hard.

### Additional Requirements

---

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of O6 or H7 in Mathematics PLUS minimum of O6 or H7 in one of Physics, Chemistry, Biology, Physics with Chemistry, Agricultural Science.

### Understanding: Health and Society

---

Health needs to be understood in a variety of ways and with regard to social contexts. To develop this understanding, we explore the following issues:

- What kind of bodies are we supposed to have?
- How does this relate to the society in which we live?
- What are the biological dimensions of health and illness?
- What determines the distribution of health within societies?
- What are the varying forms of health action?
- How is health influenced at various individual, community, societal and global?
- What kinds of personal, social, political and ethical issues are relevant to health matters?

If you think these questions are interesting and that you would like to learn how to actively inquire into and engage in research projects or campaigns, this course may be of interest to you.

### Course Structure

---

You will undertake a range of modules, including modules in which you will:

- Explore a number of perspectives on health – biological, social, political, ethical, psychological
- Learn about and do health research
- Actively engage in research projects and campaigns
- Develop your own ‘healthy qualities’
- Examine particular health-related issues such as ‘drugs in society’, ‘nutrition and health’ and ‘trauma and abuse in society’

As part of the course, you will have opportunities to engage in activities and project work that you find personally relevant and interesting. With a particular emphasis on health inquiry and action in the everyday world, you will participate in a voluntary community project in Year 1, design and implement a small health campaign (working with fellow students) in Year 2, and conduct a Health and Society Research Project as a final dissertation in Year 3. This final year project gives students the opportunity to study, plan and research an area of health which is of specific interest to you.

## What Our Current Students Say

Health and Society is a great course for students who want to learn about health from a variety of different aspects. In the various modules offered, we look at health from a social, political, ethical, psychological and biological context. Upon completion of this degree, the student is very well equipped for a career in health promotion. In addition to this, many graduates pursue further studies in health care roles such as physiotherapy, occupational therapy, speech and language therapy, dietetics and medicine. This is a great course for anyone with a keen interest and passion for health.

*Luke McCaffrey, BSc in Health and Society*

## Future Careers

- Community Development
- Voluntary Sector
- Advocacy
- Further Study

## In These Areas

- Further study can lead to: Speech and Language Therapy or Physiotherapy or Occupational Therapy
- Health Promotion
- Public Health
- Global Health

Look online (website details at top of page) for more information about future careers in your chosen field.

# BSc in Nursing

## Ensure individuals and communities enjoy the best health possible

### Why DCU?

- Experienced, research-active lectures
- Students taught on campus and within dynamic clinical learning environments
- Innovative teaching and learning methodologies
- Partners with some of Dublin's busiest and most prestigious teaching hospitals and services
- State-of-the-art clinical education facilities on campus

### About You

If you are a caring individual who enjoys helping and supporting people and feel you can contribute to the wellbeing of others with intelligence, compassion and enthusiasm, then you will do well in nursing. Nurses work in a variety of settings including hospitals, community residential and day settings and peoples homes.

### Additional Requirements

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of O6 or H7 in Mathematics PLUS minimum of O6 or H7 in one of Physics, Chemistry, Biology, Physics with Chemistry, Agricultural Science.

### Understanding: Nursing

Nursing is the professional practice of protection and promotion of health and independence, the prevention of illness, the facilitation of healing and the alleviation of suffering through diagnosis and empirical treatment modalities. Nursing involves acting as an advocate for those in their care and assisting individuals, families and groups in a professional, caring and empathic manner.

The degree aims to provide optimum clinical and academic learning environments that stimulate and enable students to become compassionate, competent, safe, critically aware and reflective nursing graduates.

The course recognises the multidisciplinary nature of healthcare and the national and global dimensions of contemporary nursing practice.

Academic learning and learning in practice go hand-in-hand and you will be encouraged to reflect on your experiences as you progress through the course.

### Garda Vetting

Garda vetting is a requirement for all nursing students, who throughout their training have supervised access to vulnerable population groups. You must successfully pass the Garda vetting process in order to complete the process of registration.

### Mature Entry

Mature candidates are assessed by the Nursing Careers Centre (NCC) of An Bord Altranais agus Cnáimhseachais na hÉireann (Nursing and Midwifery Board of Ireland, NMBI).

For details please see page 236.

### Course Structure

The BSc in Nursing provides you with the pre-registration education you will need to qualify with one of the following awards:

- BSc in Nursing (General)
- BSc in Nursing (Children's and General)
- BSc in Nursing (Intellectual Disability)
- BSc in Nursing (Mental Health)

You will also be eligible for professional registration with An Bord Altranais agus Cnáimhseachais na hÉireann (Nursing and Midwifery Board of Ireland, NMBI).

The focus of the degree is on the fundamental issues in nursing practice. As disciplines such as psychology, sociology, philosophy, law, pharmacology and microbiology are an important part of the practice and profession of nursing, they are also part of your degree course. During the degree you will spend periods of time in your chosen area of nursing to practice and develop nursing skills in healthcare settings.

In Year 4 you will spend 36-weeks on an internship in your allocated hospital/health service provider. During this time, you will gain and consolidate further practice-based learning while also taking formal clinical assessments.

### What Will I Study?

Each year you will have the opportunity to practise nursing in the clinical setting in your linked healthcare service. These are called 'practice placements'. During Years 3 and 4 longer periods are spent on these practice placements. In Years 2 and 3 you will undertake specialist modules which relate to your specific chosen nursing discipline. The following gives an outline of the other academic elements of the course.

### Clinical Placements

Each year you will have the opportunity to practice nursing in the clinical setting which are referred to as 'practice placements'. In Year 1, these placements will be in your particular nursing discipline, e.g. intellectual disability, mental health/psychiatry, general or general and paediatrics. As the course progresses, you will spend longer periods on these practice placements. In Years 2 and 3 you will have clinical placements in nursing disciplines other than your particular discipline in addition to placements in your chosen nursing discipline. In Year 4 you will spend 36-weeks on an internship in your allocated hospital/health service provider as a paid employee of that service. During this time, you will gain and consolidate further practice-based learning under the support and supervision of qualified nurses. Clinical competencies are assessed on all practice placements.

### Additional Information

The Irish Nursing Qualification is recognised internationally and is a highly sought after qualification, so you will have the opportunity to travel and work abroad.

# BSc in Nursing

## Ensure individuals and communities enjoy the best health possible

### General Nursing DC215

---

The general nursing course is offered in partnership with DCU and our partner services, Beaumont Hospital and Connolly Hospital Blanchardstown. General nurses promote wellness, health education and self-management to empower people to achieve their maximum health potential across the health continuum and lifespan in ever evolving health care settings. Fundamental to general nursing practice is an empathic and collaborative relationship between the nurse and the person that is based on trust, understanding, compassion, support and serves to empower the person to make shared decisions regarding his/her care.

Throughout the 4 year course you will have excellent opportunities to develop knowledge and skills relevant to general nursing practice, including independent and critical thinking and problem-solving. On successful completion of the BSc (Hons) in General Nursing, you will be eligible to apply to register with An Bord Altranis agus Cnáimhseachais na hÉireann (Nursing and Midwifery Board of Ireland, NMBI) as a Registered General Nurse. This degree course offers an opportunity to make a difference and a career with excellent employment prospects both nationally and internationally.

### Mental Health Nursing DC216

---

This nursing course aims to provide you with both mental health nursing skills, theory and knowledge to work with and support those experiencing mental health challenges. The course content will include nursing interventions for mental health care, learning about the interventions/approaches used. Clinical placements will be in a variety of settings including acute mental health units, community nurse teams, hostels, day hospitals and specialist services.

During the 4 year course you will develop therapeutic interpersonal nursing skills and self-awareness to effectively work within mental health services. On successful completion of the BSc in Mental Health Nursing, you will be eligible to apply to register with An Bord Altranis agus Cnáimhseachais na hÉireann (Nursing and Midwifery Board of Ireland, NMBI) as a Registered Mental Health Nurse.

### Intellectual Disability Nursing DC217

---

The intellectual disability nurse is a professional, who works autonomously and collaboratively to provide person-centred care and support to persons of all ages, with a variety of abilities and capabilities. The nurse employs therapeutic interventions and skilled interpersonal approaches to provide this care across numerous states of health and wellbeing and promoting wellness. The values and skills inherent in the nursing course enables the nurse to support and empower people with an intellectual disability across their lifespan, building relationships with the person and their families grounded in human rights, inclusion, advocacy and support to live as independent a life as possible. On successful completion of the BSc (Hons) in Intellectual Disability Nursing, you will be eligible to apply to register with An Bord Altranis agus Cnáimhseachais na hÉireann (Nursing and Midwifery Board of Ireland, NMBI) as a Registered Intellectual Disability Nurse.

### Children's and General Nursing (integrated) DC218

---

The role of the children's and general nurse is to foster the health and wellbeing of individuals across the lifespan, taking into account their physical, psychological, emotional, social and spiritual needs. This four-and-a-half year full-time degree course is offered in partnership with our affiliated partner hospitals from both the public and private healthcare sectors. The course content will include nursing interventions for children's and general nursing practice. Throughout the course you will have excellent opportunities to develop your knowledge and skills relevant to children's and general nursing practice, including independent and critical thinking and problem-solving. On successful completion of the BSc (Hons) in Children's and General Nursing, you can apply to register as both a children's and a general nurse with An Bord Altranis agus Cnáimhseachais na hÉireann (Nursing and Midwifery Board of Ireland, NMBI). This degree course offers you a chance to make a difference and offers a career with excellent employment prospects.

## Course Requirements

CAO CODE	COURSE TITLE	DURATION	POINTS
DC207	<b>BSc in Psychology and Mathematics</b>	4 years	521

### SUBJECTS REQUIRED

Leaving Certificate	Minimum of H3 in Mathematics
GCE A Level	GCE A Level B or GCE AS Level grade B Mathematics

### OTHER ENTRY PATHS

QQI/FET Level 5	No entry path.
Transfer Applications	No entry path.

CAO CODE	COURSE TITLE	DURATION	POINTS
DC210	<b>BSc in Psychology and Disruptive Technologies</b>	4 years	506

### SUBJECTS REQUIRED

Leaving Certificate	Minimum of O4 or H6 in Mathematics
GCE A Level	GCE A Level D or GCE AS Level C or GCSE C Mathematics

### OTHER ENTRY PATHS

QQI/FET Level 5	No entry path.
Transfer Applications	No entry path.

CAO CODE	COURSE TITLE	DURATION	POINTS
DC127	<b>Common Entry into Actuarial and Financial Mathematics</b>	First 2 years only	541

### SUBJECTS REQUIRED

Leaving Certificate	Minimum of H3 in Mathematics
GCE A Level	GCE A Level B Mathematics

### OTHER ENTRY PATHS

QQI/FET Level 5	For details of QQI/FET requirements and relevant codes please see <a href="http://cao.ie/index.php?page=fetac_search">cao.ie/index.php?page=fetac_search</a> . Simply enter the DC code for the course you are interested in or if you are not sure of the code enter DC in the Select by Institution option, then click on Go.
Transfer Applications	Applications are welcomed from students who wish to transfer from another Level 8 course, providing that they have achieved the requisite points and fulfil the requirements of the course.

CAO CODE	COURSE TITLE	DURATION	POINTS
DC126	<b>BSc in Actuarial Mathematics</b>	4 years	577*
<b>SUBJECTS REQUIRED</b>			
Leaving Certificate	Minimum of H3 in Mathematics		
GCE A Level	GCE A Level B Mathematics		
<b>OTHER ENTRY PATHS</b>			
QQI/FET Level 5	No entry path.		
Transfer Applications	Applications are welcomed from students who wish to transfer from another Level 8 course, providing that they have achieved the requisite points and fulfil the requirements of the course. Due to the special nature of the Actuarial Mathematics course, candidates will usually only be considered for entry into Year 1. Transfer students may be exempt from certain modules.		

CAO CODE	COURSE TITLE	DURATION	POINTS
DC180	<b>Biological Sciences General Entry</b>	First year only	530
DC181	<b>BSc in Biotechnology</b>	4 years	530
<b>SUBJECTS REQUIRED</b>			
Leaving Certificate	Minimum of O3 or H6 in Mathematics and minimum of O3 or H5 in one of Physics, Chemistry, Biology, Physics with Chemistry, Agricultural Science or Computer Science		
GCE A Level	GCE A Level D or GCE AS Level C or GCSE B Mathematics and GCE A Level D or GCE AS Level C or GCSE B in one of Physics, Chemistry , Biology, Physics with Chemistry or Agricultural Science		
<b>OTHER ENTRY PATHS</b>			
QQI/FET Level 5	For details of QQI/FET requirements and relevant codes please see <a href="http://cao.ie/index.php?page=fetac_search">cao.ie/index.php?page=fetac_search</a> . Simply enter the DC code for the course you are interested in or if you are not sure of the code enter DC in the Select by Institution option, then click on Go.		
Transfer Applications	Holders of Higher Certificates/National Certificates or Bachelor (Ordinary) Degree/National Diplomas with Merit or Distinction may be admitted into Year 2. Because of the special nature of the Year 2 of the course, which has Process Engineering as a major component, candidates cannot be considered for direct entry into Year 3. Suitable candidates will be required to attend for interview.		

CAO CODE	COURSE TITLE	DURATION	POINTS
DC168	<b>BSc in Genetics and Cell Biology</b>	4 years	543*
<b>SUBJECTS REQUIRED</b>			
Leaving Certificate	Minimum of O3 or H6 in Mathematics and minimum of O3 or H5 in one of Physics, Chemistry, Biology, Physics with Chemistry, Agricultural Science or Computer Science		
GCE A Level	GCE A Level D or GCE AS Level C or GCSE B Mathematics and GCE A Level D or GCE AS Level C or GCSE B in one of Physics, Chemistry , Biology, Physics with Chemistry or Agricultural Science

### Additional Special Course Requirements

---

#### **BSc in Nursing (Four year/Four-and-a-half year course)**

- All candidates applying for the BSc in Nursing (Four year/Four-and-a-half-year course) must apply through the Central Applications Office (CAO) by 1 February regardless of their status as EU or Non-EU, or their eligibility to be considered as a mature applicant.
- There are no longer separate CAO mature nursing codes. All applicants should use the normal nursing codes DC215, DC216, DC217, DC218.
- Mature nursing candidates are assessed by the Nursing Careers Centre (NCC) of An Bord Altranasi agus Cnaimhseachais na hÉireann (Nursing and Midwifery Board of Ireland, NMBI). For details please visit: [nursingcareers.ie](http://nursingcareers.ie) or email: [careersinformation@NMBI.ie](mailto:careersinformation@NMBI.ie) to request a copy of their nursing and careers booklet. All candidates are required to apply through CAO.
- Having applied through the CAO before 1 February, mature nursing applicants must also register and apply through the Public Appointments Service (PAS) website, [publicjobs.ie](http://publicjobs.ie). PAS manage the written assessment of applicants on behalf of the Nursing and Midwifery Board of Ireland. Mature applicants are then ranked based on their score in the NMBI assessment.

#### **To sit the test you must complete the following two steps:**

1. Register with [www.publicjobs.ie](http://www.publicjobs.ie) by creating a profile (if you have not already done so). Do not confuse registering (creating a profile) with submitting an application form. Remember to note down your login and password details as you will require these during the assessment process to access your messages.
  2. Applicants will be required to complete and submit an online application. Application dates can be found at [www.nmbi.ie](http://www.nmbi.ie) and confirmation of application will be confirmed by PAS within 24 hours of submission.
- For full details of the application submission dates and the test process, go to [www.nmbi.ie](http://www.nmbi.ie) or phone the NMBI at 01-6398528.

SOCIAL SCIENCES

# BSc in Global Challenges

## Learning rooted in real challenges

### Why DCU?

- Classes will be smaller than is typical and only twenty-five ambitious students will be admitted in Year 1
- Collaborative work in class and for assessment purposes will be emphasised
- Address real world challenges within our networks in the public, private, and non-profit sectors
- Industry placement in Year 3 allows you gain valuable work experience (INTRA)
- Project-based learning working in teams to tackle local and global issues
- Develop transversal and collaborative skills to prepare you for your future career

### About You

If you are interested in global challenges and seeing how technology and science can help tackle these then this is the course for you. This course is aimed at curious ambitious learners who want to make informed, creative, and practical changes to the world for the betterment of local and global societies.

You will study topics such as climate change, politics, international development, data analytics, artificial intelligence, public policy, security and peace studies and ethics. This course brings together social science with technology in order to create solutions that are technically feasible, while taking into account societal, political, economic factors. This involves an understanding of the interaction between humans and their environment, cultures and values and also a technical knowledge of current and emerging digital trends.

### Additional Requirements

In addition to the general entry requirements for admission to the University (see pages 232), the following entry requirements apply: O2 or H5 in Mathematics.

### Understanding: Global Challenges

DCU's new BSc in Global Challenges is for people who want to challenge themselves to take on the world's problems. This new and unique course integrates social science and technology studies through challenge-based learning.

To solve the challenges in an ever-changing world, we need creative problem solvers who are socially engaged and passionate about social and technological innovation. The programme leverages the unique skill sets of staff across the DCU Faculty of Humanities and Social Sciences and the Faculty of Engineering and Computing to promote an innovative, interdisciplinary, and integrated team-delivered degree course that recognises the need to creatively address the challenges of the modern world.

As a result, graduates of this course will display a distinctively DCU combination of technical and social knowledge, skills, and the ability to apply these to real-world problems. Graduates will be able to demonstrate the ability to convert ideas from concepts into tangible solutions and adapt these to an ever changing world.

This degree will equip you to develop socially effective technological solutions to real problems and you will have the skills to work across many disciplines, crossing traditional boundaries in solving complex real world problems whilst gaining the ability to plan and manage complex projects involving multiple stakeholders. This will be based on an understanding of the full societal, economic and political impacts of implementing novel technological solutions.

### Course Structure

In each year of the course your modules will cover fundamental technical knowledge of electronic engineering, computing science and data science, and also the fundamental theories of social science, policy and politics, with an international context of these topics. Each year there will be an interdisciplinary project related to a global challenge. This project will involve creative problems solving by proposing technological solutions while taking into account the social implications of the proposed solutions. INTRA work placement in Year 3 will provide you with a chance to work in a real work environment in private or public sectors. Assessment each year will be mainly project based including simulations and design challenges for a more engaging learning experience with close involvement with enterprise partners.

### INTRA

INTRA will provide you with a chance to work in a real world environment giving you a unique opportunity to enhance your CV, increase your employability and experience the relevance of your study. For more information on the INTRA programme at DCU, please visit [dcu.ie/intra](http://dcu.ie/intra)

**Additional Information**

This course will be jointly delivered by the Faculty of Humanities and Social Sciences and the Faculty of Engineering and Computing

# BA in Climate and Environmental Sustainability

## Develop unique skills to tackle climate and environmental issues facing industry and policy makers today

### Why DCU?

- Classes will be smaller than is typical and only twenty ambitious students will be admitted in Year 1
- Collaborative work in class and for assessment purposes will be emphasised
- Engage with environmental and climate issues at a local scale and learn from visiting and engaging with case studies where real-life environmental challenges happen
- Engage with Challenges based on real issues encountered by industry, the public sector and non-profit sector
- Enhance employability skills by developing knowledge across multiple areas related to two of the most important societal issues this century - climate change and environmental sustainability
- Spend a full academic year at a partner university abroad or on a work placement (INTRA)

### About You

You will study modules in climate science, geography, environmental policy and Geographical Information Systems (GIS) and remote sensing. During the course, you will gain analytical, research, teamwork and problem solving skills that will be attractive to a range of employers. You will also engage in a residential field module as an integral part of this course, which provides an opportunity to collect environmental data and engage with environmental and climate issues at a local scale, as well as encouraging learning from seeing real-life challenges. This includes visiting case study sites where environmental change is occurring and examining the main challenges facing Ireland. Some of the issues you can expect to engage with relate to improving water quality, managing biodiversity, and dealing with climate change from both physical and human geography perspectives.

### Additional Requirements

The general entry requirements for admission to the University apply (see page 232)

### Understanding: Climate and Environmental Sustainability

The scale and pace of change caused by humans to all aspects of the environment globally in the last 100 years is so significant that we now threaten our very own existence. Issues such as climate change and biodiversity loss are having extensive environmental, economic and social impacts worldwide. These are issues that already affect current generations and are set to have major implications for future generations.

Through the lens of geographical sciences, this course will develop your skills and knowledge to prepare you for work in climate and environment-related fields. Organisations are also increasingly relying on location intelligence to make decisions and you will gain invaluable skills to learn how to gather and analyse spatial and climate data. You will also engage with such topics as climates and climate change, environmental economics, the evolution of Ireland's physical landscape and sustainable environments and policy. Furthermore, you will have the possibility of studying for a year abroad after Year 2, and can also opt to apply for a year-long INTRA work placement in Year 3. This opportunity provides you with excellent experience and a valuable professional network while still in university.

### Course Structure

The course structure is designed to enhance learning related to climate change and environmental sustainability across multiple disciplines (e.g. Geography, Earth Science, Political Science, Psychology, Sociology, Biology and Physics). Specifically, students will be studying innovative modules such as Biogeography, Historical Climates, Sustainable Food Security, Environmental Change and Human Health, Natural Ecosystem Solutions and complementary modules that are drawn from the Geography offering on other courses. The BA in Climate and Environmental Sustainability is unique in that modules each year will comprise a largely balanced approach to both natural and social science modules related to geography, climate and environmental sustainability.

### Year Abroad

Studying abroad provides a wonderful opportunity to experience the culture of another country and greatly enhances your language skills. Those who meet certain criteria and wish to go abroad will spend Year 3 studying at one of our partner universities. After you complete the year abroad, you will do the final year of your course at DCU.

### INTRA

INTRA will provide you with a chance to work in a real world environment giving you a unique opportunity to enhance your CV, increase your employability and experience the relevance of your study. For more information on the INTRA programme at DCU, please visit [dcu.ie/intra](http://dcu.ie/intra)

### Indicative Content

While content of the course may change over time these modules are indicative of what you will be studying in each year.

### Additional Information

This course will be jointly delivered by the Faculty of Humanities and Social Sciences and the Faculty of Engineering and Computing

# Bachelors of Arts: Joint Honours

## Choose from an exciting range of subjects and shape your world

### Why DCU?

- Be part of a close-knit community where you will feel very much at home
- Discover a large, exciting choice of subjects
- Engage with internationally recognised lecturers in their area of expertise
- Become an independent and creative thinker
- Enjoy the opportunity to study abroad at one of our international partner institutions or undertake paid work placement (INTRA)
- Gain an in-depth knowledge of your chosen subjects and a range of transferable skills

### About You

Ever wanted to know how the world around you has been shaped and how it really works? If you have an interest in today's world and modern society, this course will certainly appeal to you.

### Additional Requirements

In addition to the general entry requirements for admission to the University (see page 232), specific entry requirements apply to certain subject (see page 232).

### Understanding: Bachelor of Arts: Joint Honours

This degree draws on DCU's strengths in Humanities and Social Sciences while letting you choose from a distinctive range of subjects. You will acquire a critical perspective on areas central to contemporary society and you will have the opportunity to develop a high level of competence in an international language or Gaeilge.

The following subjects are offered on the Bachelor of Arts: Joint Honours Degree.

- English
- Gaeilge
- Geography
- History
- Human Development – this subject is offered only on DC009
- International Languages (French, German, Spanish)
- Law
- Media Studies
- Music – this subject is offered only on DC009
- Philosophy – this subject is offered only on DC009
- Politics
- World Religions and Theology

Each subject area provides the opportunity to gain an in-depth knowledge and understanding of a particular academic discipline (see pages 124-133 for an explanation of each subject area).

This degree will prepare you for a variety of careers while also providing a solid foundation for further study at postgraduate level.

### Course Structure

- **English**  
You will study a wide range of literature and become familiar with the vital characteristics and contexts of drama, poetry, film and fiction
- **Gaeilge**  
You will develop and enhance your language skills as well as learning about Irish literature, culture and tradition and a range of modern digital approaches to the study of Gaeilge

### Geography

You will examine human activity, human-environment relations and physical environments at a variety of scales, from local to global

### History

You will explore how human beings conduct themselves, grounded in a close examination of how they have behaved in the past in all parts of the world but with a particular emphasis on Ireland

### Human Development (DC009 only)

You will develop an understanding of human needs and capacities at crucial stages of development through your studies of Psychology, Sociology and Philosophy

### International Languages

(French, German, Spanish)  
You will acquire proficiency in your chosen language and learn about culture, film, literary traditions and intercultural communication

### Law

You will learn about constitutional and criminal law; property and European law; and the law of evidence

### Media Studies

You will learn about communication theory, the history of the media, film theory, and press and public relations and develop a thorough understanding of the role media play in society

### Music (DC009 only)

You will explore a broad range of musicological topics and approaches, and further develop your musicality through performance and composition

### Philosophy (DC009 only)

You will critically consider a range of questions about issues such as truth, beauty, value, knowledge, and the nature of reality. In doing so, you will enhance your skills in clear analysis and rigorous argument

#### Additional Information

Please see page 243 for information on estimated costs and the financial support available if part of your course requires you to study abroad.

#### Contact Details

E [studenthelp@dcu.ie](mailto:studenthelp@dcu.ie)

#### Visit Us Online

[dcu.ie/arts](http://dcu.ie/arts)

#### — Politics

You will learn about Irish, European and American political systems, international relations and the politics of the United Nations

#### — World Religions and Theology

You will closely analyse ancient and modern texts, explore ethical issues, and develop insights into cultural and religious diversity as part of the academic study of religion

You will study your chosen subjects through seminars, lectures, workshops, tutorials, small group settings and some online learning, so you will have lots of opportunities to get to know your fellow students. As you progress through the course, you will develop excellent research, writing and presentation skills.

#### Humanities (DC009)

##### Select two subjects:

Up to two permitted from English and Gaeilge

Only one permitted from Human Development | Philosophy

Only one permitted from History | Music

Only one permitted from Geography | World Religions and Theology

#### Media Studies (DC291)

##### Select Media Studies + one other subject from:

English | International Languages | Politics

#### Law (DC292)

##### Select Law + one other subject from:

History | International Languages | Media Studies

#### International Languages (DC293)

##### Select International Languages + one other subject from:

Gaeilge | Politics

#### Politics (DC295)

##### Select Politics + one other subject from:

Geography | History | Law | World Religions and Theology

#### Study Abroad

Most subjects will offer you the option to study abroad for a year. Please note the study abroad option is offered on merit and you will need to fulfil certain criteria to undertake it.

#### INTRA

You can opt to apply for a year-long work placement in Year 3. This will give you a unique opportunity to enhance your CV, increase your employability and experience the relevance of your study in the real world. This option is competitive and subject to the availability of placements. For more information on the INTRA programme at DCU, please visit [dcu.ie/intra](http://dcu.ie/intra)

#### Additional Notes

— Subjects are studied for three or four years depending on whether you choose to study abroad for a year or participate in the INTRA programme

— Gaeilge is offered at intermediate level (and normally requires Leaving Certificate grade H4 or above)

— International Languages includes: French, German or Spanish (all starting at intermediate level only, and normally requires Leaving Certificate grade H4 or above)

— Entry to Music is subject to a pre-registration assessment in the rudiments of music (theory and aural test) to indicate suitability for the course. Dates for these tests will be posted on our website: [dcu.ie/arts](http://dcu.ie/arts)

#### Future Study

Having completed the Bachelor of Arts: Joint Honours degree, you will be eligible to take a Master's degree in one of the subjects studied as well as to undertake Masters studies in related fields such as education, international relations, translation, journalism, advertising, public relations, conducting, environmental science, film or television production.

# Bachelor of Arts : Joint Honours

## Modules on offer in each Bachelor of Arts (Joint Honours) subjects

### English

#### Why is this subject for me?

Stories are fundamental to humanity, connecting individuals and communities, dreams and realities. They let us imagine possibilities for living that we may never encounter in real life. Studying English Literature provides you with the skills to think creatively and intelligently about this complex but thrilling phenomenon. You will explore and enjoy the diversity of interpretative approaches available to you as a reader of literature, becoming knowledgeable about the interplay of texts and traditions, and confident in your critical independence. You will engage with a wide range of literature and become familiar with the vital characteristics and contexts of drama, poetry, film and fiction. You will have the opportunity to take classes in creative writing. You will study style and substance: what literature describes, and also how it does it. From the origins of tragedy and comedy in Ancient Greece through Shakespeare and Joyce to the hybrid texts, digital poems and video games of the 21st century, literature is a story that has no end in sight.

#### What Will I Study?

##### Year 1

Introduction to Fiction: Short Story and Novel | English Study Skills, Creativity, and Theoretical Contexts | Genre: The Tragedy-Comedy Complex | Poetry: How and Why to Read It | Modern European and American Drama | Literature and Value: What Makes Great Books Great

##### Year 2

Shakespeare and the English Renaissance | Gender and Sexuality | Romanticism: Innocence and Experience | Creative Writing | 19th Century Literature | Modernism and Postmodernism | Empire Writing and Postcolonial Literatures | Creative Writing Fundamentals: Craft and Technique

### Optional Study Abroad / INTRA

#### Final Year

Research Seminar | Poetry in Public | Irish Writing: Then and Now, Local and Global | Staging Ireland: A History of Irish Theatre | Here be Dragons Children's and Young Adults Literature | Advanced Creative Writing

#### Future Career

English offers access to many areas of employment. Our graduates have gone on to pursue careers in journalism, public service, creative writing, public relations, media, research, law, communications, publishing, management consultancy, arts administration, politics, heritage and tourism as well as in teaching.

### Gaeilge

#### Cén fáth a bhfeilfeadh an t-ábhar seo domsa?

Agus tú ag déanamh staidéir ar an nGaeilge in DCU foghlaimoidh tú réimse scileanna | dtimpeallacht nuálach dhinimiciúil. Léachtóirí agus taighdeoirí tiomanta fuinniúla a bhfuil an-taithí acu a bheidh | mbun teagais. Daoine iad a bhfuil an dúspéis acu sa litríocht, | léann an chultúir, agus san aistriúchán mar uirlisí oideachasúla chomh maith.

Beidh tú in ann do chuid scileanna praiticiúla teanga a fhorbairt agus a stór eolais a leathnú maidir leis an nGaeilge féin agus lena litríocht, cultúr agus traidisiún. Cuirfear béim sna seimineáir theanga ar éisteacht, labhairt, léamh agus scríobh na Gaeilge. Gheobhaidh tú cleachtadh ar an teanga sna modúil éagsúla freisin, is é sin ó bheith ag éisteacht le Gaeilge, ag léamh téacsanna, agus ag scríobh aistí. Déanfaidh tú forbairt ar do chumas anailíse agus critice trí bheith ag plé le téacsanna agus le hacmhainní éagsúla, acmhainn ar líne ina measc.

#### Why is this subject for me?

At DCU you will explore many aspects of the Irish language in an innovative and dynamic environment. You will be taught by experienced, committed and enthusiastic teachers and researchers, who embrace areas such as literature, cultural studies, and translation as instructional tools.

The Irish-language modules offered will allow you to develop your practical language skills and to broaden your knowledge of the Irish language and its literature, culture and traditions. The various modules on offer will also help you to enhance your language competence. These modules will focus primarily on improving analytical and critical skills, on increasing familiarity with sources of information and on works of reference about Irish, including online resources. You will develop further the research and writing techniques that are necessary for programmes of further study or for positions where Irish is used in the workplace.

#### Cé na hábhair staidéir a bheidh agam?

##### Bliain 1

Cúrsa Teanga 1 | An Nuafhíliocht agus na hAmhráin | Scéal na Gaeilge | Meáin Chumarsáide na Gaeilge | An Scéalaíocht Thraidisiúnta agus an Gearrscéal

##### Bliain 2

[Modúil roghnacha cuid acu seo le gur féidir leat na cinn is mó is spéis leat a roghnú.]

Cúrsa Teanga 2 | An Béaloideas | An Nuafhíliocht 2 | Aistriúchán agus Eagarthóireacht | Litríocht an 17ú agus an 18ú hAois | Ainmeolaíocht na Gaeilge | Teangeolaíocht na Gaeilge

#### Staidéar Thar Lár/INTRA

**Additional Information**

Please see page 243 for information on estimated costs and financial support available if part of your course requires you to study abroad.

**Contact Details**

E [studenthelp@dcu.ie](mailto:studenthelp@dcu.ie)

[dcu.ie/arts](http://dcu.ie/arts)

**Bliain 3**

[Modúil roghnacha cuid acu seo le gur féidir leat na cinn is mó is spéis leat a roghnú.]

Cúrsa Teanga 3 | An Cúrsa Taighde | Athbheochan agus Athnuachan | Nuaphrós na Gaeilge | An tSochtheangeolaíocht | Téarmaeolaíocht na Gaeilge

**Deiseanna Gairme**

Tá ardú ar an éileamh ar dhaoine le scileanna teanga sa Ghaeilge ó tháinig Acht na dTeangacha Oifigiúla (2003) | bhfeidhm agus ós teanga oibre de chuid an Aontais Eorpaigh í an Ghaeilge anois. Beidh céimithe Fiontar & Scoil na Gaeilge ullmhaithe go maith le freastal ar an éileamh sin. Feilfidh an chéim seo duit, freisin, má tá spéis agat sa mhúinteoireacht iar-bunscoile nó comhlíontar riachtanais reatha na Comhairle Múinteoireachta don Ghaeilge mar ábhar teagaisc inti agus tá an Chomhairle tar éis céimithe dár gcuid a chlárú cheana féin ar bhonn aonair. Leis na scileanna eile a bheidh agat beidh tú in ann plé le gairmeacha | réimsí éagsúla e.g. earnáil na Gaeilge, an iriseoireacht, an chraoltóireacht, cúrsaí riaracháin, agus cúrsaí bainistíochta.

**Future Career**

With the implementation of the Official Languages Act and the granting of status to Irish as an official working language of the European Union, demand has risen for people with Irish language skills. Graduates of Fiontar & Scoil na Gaeilge will be well placed to meet this demand. This degree will also suit you if you wish to pursue a teaching career, as it complies with current requirements set down by the Teaching Council for teaching Irish at post-primary level. Students who have studied Irish in DCU have been recognised by the Teaching Council on an individual basis. Other career options include the Irish-language sector, journalism, broadcasting, administration and management.

**Geography****Why is this subject for me?**

Geography is all around us and this course will take you on a geographical journey that is informed by what is happening in today's world. You will examine human activity, human-environment relations and physical environments at a variety of scales, from local to global. You will also apply your learning and come to a better understanding of your environment through fieldwork and practical classes. Geography is a key analytical discipline that bridges the social and physical sciences and the humanities. It strives to contribute in a meaningful way to society and to address issues and problems of broad concern to humanity. Throughout the course, you will study people and environments in the context of a rapidly changing and increasingly interconnected world. There is an emphasis on 'real-world' engagement and understanding. Geographers are much sought after by employers because of their analytical and practical skills, their exposure to diverse perspectives and their flexible but solidly based training.

**What Will I Study?****Year 1**

Geographical Fieldwork and Observation Skills | Introduction to Human Geography | Hazardous Earth | Ireland in Europe and the Wider World | Global Climates | Geographical Interpretation and Communication

**Year 2**

[Some of these modules are optional, so you can choose what you might like to specialise in.]  
Evolution of Ireland's Physical Landscape | Humanitarian Action | Population Geography | Global Urbanism | Geographical Research Methods for Urban Areas | Climate Change: Causes and Consequences | Economic Geography | Geographical Research Methods-Geopolitics | Research Methods in Physical Geography | Geographical Research Methods - Economic Geography

# Bachelor of Arts: Joint Honours

## Modules on offer in each Bachelor of Arts (Joint Honours) subjects

### Optional Study Abroad / INTRA

#### Final Year

[Some of these modules are optional, so you can choose what you might like to specialise in.] Slums and Suburbs | Historical Geography | Water Resources of Ireland | Geopolitics of the Middle East and North Africa | Children's Geographies | Becoming an Historical Geographer | Geography and Natural Ecosystems | Advanced Urban Geography Research Project | Political Geography: Space of Memory | Environmental Geographic Information Systems (GIS) | Research Skills for Catchments

#### Future Career

As a geography graduate, you will have many potential areas of employment open to you including planning, local/community development, environmental consultancy, housing policy, diplomatic service, regional development, humanitarian aid, public service, tourism, museum / heritage management, wildlife and nature conservation, market research and teaching.

#### History

##### Why is this subject for me?

History is an exciting subject to study at third level. It will provide you with an unrivalled opportunity to explore how human beings behave, grounded on a close examination of what they have done in all areas of the world but with a special focus on the history of Ireland from the Stone-Age to the present.

More particularly, you will study how societies are formed; how people relate; how new ideas emerge and take hold; and how individuals, great and ordinary, shape and negotiate the challenges that are a constant in human life.

Our purpose is to provide you with the skills and information that will equip you to reconstruct and interpret historical events based on a close reading of historical works and the study of documents. You will also be encouraged to analyse the major themes and issues you will encounter in the course of your studies. When you successfully complete the course, you will possess the skills and qualifications necessary to pursue a variety of career pathways or further study.

##### What Will I Study?

#### Year 1

Introduction to History: Historical Practice and Interpretation | Making of Modern Ireland, 1850-1998 | Early Modern Europe, 1450-1700 | History Workshop: Turning Points | The History of the Irish Landscape | The World since 1945

#### Year 2

[Some of these modules are optional, so you can choose what you might like to specialise in.] Ireland, 1690-1850 | Europe, 1648-1848 | Victorian Britain: Society and Culture | Irish Women in the Long 19th Century | Childhood and Children in the Western World | Russia's 20th Century | Aspects of the Irish Diaspora | Political, Social and Cultural Change in 20th Century Britain | Early Medieval Ireland, 431-1169 | Medieval Christianity

### Optional Study Abroad / INTRA

#### Final Year

[Some of these modules are optional, so you can choose what you might like to specialise in.] Modern Europe, 1845-1945 | Introduction to Popular Cultures in Ireland, 1800-1950 | Modern America, 1830-1972 | A History of Northern Ireland, 1912-1998 | Death and Disease in History | Crime and Punishment, c. 1750-1950 | Humans and other animals in the Modern World | Medieval Archaeology | Public Health in Ireland, c.1850-1950 | The Irish Revival and Revolution in Ireland, 1884-1922 | Revolution and Civil War in Ireland, 1916-1923 | British and Irish Women, 1900-1945 |

Nationalism in Modern Europe; Theory and Practice

#### Future Career

Graduates have gone on to pursue careers in teaching, journalism, public administration, business, politics, management, library work and information retrieval.

#### Human Development (this subject is offered only on DC009)

##### Why is this subject for me?

Human Development is a unique subject which seeks to understand well-being and how humans flourish in different dimensions and at different stages of the life-span. You will be introduced to Psychology, Sociology and Philosophy. This holistic course addresses wider social, cultural, economic and political factors which enhance or endanger human well-being. There is an emphasis on the historical dimension of how people have reflected on themselves in the past, while at the same time you look at recent research and become familiar with a range of research methodologies. You will consider conflicting value orientations and discuss controversial issues concerning human behaviour and identity. The personal, reflective and creative thinking skills that you develop in this subject prepare you well for work in a changing competitive global environment. From the complementary perspectives of Psychology, Sociology and Philosophy, your course work will help you to develop a critical understanding of human needs and capacities at crucial stages of the developmental process.

##### What Will I Study?

#### Year 1

Introduction to Human Development 1 and 2 | Social and Emotional Development of the Child | Social Contexts of Childhood | Intellectual Development of the Child | Philosophy: Perspectives on Childhood

### Additional Information

Please see page 243 for information on estimated costs and financial support available if part of your course requires you to study abroad.

### Contact Details

E [studenthelp@dcu.ie](mailto:studenthelp@dcu.ie)

### Visit Us Online

[dcu.ie/arts](http://dcu.ie/arts)

### Year 2

Psychology 1: Learning and Motivation |  
Recurrent Themes in the History of Ideas |  
Psychology 2: Psychology of Adolescence |  
Social Contexts of Adolescence | An  
Introduction to Existentialist Philosophy |  
Research Methods in Human Development

### Optional Study Abroad / INTRA

### Final Year

Research Project | Psychopathology | Social  
Philosophy | Counselling and Psychotherapy |  
Contemporary Challenges in Human  
Development | Social Psychology | Research  
Methods

### Future Career

Through the combination of lectures, workshops, educational visits/trips and tutorials offered you will have the opportunity to develop intellectually and critically. Many students who take Human Development move into education or community-type work. You can also choose to do further courses in the fields of counselling, human resources (HR) and business. Postgraduate study in the humanities or education has been a strong tradition with Human Development students.

### International Languages

#### Why are these subjects for me?

At DCU you will develop excellent communication skills in your chosen language. You will enjoy the profound satisfaction that being really proficient in a foreign language brings. You will also be able to explore the linguistic and cultural diversity associated with your chosen language and discover a range of perspectives that will encourage you to think critically about how cultures relate to one another. You will develop a cultural sensitivity that will help you to negotiate increasingly multicultural societies and workplaces. Throughout, you will be taught by experienced, committed and enthusiastic teachers and researchers, who embrace areas such as cinema, cultural studies, linguistics, literature, translation, digital technologies and visual arts as instructional tools.

The languages available on the BA Joint Honours course are:

- French (intermediate level only)
- German (intermediate level only)
- Spanish (intermediate level only)

(A minimum of H4 is required in your chosen language.)

### Future Career

Foreign language graduates are consistently among the most employable of all university graduates, and can join a wide range of professions. Their skills are valued in particular in the export sector, multi-national corporations and international organisations. Some graduates may become career linguists (language teachers or language specialists of other kinds), sometimes after further study.

This degree will also suit you if you wish to pursue a teaching career, as it complies with current requirements set down by the Teaching Council for teaching French, German and Spanish at post-primary level.

### French

#### Why is this subject for me?

Studying French at DCU will bring you on a linguistic and cultural journey through France and also through the different parts of La Francophonie, the French-speaking world that extends from Canada through to South America, Europe, Sub-Saharan Africa and parts of Asia and Oceania. French, an official language of the United Nations and several other major international organisations, is one of the great languages of diplomacy and is also highly sought after in the business world, reflecting France's status as one of the world's largest economies. After English, French is the most widely taught foreign language in the world, and France is the most visited country on the planet, so there is never a shortage of opportunities to use your French.

# Bachelor of Arts: Joint Honours

## Modules on offer in each Bachelor of Arts (Joint Honours) subjects

### What Will I Study?

#### Year 1

French Language | French Society and Literature | Introduction to Translation Practice (French)

#### Year 2

French Language and Culture 2 | French, Visual Literature and Film Studies | French Translation Practice | Introduction to Text Analysis

#### Optional Study Abroad / INTRA

#### Final Year

French Language Skills | French Literature and Society | French Language and Contemporary Society

### German

#### Why is this subject for me?

Studying German at DCU will bring you on a linguistic and cultural journey not only through Germany, Europe's most populous country, but also the other lands where German is an official language, such as Austria and Switzerland. As German is the most widely spoken native language in Europe, and the language of one of the world's largest economies, the opportunities to use it for business and pleasure are boundless. And given their position at the centre of a Europe in flux, there has never been a more interesting time to learn about German-speaking societies.

#### What Will I Study?

#### Year 1

German Language | German Society and Literature | Introduction to Translation Practice (German)

#### Year 2

German Language and Culture 2 | German, Visual Literature and Film Studies | German Translation Practice | Introduction to Text Analysis

#### Optional Study Abroad / INTRA

#### Final Year

German Language Skills | German Literature and Society | German Language and Contemporary Society

### Spanish

#### Why is this subject for me?

Studying Spanish at DCU will bring you on a linguistic and cultural journey through Spain and Latin America. After Chinese, Spanish is the second most widely spoken native language on the planet, with over 425 million native speakers worldwide. An official language of the United Nations and several other major international organisations, it is used on a world stage, and also provides a gateway to the vibrant cultures and emerging economies of Latin America.

#### What Will I Study?

#### Year 1

Spanish Language | Spanish Society and Literature | Introduction to Translation Practice (Spanish)

#### Year 2

Spanish Language and Culture 2 | Spanish Literature, Visual and Film Studies | Spanish Translation Practice | Introduction to Text Analysis

#### Optional Study Abroad / INTRA

#### Final Year

Spanish Language Skills | Spanish Literature and Society | Spanish Language and Contemporary Society

### Law

#### Why is this subject for me?

Studying law at DCU will give you a clear understanding of how the legal process operates and how law influences and is influenced by a diverse range of social forces. In addition to learning core legal rules and principles, you will learn to reflect critically on how these are shaped and developed and on the role the law plays in the regulation of social systems. Through the innovative teaching and learning supports provided by a committed team of lecturers, you will develop excellent research, analytical, advocacy and presentation skills.

#### What Will I Study?

#### Year 1

The Irish Legal System | Constitutional Law | Law of Torts | Advanced Torts | Legal Research and Methods

#### Year 2

Moot Court | Property Law | Company Law 1 and 2 | Advanced Property Law

#### Optional Study Abroad / INTRA

#### Final Year

Employment Law | Principles of Equity and Trusts | Criminal Law 1 and 2 | EU Law | Advanced EU Law

#### Future Career

This subject offers you a route into a legal career. If you study Law as part of your Bachelor of Arts: Joint Honours course, you will be entitled to sit the Law Society's entrance examination (FE1). Most of the subjects taken in the degree course are the same as those examined in the FE1. There is also some subject overlap with the Bar Council examinations run by the Honourable Society of King's Inns, which you must pass if you wish to pursue a career as a barrister. But before you can qualify to sit the King's Inns entrance examinations, you will first need to successfully complete the King's Inns diploma course.

**Additional Information**

[dcu.ie/arts](http://dcu.ie/arts)

The skills you develop on this course will also stand you in good stead for a range of future careers outside the legal profession. Studying Law on the Bachelor of Arts: Joint Honours course (DC292/DC295) does not entitle you to go straight to the King's Inns entrance examination.

and independent production companies, advertising, public relations, market research, publishing, event management, arts administration, government services and local administration. The degree also provides a strong foundation for further study.

**Media Studies****Why is this subject for me?**

Media Studies will equip you with the knowledge and theoretical foundations required to understand and analyse the role played by mass media in modern society. You will learn how individuals are shaped by culture, about the social and economic pressures on media organisations, and the way mass media are used by government, corporations and others to influence us as citizens and as consumers. You will study how audiences receive and interpret messages, and about the different uses of print, film, radio, TV and the internet. You will engage in the current debate about how social media may radically change the relationship between individuals and political-commercial power structures.

**What Will I Study?****Year 1**

Introduction to Communication Studies | History and Structure of the Media | Analysing Visual Media | Cultural Studies

**Year 2**

Media Audiences | Media and Power | Theorising Social Media in Everyday Life | Social Class in the Media | Film History and Theory | Crime Policing and the Media

**Optional Study Abroad / INTRA****Final Year**

Media Law | Communication Culture and the Environment | Press and Public Relations | Race and the Media | Science, Technology and Society | Television Drama

**Future Career**

There are many exciting employment opportunities in the public and private sectors. These include working in media

**Music (this subject is offered only on DC009)****Why is this subject for me?**

This course is for students who wish to build on their knowledge and experience of music. It takes place in a vibrant School that performs a key role in the cultural and social life of the University and the wider community.

Studying music will enable you to develop your musicality and deepen your understanding of the subject from a range of musicological and cultural perspectives. You will build your knowledge and understanding of classical, traditional, popular and other music styles, drawing on a range of practical, analytical and critical approaches. You will systematically develop your practical skills and techniques in music writing/composition, music listening and music technology.

You will continue studying an instrument and/or voice throughout the course and participate in choral and/or other group musical activities. You will also take modules that explore music in contexts of human experience and culture.

**What Will I Study?**

The course involves core modules over each of the three years in music writing/composition, performance and musicology. You will also take modules in music technology, music theory, solfège/aural training, conducting, ethnomusicology and interdisciplinary music studies. During your final year you will be guided towards a dissertation based on a music topic of your choice.

**Year 1**

Performance / Participation in Music 1 | Composition, Theory and Applied Techniques 1 | Topics in Musicology 1 | Composition, Theory and Applied Techniques 2 | Topics in Musicology 2

# Bachelor of Arts: Joint Honours

## Modules on offer in each Bachelor of Arts (Joint Honours) subjects

### Year 2

Performance / Participation in Music 2 | Composition, Theory and Applied Techniques 3 | Topics in Musicology 3 | Composition, Theory and Applied Techniques 4 | Topics in Musicology 4

### Optional Study Abroad / INTRA

#### Final Year

[Some of these modules are optional, so you can choose what you might like to specialise in.] Performance/ Participation in Music 3 | Musicological Research | Composition, Theory and Applied Techniques 5 | Topics in Musicology 5 | Composition, Theory and Applied Techniques 6 | Topics in Musicology 6 | Choral Studies/Conducting

#### Future Career

Typical career opportunities for music graduates include those in broadcast and online media; arts organisations; post-primary, primary and instrumental/vocal teaching; and performing/conducting.

### Philosophy

(this subject is offered only on DC009)

#### Why is this subject for me?

Philosophy provides foundations for much of humanity's big questions. Students of philosophy study a wide variety of foundational topics and issues, and become participants in the great adventure of human thought about, for example, the nature of the self, the status of the good, the reliability of knowledge, the best political state, or how we might understand beauty.

Historically grounded and global in extent, philosophy at DCU is also distinct for its 'practical' emphasis, and focuses on important ethical and moral debates in each year of study.

#### What Will I Study?

##### Year 1

Introduction to Philosophy: Central Issues and Questions | Introduction to Ethics | Reason, Argument, Analysis: Introduction to Logic | Knowledge, Belief, Scepticism: Introduction to Epistemology | Philosophy Texts 1

##### Year 2

Aesthetics | Irish Philosophy | Metaphysics: An Historical Introduction | Philosophy of Religion | Environmental Ethics and Global Moral Issues | Philosophy Texts 2

### Optional Study Abroad / INTRA

##### Year 3

Research Paper | Global Voices in Philosophy | Bioethics | Topics in Continental Philosophy | Topics in Feminist Philosophy | Philosophy Texts 3

#### Future Career

Employees value the skills in analysis and clear communication which philosophy can provide. Typical graduate career paths include: teaching, journalism, academia, public administration, public relations, arts administration, human rights bodies and legal affairs.

### Politics

#### Why is this subject for me?

You will study areas as diverse as counter-terrorism, the European Union, the United States of America, international political economy, the Middle East and international development, to name just a few. The school is a leading centre for the study of politics and international relations in Ireland, and you will benefit from the skills and experience of a dedicated, supportive and highly qualified academic team.

#### What Will I Study?

##### Year 1

Introduction to Politics | Introduction to International Relations and Security | Research Methods | Introduction to European Integration | Introduction to US History and Politics | Introduction to Development

##### Year 2

The Irish Political System | Conflict, Security and Peace | Global Political Economy | The Politics of Climate Change

### Optional Study Abroad / INTRA

#### Final Year

Chinese Politics and Foreign Policy | Politics of Sub Saharan Africa | Contemporary Politics of the Middle East and North Africa | Post Soviet Politics | The Politics of South Asia | Issues in European Integration | Dissertation

#### Future Career

Our graduates work in international NGOs and European institutions, as well as in the public and private sectors in Ireland and abroad. Politics at DCU will equip you with the skills to become both a critically engaged citizen and an active leader in our globalised world.

### Additional Information

Please see page 243 for information on estimated costs and financial support available if part of your course requires you to study abroad.

## World Religions and Theology

### Why is this subject for me?

Are you curious about investigating the significance of religion in a complex world? Are you interested in learning more about various religious traditions such as Judaism and Islam? Do you enjoy thinking about contemporary ethical dilemmas? If so, World Religions and Theology is just for you. In this subject, a variety of exciting modules cover a broad range of topics including the Hebrew, Christian and Islamic Scriptures; key thinkers in Western and Islamic philosophy; systematic theology; ethics; and world religions. You will have the opportunity to become involved with the wider community beyond the University through service-learning placements with social justice organisations, including working with people who are homeless and refugees. The study of World Religions and Theology is open to students of all backgrounds, religious and secular.

### What Will I Study?

#### Year 1

History of Christianity | Introduction to the Jewish and Christian Scriptures | Theology: Sources, Themes, and Debates | Ethics: Philosophical and Theological Foundations | Introduction to Islam

#### Year 2

Jewish Scriptures: The Torah | Christology: Systematic, Historical, and Interreligious Perspectives | Ethics: Contemporary Issues | Philosophy: An Historical Introduction | Liberation Theologies | Theological Anthropology | Introduction to Classical Arabic | Introduction to Biblical Hebrew | Introduction to Koine Greek

## Optional Study Abroad / INTRA

### Final Year

Social Ethics and Service-Learning Placement | New Testament: The Gospels | Hinduism, Buddhism and Eastern Traditions | Religion: Philosophical and Sociological Approaches | Texts and Traditions in Judaism and Islam | Introduction to Classical Arabic | Introduction to Koine Greek

### Future Career

Theology and Religious Studies graduates work in various areas of professional activity, including teaching, lecturing and adult education; pastoral work; journalism; communications; politics and social sciences, European and international religious agencies; voluntary and community organisations; social justice and human rights bodies; development work and research. In some instances a relevant postgraduate qualification may be required.

# BA in Communication Studies

## People, society, media – explore the world of communications

### Why DCU?

- Explore the world of communication while learning the basics of media production
- Combine a theoretical understanding of communication, media and society, with best practice in media production
- The longest-running undergraduate degree of its type in Ireland, with a reputation for academic and creative excellence
- Meet teaching staff with professional experience in electronic and print media as well as in academic research
- Great career prospects in private and public communication institutions in Ireland and abroad

### About You

You have a strong interest in people, the arts and the media. You are creative and very curious about how the world of communications works. You want a degree that teaches you how to think critically about the world while also offering practice-based modules that will ensure you are a multi-skilled and flexible graduate.

If you are enrolling as a mature student, you will have a keen interest in communications and the sort of life experience that will enable you to benefit from the course as well as contribute to academic life in the School during your years here.

The degree calls for the ability to work as a member of a team as well as the motivation and self-confidence to work alone. At this stage, you may not know what career interests you most and Communication Studies is designed to show you the world of communications to help you decide.

### Additional Requirements

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of H4 in English.

### Understanding: Communications

Think of the many ways in which we communicate. We communicate with each other (inter-personal communication). Companies and public bodies use communications to operate effectively (organisational communication) and to interact with the public (public relations, advertising, information campaigns). Then there's the media - be it news and current affairs or entertainment, communications inform us and help us to understand so much of what goes on around us. The BA in Communication Studies will give you a thorough understanding of the role communications play locally, nationally and internationally by teaching you how to think critically about them in their various forms. Its production-based modules will also develop your creative, analytical and problem-solving skills.

### Course Structure

The purpose of the course is to help you understand contemporary communication theory and practice. In other words, how communication works and how it affects daily life. The course is structured around 4 key elements: foundation modules, core modules, production modules and optional modules.

The foundation modules in Year 1 provide a basic grounding in the disciplines you will need for more advanced work in later years. Core modules in Years 2 and 3 help you develop a critical awareness and grow in the areas of communication, media and cultural studies.

The production modules develop your skills in audio, video, imaging, communication and presentation. With your optional modules, you will develop expertise in a number of key areas that reflect your particular interests, aptitudes and aspirations. The final year written dissertation is a solo piece of original academic research carried out by each individual student. This capstone project that showcases all you've learned and the skills you've acquired during your studies.

**Additional Information**

The degree also provides a strong foundation for further study.

**What Our Current Students Say**

Studying Communications gives you a deep dive into all things media. From production modules to analysis and theoretical classes, you'll gain a sharp insight into the creation and impact of all kinds of media. These skills can be explored and improved by taking part in DCU's wide range of Clubs & Societies, including the Media Production Society and Fotosoc. With plenty of opportunities at DCU and diverse career paths after graduation, Communications is perfect for someone interested in our relationship with modern media.

*Jim Xi Johnson, BA in Communications*

**Future Careers**

- Event Management
- Market Research
- Academic Positions
- Media Production
- Public Relations
- Publishing
- Advertising

**In These Areas**

- Media and Independent Companies
- Arts Administration
- Public Service
- Government Services
- Local Administration

# BA in Journalism

## Help people understand the world

### Why DCU?

---

- Develop a broad range of skills for working in all areas of journalism
- Be taught by experienced journalists and researchers
- Learn through an integration of theory, practice, and critical reflection
- Produce a final-year academic dissertation or journalistic project
- Undertake a final-year work placement – unique to Ireland - with a media organisation

### About You

---

The key characteristics of journalists include a profound sense of curiosity about people and the world, strong critical thinking skills and the ability to write clearly. You should have strong verbal reasoning skills, enjoy reading and writing and have an interest in books and all kinds of media. You also need the ability to absorb large amounts of information quickly, the analytical skills to understand that information, and the writing skills to communicate it clearly.

As journalists are storytellers, you should have an interest in the power of stories to help explain the world. You are keen to explore written, video, and audio forms of storytelling, including new forms that can be seen on various social media platforms. If you have creative ability, you can use it to produce journalism through photography and publication design. If you have mathematical and analytical skills, you can apply them in the production of data journalism.

### Additional Requirements

---

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of H4 in English.

### Mature Students

---

If you are coming to us as a mature student, you will have had an interest in journalism for some time, the sort of life experience that will enable you to contribute as much to the course as you will get from it, and the ability to write clear, error-free English. You should apply through the CAO by 1 February – there is no late application for this course.

Mature applicants are asked to submit, along with their other paper documentation, a hard copy of a published or unpublished article of approximately 750 words of their own composition, written for a specific publication. If the article has been published, state when and in which publication. If the article is unpublished, indicate the newspaper or periodical for which you think your submission would be best suited. Advice for mature applicants is available at [dcu.ie/mature-students](http://dcu.ie/mature-students)

### Understanding: Journalism

---

Have you ideas about the future? Can you see what ought to be changed now? We need journalists to analyse, examine and reveal how things work and what the future holds for people.

The BA in Journalism degree is intended for those with enquiring minds who want to learn how to tell stories in a way that will help people in Ireland and internationally to find the best way forward.

The role of journalists is varied – it can be to entertain or educate as well as to inform the public. The technologies of journalism change, but the need for it does not. Online, in print, across the airwaves or in social media, stories are told that engage the public and help us understand our world. In all areas of life, from business to politics, from culture to religion, from sports to lifestyles, people look to journalism for guidance.

The role of journalists varied - it can be to entertain or educate as well as to inform the public. The School of Communications aims to teach you to tell your stories in ways that follow best practice in journalism. We offer a suite of practical and theoretical courses across a wide variety of media platforms. We welcome applications for this course from people who feel that they have something to say and who want to learn more about how to say it in a way that makes sense to audiences and readers.

### Course Structure

---

The BA in Journalism combines three sets of studies. Firstly, it provides the essential practical skills, you will need to produce original journalism, such as reporting and writing for different media, (including social media). Secondly, it provides the knowledge of culture, politics, society, law and ethics that you need as essential context for your journalism. Thirdly, it provides a theoretical study of journalism and communications that will help you understand your role as a journalist and the function of journalism in society. To provide these skills and understandings, you will be taught by lecturers who are, or have been, practising journalists who are in close touch with the profession, and by researchers who are scholars of national and international reputation.

### INTRA

---

An essential element of the final year of the course is an 8-week INTRA work placement with a media organisation. On this placement, you will put into practice the skills and understandings developed over the previous three years of the course. All journalism students must complete a relevant work placement arranged or approved by the University.

### What Our Current Students Say

Studying Journalism in DCU has given me a completely new way of looking at the world – if you choose this course, you will never just read an article again, it will excel your thinking, allowing you to see between the lines, and change the way you look at the world – you will always find that story, even in mundane things. The lecturers are excellent at what they do, and you will meet some great people.

*Emma Kilcawley Hemani, BA in Journalism*

# BSc in Multimedia

## Create and critique compelling interactive media through understanding and using theory and technology

### Why DCU?

---

- DCU's BSc in Multimedia was the first of its type in Ireland and has retained a strong reputation for excellence
- Our teaching staff are experts in analysing and creating a variety of media forms, drawing on their extensive experience in research and industry
- Staff from this area of study are actively engaged in contemporary creative media practice and production, and contribute to internationally recognised artistic and research work
- Our graduates work at the highest levels, with their employers recognising the value of their degree course
- You get to shape your degree by choosing areas of special interest after exploring a wide variety of topics
- We are continually updating the course to ensure it stays relevant to the contemporary forms of media and prepares you to enter a dynamic industry

### About You

---

You need a creative, with an enquiring outlook and an interest in the design of engaging and interactive media experiences. Our graduates are highly successful designers, developers, artists, educators, entrepreneurs, and scholars. If, like them, you are intrigued by the relationship we have with media and digital technologies in our lives, and want to explore, improve and expand that relationship - this is the course for you.

You do not need existing skills or practical experience in the analysis or design of media. You should enjoy working with digital technologies and be interested in problem solving, creative expression and working in focused team projects. The various modules will introduce you to a range of core skills from which you can build and specialise.

If you are coming to us as a mature student, you will have an interest in digital and media technologies. Your experience and enthusiasm for these areas will allow you to contribute to a team-focused course that provides a solid foundation in the creative industries and gives you opportunities to specialise.

### Additional Requirements

---

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of H4 in English.

### Understanding: Multimedia

---

Contemporary and emerging digital media technologies are increasingly central to our everyday lives. These technologies are widely used for the creation, display and interaction of content we engage with regularly in many areas of life - from education to work, entertainment, or news reporting.

Media technologies and productions have a role in the expressive arts, and in public and private spaces where we interact with information. DCU's BSc in Multimedia equips you to critically analyse these interactions and to create original ones, grounded in a sound understanding of theory and design.

### Course Structure

---

Your degree course focuses on the conceptual and creative dimensions of multimedia as well as the technological aspects. You will develop an understanding of theory relevant to digital media, including issues of content and form, and the relationship of media to society.

You will acquire a command of the concepts and practices in digital text, image and in programming and controlling responsive media. You will contribute to multimedia product development and manage diverse productions.

A range of specialisms is possible, based on your choice of modules. For example, your choices might emphasise digital imaging and graphic design skills, application and interface building, or project management and media law. Your options allow you to build upon the strengths you discover in Year 1.

Project work is a vital part of this degree and you will be set numerous individual and group projects throughout Years 1, 2 and 3.

### What Our Current Students Say

My first year of Multimedia was an eye-opening experience. Although study was totally online for the year, I tried my best to make the most of it. After completing Year 1, I can proudly say that I have delved into a variety of creative and technical spaces. This has strengthened my desire to remain in a creative environment in order to further develop my ideas and creativity. We covered many practical and theoretical modules that complimented one another - Imaging and Design, Digital video, and Psychology were my favourite from first year. I can agree that Multimedia is for the creative problem solver who enjoys bringing effective solutions to life. If that describes you, then this course will be a great fit! In the future, I plan to work in the Marketing and Tech industry, with Multimedia I am building the diverse skills I'll need. Without a doubt, I am so excited to flourish and continue my study here at DCU.

Laura Ileogben, BA in Multimedia

### Future Careers

- Digital Project Manager
- Game / App Designer
- Graphic Designer
- UI Design
- Interaction Design / User Experience Consultant
- Digital Animator
- Sound Designer / Editor
- VFX Artist
- Video Editor

### In These Areas

- Interaction Design Consultancy
- Digital Media Production
- Web and App Design
- Broadcast Production for TV and Film
- Advertising Agency
- Social Media and Tech
- Games Development
- Software Development

Look online (website details at top of page) for more information about future careers in your chosen field.

# BA in Jazz and Contemporary Music Performance

## Become a fully trained, high-level performing musician in jazz and other genres

### Why DCU?

- Acquire the skills to become a high-level professional musician
- Play and perform extensively as part of the course
- Learn how to compose and arrange for a wide range of ensembles
- Make international connections, including with the renowned Berklee College of Music in Boston [berklee.edu](http://berklee.edu)
- Work closely with some of Ireland's most highly regarded performers
- Enjoy the social side of music by joining the Music Society

### About You

Are you passionate about music? Do you love singing, playing an instrument or both, but also want a grounding in music theory and an insight into how the music business works? If you are aiming high as a performer and are keen to take part in the lively music scene at DCU, you will enjoy taking on the challenge of this degree course.

### Additional Requirements

In addition to the general entry requirements for admission to the University, (see page 232), you must take an audition. An aural/theory test is not required in advance of the audition.

This is a restricted entry course, meaning you apply through the CAO by 1 February, with the audition/performance assessment normally taking place on a weekend in April for September entry.

### Understanding : Jazz and Contemporary Music Performance

Singing or dancing, enjoying the soundtrack to a film, listening on headphones – music is a major part of contemporary life. To take to the stage as a performer demands intensive training as well as talent. Our degree course can help you on your way to a career as a professional musician. You will also get to understand the context of the international music scene today – how the music business works and how you can make your mark in it. Programme modules include Instrumental and Vocal Tuition, Aural Training, Ensemble Performance, Composition and Arranging, Jazz History, and Music Business.

### Course Structure

The course offers intensive jazz and contemporary music education within a focused, supportive learning environment. It is designed to provide a balance of “traditional” jazz techniques alongside contemporary approaches to improvisation, so that you can experience the full breadth of the contemporary music world and develop into a creative, versatile and employable musician.

A key feature of the BA in Jazz and Contemporary Music Performance includes an opportunity for students during the course to transfer into Berklee College of Music in Boston ([berklee.edu](http://berklee.edu)), one of the most prestigious music schools in the world in the field of contemporary music.

A diverse and rigorous programme of study is organised throughout all four years of the course. The course has five principal areas of study:

- Ensemble Studies
- Instrumental Studies
- Arranging and Composition Studies
- Aural and Theoretical Studies
- Contextual Studies

### Ensemble Studies

These modules aim to give you the skills to perform in ensembles at a high professional level in the world of contemporary music. Through working in ensembles, you will become familiar with the techniques and traditions of jazz and related genres, such as funk, Afro-Cuban and Brazilian music.

### Instrumental Studies

These modules aim to provide you with the instrumental and technical skills necessary for performing at a professional level in the contemporary music world. You will work on practice methods, identify goals, and acquire essential vocabulary through studying master soloists and stylistic interpretation.

### Arranging and Composition Studies

These modules introduce the skills necessary for modern arranging, and teach the history, ethos and techniques of jazz and contemporary composition. You will learn vital professional skills to enable you to work in the field of modern music as a composer or arranger. You will also be introduced to the use of music technology as an aid to arranging and composing.

### Aural and Theoretical Studies

These modules will give you a thorough grounding in contemporary harmony and theory, and the means to understand the theoretical and harmonic underpinning of contemporary jazz practice. In addition, you will learn techniques to hear and identify all the common melodic, rhythmic and harmonic patterns used in jazz and other related types of music.

### Contextual Studies

These modules will help you understand the history of the development of music of many genres, and its place in contemporary society. They will also give you an insight into the methodology and philosophy of teaching. In addition, they will aim to develop musicological and critical thinking skills which will give you a sense of music in your own life and make you aware how music is reflected in society.

## What Our Current Students Say

The Jazz Performance Degree is designed to make available to you all the knowledge and skills you need to be a professional, performing musician in today's music scene. The tutors are all professional musicians who have been there and done that. The direction I have been given by them, and the understanding and appreciation for the music this course has fostered in me has catapulted me forward as a musician. The sky is the limit and I look forward to what's coming next.

*Aaron Murphy, BA in Jazz and Contemporary Music Performance*

# BA Gnó agus Gaeilge

## Gnó agus Gaeilge – Bí cruthaitheach agus iomaíoch

### Cúig chúis mhaithe leis an BA Gnó agus Gaeilge a dhéanamh

- Scileanna bainistíochta, gnó, ceannaireachta agus teicneolaíochta a fhorbairt
- Feabhas a chur ar do chuid Gaeilge idir labhartha agus scríofa
- Buntáiste breise a thabhairt duit féin trí staidéar a dhéanamh ar an ngnó agus ar an nGaeilge ar bhealach atá difriúil agus nua-aimseartha
- Slí bheatha shuimiúil a aimsiú duit féin, bíodh tú ag obair leis an nGaeilge nó | réims eile
- Do chumas a léiriú trí thaithí oibre luachmhar a fháil agus trí phlean gnó de do chuid féin a chur le chéile faoi stiúir na léachtóirí

### Tú Féin mar Léinn Féin

Beidh tú muiníneach as do chumas Gaeilge idir labhairt agus scríobh. Beidh spéis agat | gcúrsaí gnó agus | dteicneolaíocht na faisnéise agus beidh tú airdeallach ar na buntáistí a bhaineann leis an dá réimse sin a nascadh le chéile. Cuirfidh Fiontar & Scoil na Gaeilge timpeallacht foghlama spreagúil, chomhaimseartha ar fáil duit agus forbróidh tú an cumas ceannaireachta atá ionat. Beidh tú ag iarraidh ról lárnach a imirt | saol na hOllscoile. Glacann mic léinn Fiontar & Scoil na Gaeilge páirt ghníomhach | saol DCU agus bhí go leor acu páirteach cheana féin | gcláir ar nós Clár Washington-Éire, Clár Fulbright, comórtais Enactus agus Fiontraíocht Éireann chomh maith le comórtais agus sparántachtaí na hOllscoile féin.

### Riachtanais Bhreise

Anuas ar ghnáthriachtanais iontrála na hOllscoile (féach lch 232), caithfidh tú Grád O1 Gnáthleibhéal nó H4 Ardleibhéal a bheith agat | nGaeilge.

### Saol: Gnó agus Gaeilge

San earnáil ghnó tá gá le daoine cruthaitheacha spleodracha. Bíonn fostóirí ag lorg daoine a bhfuil ardchumas sa ghnó agus scileanna | dteicneolaíocht na faisnéise acu. Níl ansin ach leath an scéil, áfach. Bíonn géarghá acu freisin le daoine atá in ann smaoineamh agus oibriú taobh amuigh de na gnáthchleachtais, daoine atá in ann cumas bainistíochta agus tréithe ceannaireachta a léiriú. Chun freastal ar na riachtanais seo tá struchtúr ar leith ar an gclár. Tá an cur | láthair suntasach freisin: déantar gnó iomlán an chúrsa trí mheán na Gaeilge. Is í an Ghaeilge a thugann an t-aitheantas bunúsach sin dó. Níl clár acadúil ar bith inchurtha leis seo a chuireann clár oibre chomh maith sin ar fáil | gcúrsaí gnó agus bainistíochta, agus | dteicneolaíocht na faisnéise don ghnó agus é trí mheán na Gaeilge. Déantar staidéar ar an nGaeilge ar bhealach nuálach praiticiúil. Tacaíonn fostóirí go tréan leis an gcur chuige seo agus tá nasc cruthaithe ag an gclár le comhlachtaí agus le heagrais mhóra náisiúnta agus idirnáisiúnta. Cinntíonn an nasc seo go mbeidh buntáiste ar leith agat agus tú ag stiúradh do ghairm bheatha.

### Struchtúr an Chláir

Tá an clár seo bunaithe ar thrí phríomhréimse:

- Gnó agus Bainistíocht
- Teicneolaíocht na Faisnéise don Ghnó
- An Ghaeilge Chomhaimseartha

Caithfidh tú Bliain 1 agus Bliain 2 ag forbairt na réimsí sin. Beidh deis agat ina dhiaidh sin bliain a chaitheamh ar chlár INTRA nó dul ar aghaidh go dtí an bhliain dheireanach. Gnóthóidh tú oideachas leathan acadúil agus praiticiúil atá in oiriúint don saol comhaimseartha gnó agus bainistíochta trí mhodúil cosúil le Bainistíocht Straitéiseach, Bainistíocht agus Iompar Eagraíochtaí agus Bainistíocht Acmhainní Daonna a dhéanamh. Beidh tuiscint agat ar chúrsaí cultúir agus forbróidh tú sárscileanna cumarsáide, chomh maith le do chumas sa Ghaeilge idir labhairt agus scríobh. Rachaidh tú | dtaithe ar obair foirne agus beidh deis agat forbairt phearsanta a dhéanamh agus do shamhlaíocht a úsáid | gcomhthéacs cruthaitheach gnó.

### INTRA

Tabharfaidh an socrúchán oibre bliana deis iontach duit snas a chur ar do CV, cur le chuid infhostaitheachta, chomh maith le do chuid eolais agus scileanna a chur i bhfeidhm san ionad oibre. Rogha iomaíoch é agus braitheann sé ar líon na socrúcháin a bhíonn ar fáil. Chun teacht ar bhreis eolais faoi chlár INTRA DCU, téigh chuig [dcu.ie/intra](http://dcu.ie/intra)

**Gaeilge an teanga teagaisc ar an gcúrsa seo.**

### Cé na modúil a bheidh ar siúl agam?

#### Bliain 1

Cúrsa Teanga 1 | Fiontraíocht agus Cruthaitheacht | Córais Eacnamaíochta agus Pholaitíochta | Teicneolaíocht na Faisnéise | Margaíocht | Scéal na Gaeilge | Na hIlmheáin | Meáin Chumarsáide na Gaeilge | Bainistíocht agus Iompar Eagraíochtaí | An Scéalaíocht Thraidisiúnta agus an Gearrscéal | An Nuafhilíocht agus na hAmhráin

#### Bliain 2

Cúrsa Teanga 2 | Aistriúchán agus Eagarthóireacht | Bainistíocht Acmhainní Daonna | Bainistíocht Acmhainní Airgeadais | Dlí agus Rialachas Corparáideach | Líonraí agus Gnó Digiteach | Teangeolaíocht na Gaeilge | Bainistíocht Straitéiseach

#### Modúil Roghnacha

An Nuafhilíocht 2 | An Béaloideas | Litríocht an 17ú agus 18ú hAois | Ainmeolaíocht na Gaeilge | Taithí Ghaeltachta

#### Bliain 3 - Roghnach

INTRA

#### An Bhliain Deiridh

### Deir ár gCuid Céimithe

Bhain mé an-taitneamh as mo cheithre bliana de bheith ag déanamh staidéir ar Ghnó agus Gaeilge. Thug an cúrsa seo an-chuid deiseanna praiticiúla dom, seachas a bheith ag déanamh staidéir ar leabhair an t-am ar fad. D'fhoghlaim mé an-chuid scileanna iontacha agus tá mé á gcur i bhfeidhm i mo phost reatha mar shainchomhairleoir sóisearach. Bhí an t-ádh orm a bheith ag déanamh cumarsáide agus a bheith ag obair le go leor saineolaithe gnó agus fiontraíthe móra le rá le linn bhliain deiridh mo chúrsa chomh maith. Mholfainn go fonnmar do dhuine ar bith é.

Eimear Mc Namee, Céimí BA Gnó agus Gaeilge

### Deiseanna Gairme

- An Fhiontraíocht
- Dearadh Bogearraí Gnó
- Meáin Chumarsáide na Gaeilge

# BA in Business and Irish (Irish-medium)

## Business and Irish – gain the skills to be creative and innovative

### Why DCU?

---

- Develop business, management, leadership and technology skills
- Improve your written and spoken Irish
- Take a novel and contemporary approach to the study of business and Irish
- Develop an interesting career for yourself, whether working with Irish or in a broad range of other sectors
- Demonstrate your ability through work experience and by developing your own business plan

### About You

---

You will be confident in your ability to communicate effectively through Irish. You will have an interest in business as well as information technology. What's more, you can identify the advantages that this combination will bring. Fiontar & Scoil na Gaeilge will provide you with a modern, dynamic learning environment and will help you to cultivate your leadership potential. You will be keen to take part in extra-curricular activities on and off campus. Students of Fiontar & Scoil na Gaeilge play an active role in University life and have participated in programmes such as the Washington Irish Programme, the Fulbright Scholarship programme, Enactus and Enterprise Ireland Competitions, as well as University-supported competitions and bursaries.

### Additional Requirements

---

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of O1 or H4 in Irish.

### Understanding: Business and Irish

---

Today's employers look for people with high-calibre business and information technology skills, but they also require people who can think and work 'outside the box'. They want dynamic individuals, people who can manage and who possess leadership qualities, and that's what this degree is all about. There is no comparable degree which offers students such an advanced course of studies in business, management and information technology, all through the medium of Irish. Employers support this approach, and the course has strong links with national and international companies and organisations. These links offer an impressive advantage over other graduates.

### Course Structure

---

Three main areas are covered by this course:

- Business and Management
- Business Information Technology
- Modern Irish

Years 1 and 2 develop these areas at DCU. You can then choose whether to complete a one-year work placement (INTRA) or go into your final year.

This is a broad academic and practical course suited to the modern business environment. There is particular emphasis on business, management, information technology and Irish, which are supported by modules in Strategic Management, Organisational Management and Conduct and Human Resources Management. You will develop your understanding of Irish and further your communication skills in written and spoken Irish. You will gain valuable experience working on group projects while also developing personally by using your imagination in a creative business context.

### INTRA

---

The year-long work placement will give you a unique opportunity to enhance your CV, increase your employability and apply your knowledge and skills in the real world. This option is competitive and subject to the availability of placements. For more information on the INTRA programme at DCU, please visit [dcu.ie/intra](http://dcu.ie/intra)

**Irish is the language of instruction on the course.**

## What Our Graduates Say

I thoroughly enjoyed my 4 years studying Gnó agus Gaeilge in DCU. This course has an amazing practical aspect to it, rather than having to learn solely from a textbook. I have been able to implement many of these skills in my new position as a Junior Consultant. During my final year in particular I was lucky enough to be mentored by, and work alongside some well-established entrepreneurs and business people, which is an opportunity that would definitely be harder to get on any other course. I would wholeheartedly recommend Gnó agus Gaeilge to anyone.

*Eimear McNamee Gnó agus Gaeilge*

## Future Careers

# BA in Applied Language and Translation Studies

## Gain competency in foreign languages and embrace translation studies

### Why DCU?

---

- Open up global career opportunities with two languages
- Gain a broad base of language, linguistics, cultural and translation studies
- Use multimedia texts and software applications to enhance your translation skills
- Spend a full academic year at a partner university abroad or on a work placement (INTRA)
- Gain top-quality language, translation and intercultural skills to meet the demand at home or abroad

### About You

---

If you have a passion for languages, wish to reach high levels of proficiency in your chosen languages and are interested in exploring the field of translation, this course is for you.

### Additional Requirements

---

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of H4 in French, German or Spanish.

### Understanding: Applied Language and Translation Studies (ALTS)

---

This is a unique degree in Irish higher education that aims to prepare a new generation of translators and language professionals for the challenges and opportunities of the 21st century. You will study two foreign languages with exciting combinations that include Chinese, French, German, Japanese and Spanish.

This dynamic degree allows you to explore the principles behind language, culture, translation and intercultural communication through a broad range of stimulating and innovative modules. You will use digital resources, and you will develop critical and creative thinking.

You will acquire professional and academic competencies as a linguist and a translator, allowing you to compete in the national and international marketplace. You will also acquire significant technical skills as you work with multimedia texts and a variety of software applications used by translators. The degree is delivered by experts in the field and has been running successfully for over 30 years.

ALTS is an all-round course that equips you with the necessary skills while allowing you to enjoy your passion for languages.

### Course Structure

---

The languages available on the BA in Applied Languages and Translation Studies are:

- Chinese
- French
- German
- Japanese
- Spanish

You will select two languages from Chinese, French, German, Japanese and Spanish as well as foundation modules in linguistics, culture and translation studies. You will take either two intermediate languages, or one intermediate and one beginner-level language. You will have the possibility to focus on one of your chosen languages from Year 3 of your degree, if you wish to do so.

Please note that Chinese and Japanese are offered at beginner level only (students with Leaving Certificate Japanese take two intermediate Japanese modules in Year 1). French is offered at intermediate level only. German and Spanish can be taken at either intermediate or beginner levels.

### Year Abroad

---

Studying abroad provides a wonderful opportunity to experience the culture of another country and greatly enhances your language skills. Those who meet certain criteria and wish to go abroad will spend Year 4 studying at one of our partner universities. In Year 3 you will conduct independent research for your dissertation and take courses in language and translation that will provide you with a strong foundation to make the most of your time abroad.

### INTRA

---

Alternatively, in Year 4, you may opt to apply for a year-long work placement in Year 3. This will give you a unique opportunity to enhance your CV, increase your employability and experience the relevance of your study in the real world. This option is competitive and subject to the availability of placements. For more information on the INTRA programme at DCU, please visit [dcu.ie/intra](http://dcu.ie/intra)

**Additional Information**

Please see page 243 for information on estimated costs and financial support available if part of your course requires you to study abroad.

**What Our Current Students Say**

Applied Language and Translation Studies is the perfect course for anyone interested in learning languages and how they are applied in translation. Before joining this course, I had no idea how vast and fascinating translation is. During the introductory translation modules in Year 1, I learnt that there are so many different areas of translation such as video game localisation, where the translator has to be involved with every aspect of a project, not just the words in a document. While the focus of the course is on improving your language skills, there are also modules about the cultures, films and literature in your chosen languages, which help you have a deeper understanding of them. Studying two languages at the same time can be demanding or challenging at times, but DCU staff and lecturers are always understanding and ready to help.

*Maja Glaz, BA in Applied Languages and Translation Studies*

- Public Service
- Education

Look online (website details at top of page) for more information about future careers in your chosen field.

# BA in Economics, Politics and Law

## Understand the political, legal and economic principles that explain how the world works

### Why DCU?

---

- Build a foundation in three disciplines: economics, politics and law, that interconnect in ways that explain how public policy work
- Gain the cross-disciplinary skills that employers demand in communication, critical thinking, teamwork and research
- Year 1 modules in research and study skills to help you get the best out of your degree
- Option to spend a year studying abroad or working on an INTRA work placement
- Lecturers who are experts in governance, economics, and law and society

### About You

---

Are you interested in how the world, countries and societies work? Would you like to know more about the political, legal and economic forces that shape our world? By studying on the Economics, Politics and Law degree course, you will learn how these disciplines interact and help to shape the local and global worlds in which we live.

### Additional Requirements

---

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of O4 or H6 in Mathematics.

### Understanding: Economics, Politics and Law

---

Any social problem we can think of has solutions. But those solutions are grounded in economics, politics and law. The BA in Economics, Politics and Law (EPL) provides an intellectually challenging course that explores various issues and methods of analysis in the disciplines of economics, politics and law. The importance of these disciplines in contemporary society is obvious. The course will give you a deep and thorough understanding of the political, legal and economic institutions that shape the world, and you will gain a profound awareness of how these three disciplines are bound together.

### Course Structure

---

In Years 1 and 2, there is an equal weighting of the three disciplines of economics, politics and law. In the final year, you take a core module in each discipline. Beyond that, you are free to specialise in one of the three disciplines or continue to study a combination of all three. Research methods modules taken in Year 1 will provide core learning skills that you will use throughout your degree. Year 2 and final year, further modules will enhance your knowledge of research methods and dissertation skills. These skills will provide you with the tools to analyse major issues affecting our world today from an economic, political and legal perspective.

The BA in Economics, Politics and Law is normally a three-year course. However, you can elect to spend an extra year abroad or work on an INTRA work placement in Year 3.

### INTRA

---

You can opt to apply for a year-long paid work placement in Year 3. This will give you a unique opportunity to enhance your CV, increase your employability and experience the relevance of your study in the real world. This option is competitive and subject to the availability of placements. For more information on the INTRA programme at DCU, please visit [dcu.ie/intra](http://dcu.ie/intra)

You then complete the final year of your course in DCU.

### Additional Information

Graduates will be eligible for entry to the Law Society of Ireland as trainee solicitors on successful completion of the relevant entrance exams, as the course covers all subjects for the entrance exams.

### Contact Details

E [studenthelp@dcu.ie](mailto:studenthelp@dcu.ie)

## What Will I Study?

### Year 1

Constitutional Law | Introducing Politics | Mathematics for Economics | Introduction to Microeconomics | Data Analysis | Introduction to European Integration | Introduction to US History and Politics | Introduction to Macroeconomics

### Year 2

Intermediate Microeconomics | The Irish Political System | The Law of Contract | European Union Law | Criminal Law 1 | Intermediate Macroeconomics | Public Finance | Global Political Economy | Political Ideologies | Advanced European Union Law

### Final Year

(Year 3 or 4, depending on whether you choose to spend Year 3 abroad, on INTRA or completing your course at DCU.)

You may choose to specialise in the final year or continue to study a mix of disciplines from the options available.

### Core Modules:

Topics in Applied Economics | Issues in European Law | Public Policy

### Options Include:

Dissertation | Uaneen Award: DCU's Leadership and Engagement Module

### Economics Specialism:

Economics Estimation and Analysis | Financial Markets | Development Economics | Industrial Economics | Public Choice | Urban and Regional Economics | Financial Theory | International Trade and Business | Mathematics of Finance: An Introduction

### Politics Specialism:

Post-Soviet Politics | The Politics of Sub-Saharan Africa | The Politics of South Asia | Unrecognised States in the International System | Nationalism and Populism | Issues in American Politics | Issues in European Integration | Contemporary Politics of the Middle East and North Africa | The Politics of Migration in Europe | Money and Politics in Comparative Perspective

### Law Specialism:

Property Law 1 and 2 | Law of Torts 1 and 2 | Employment Law | Administrative Law | Company Law | Family Law | Advanced Company Law | Law of Evidence | Jurisprudence 1 and 2 | Principles of Equity and Trust | International Trade Law | Climate Change Law

If Year 3 is spent abroad, or on INTRA, the Year 4 is structured as per Year 3.

## In These Areas

- Public Service
- Private Industry
- International and European Institutions

Look online (website details at top of page) for more information about future careers in your chosen field.

## What Our Graduates Say

I chose Economics, Politics and Law because I wanted a deeper understanding of how societies function. We learn about how people come to make decisions and interpretations and how these actions influence our economic, political and legal frameworks and institutions. What is really great is that you will have the option to do an INTRA placement or Erasmus in third year, which will give you a competitive edge when you graduate against other social sciences students in Ireland who have not had a paid work placement. My experience in DCU has been incredible. I have travelled abroad with societies, worked alongside media giants like RTE and the Irish Times, and gained skills that I know will be invaluable for my future career.

Aisha Siwar, BA in Economics, Politics and Law (EPL)

# BA in International Relations

Calling all curious, open-minded, independent thinkers who want to know how the world really works (and how to change it) – this is the degree course with global career opportunities for you

## Why DCU?

- Take a global perspective on what makes society work and how its various actors interact with one another
- Apply your study and research skills to a major independent project
- Gain the skills employers are looking for – such as communication, critical thinking and teamwork
- Choose to spend a year studying abroad or undergoing an internship as part of your degree
- DCU is a leading centre for expertise in International Relations, with lecturers involved in work on global issues such as peace studies and climate change

## About You

Do you have an interest in major world issues? Would you like to know more about how politics, economics and security work in contemporary societies? If you are keen to learn, to analyse and to understand current affairs across the world, then you will enjoy the challenge of this degree course.

## Additional Requirements

The general entry requirements for admission to the University apply (see page 232). If you wish to register for one of the language streams, then a minimum of H4 in French, German or Spanish is required.

## Understanding: International Relations

You will explore a variety of issues and debates in global politics, and will also find out about the forces that shape contemporary societies. You will learn about such issues as peace, security, terrorism, globalisation, international law, third-world debt and American foreign policy. You will also study contemporary global governance, multilateral affairs, and international organisations; such as the European Union and the United Nations.

By the end of this unique and innovative course, you will have learned about international politics, development and regional studies from a global perspective, and will have developed oral and written communication skills, team-work skills, research techniques and ability in analytical and critical thinking.

## Course Structure

The variety of optional modules available gives you plenty of flexibility in what you choose to study alongside the core elements.

Optional modules start in Year 1, so you can choose to take either the Main or the Language stream (choose from intermediate French, German or Spanish). The stream you choose will then run for each of the three years of your degree.

This is normally a three-year course. However, you may elect to spend an extra year abroad in one of our partner universities in China, the Czech Republic, France, Germany, Hungary, Poland, Scotland, Spain, Sweden, Turkey or the USA. This is an excellent opportunity to enhance your educational and social experience at first hand. You then complete the final year of your course at DCU.

## INTRA

You can opt to apply for a year-long work placement in Year 3. This will give you a unique opportunity to enhance your CV, increase your employability and experience the relevance of your study in the real world. This option is competitive and subject to the availability of placements. For more information on the INTRA programme at DCU, please visit [dcu.ie/intra](http://dcu.ie/intra)

**Additional Information**

# Bachelor of Civil Law – BCL (Law and Society)

## Learn about the social forces that affect law and the legal process

### Why DCU?

---

- Dedicated team of highly qualified committed law lecturers with strong research expertise
- Critical socio-legal perspectives embedded within the delivery of all law subjects
- Focus on experiential learning and practical legal skills
- Innovative modules that equip you with knowledge of cutting-edge issues that are re-shaping the law and legal profession
- Option to complete in three or four years with study abroad or work placement opportunities
- Key emphasis placed on important transferable skills, including research skills and oral and written communication skills, at all stages of the course

### About You

---

Are you interested in law and the legal process? Do you enjoy problem solving and want to know more about the role law plays in the regulation of society? Do you want to develop important research, analytical and presentation skills? On the BCL (Law and Society) degree you will learn about the law and the social forces that affect law and the legal process, and will engage critically with the possibilities of law reform.

### Additional Requirements

---

The general entry requirements for admission to the University apply (see page 232).

### Understanding: BCL (Law and Society)

---

The BCL (Law and Society) at DCU is a cutting-edge law degree that will give you an understanding of how the legal process operates and how law influences and is influenced by a diverse range of social forces. It combines innovative teaching of all the foundational law subjects (e.g. constitutional law, contract law, criminal law, etc.), with critical perspectives on the nature of these subjects, on the practice of law and on the wider role of law in society in the 21st century. The degree also focuses on experiential learning and developing practical legal skills, and provides many opportunities for engagement in industry and the wider legal profession.

In addition to learning core legal rules and principles, you will learn to reflect critically on how these are shaped and influenced. The course will prepare you for a career as a lawyer. But the skills you develop will also be helpful for a range of careers outside the legal professions. This BCL (Law and Society) is an approved degree for Kings Inns.

### Course Structure

---

The BCL (Law and Society) degree covers all foundational law modules and some additional modules not usually found on undergraduate law degrees. Rather than being stand-alone modules, the questions of how law affects society are woven into core law modules. This three-year course consists of a mixture of compulsory and optional modules. In Year 1, all modules are compulsory. In Years 2 and 3, there are some compulsory modules but you will also get to choose from a range of optional modules.

### Year Abroad

---

The BCL (Law and Society) is normally a three-year course. However, you can opt to spend an extra year abroad in one of our partner universities in Belgium, China, Poland, Scotland, Spain or USA. This is an excellent opportunity to experience life in another country and to study another legal system. After you complete the year abroad, you will do the final year of your course at DCU.

### INTRA

---

A further option is to spend your Year 3 completing an INTRA placement, after which you will complete the final year of your degree in DCU. We have placement opportunities with law firms, corporations and public bodies in Ireland. This is a great opportunity to enhance your employability and develop your talents.

**Additional Information**

Please see page 243 for information on estimated costs and financial support available if part of your course requires you to study abroad.

# BA in Social Sciences and Cultural Innovation

## Explore sociology, media and politics while acquiring key 21st century skills

### Why DCU?

- Unique modules from the Social Sciences relating to Sociology, Media, Politics and Innovation
- Flexibility and focus, specialising as you progress through the course
- Innovative modules focused on developing key transferable skills for 21st century work and life
- Opportunity for a study year abroad or a one-year paid work placement (INTRA)
- Focus on applying knowledge in creative and effective ways

### About You

If you are interested in exploring how culture, sociology media and politics shape our world and identity, curious about what drives innovation and future trends, stimulated by learning how to design creative approaches to social issues, and keen to develop the knowledge, skills and abilities that enable you to carve out your own career path, then this is the course for you.

### Additional Requirements

The general entry requirements for admission to the University apply (see page 232).

### Understanding: Social Sciences and Cultural Innovation

The BA in Social Sciences and Cultural Innovation brings an applied focus to the Social Sciences, in particular the disciplines of Sociology, Media and Politics, as well as newer areas such as Social Entrepreneurship and Cultural Innovation.

The course also prioritises skills such as Creativity, Leadership, Ethical and Critical Thinking, Digital Literacy, Intercultural Communication and Future Thinking. Furthermore, you have the possibility of

studying abroad for one-year or doing a year-long paid work placement (INTRA) where you can gain valuable experience. At its core, the BA in Social Sciences and Cultural Innovation aims to help you develop the knowledge, skills and abilities needed for your personal and career development, and empowers you to pursue your goals with passion, professionalism and purpose.

### Course Structure

The course is structured around three specific pillars, comprising both core and optional modules, relating to the study of Sociology, Media and Politics.

#### (i) Self, Society and Innovation:

Explore the meaning and power of culture; study key social identities such as gender, nationality, ethnicity and social class; examine the drivers and impacts of globalisation and mass migration; identify local, national and global challenges; and develop creative strategies to address these.

#### (ii) Media, Messaging and the Digital World:

Examine the hugely influential role played by media and technology in society; analyse advertising and other media outputs; study the history of journalism and how it is evolving; explore the challenges and opportunities facing traditional and new media in the 21st century, including the ever-increasing role of social media and digital platforms.

#### (iii) Politics, Power and Internationalisation:

Learn about national and international political systems; reflect on the concept of power in personal, political and economic relations; consider how various innovations influence how citizens engage with politics; examine political ideologies and conflicts from around the world; explore diverse approaches to international security and political terrorism.

In each year of the course you will take modules from all three pillars, with the choice of options increasing annually. In the final year you choose to specialise in one pillar, while continuing to study the other and you will also have the opportunity to do in-depth research on a particular topic of interest. Throughout the course you will do a variety of modules focusing on essential transferable skills, and from the outset your career development is given attention.

With unique modules covering topics ranging from applied ethics to social psychology, multiculturalism to social innovation, and gender to creative thinking, the BA in Social Sciences and Cultural Innovation is designed to help you stand out, rather than simply fit in, whatever your choice of career may be.

After Year 2, you can opt for a year of study in one of our overseas partner universities, or apply for a year-long paid work placement (INTRA). Availing of this option makes it a four-year course, and adds significant value to the student experience at multiple levels.

### Year Abroad

Our international partner universities are either based in an English-speaking country or are European universities where modules are delivered through English. Currently, we have partnerships in Australia, Czech Republic, France, Germany, Lithuania, Malta and Spain.

### INTRA

The year-long paid work placement will give you a unique opportunity to enhance your CV, gain experience, develop a professional network, increase your employability and apply your knowledge and skills in the real world. This option is competitive and subject to the availability of placements. For more information on the INTRA programme at DCU, please visit [dcu.ie/intra](http://dcu.ie/intra)

### Additional Information

The degree also provides a strong foundation for further study.

### What Will I Study?

The following list includes core and optional modules:

#### Core Modules

##### Year 1

Introduction to Communication Studies |  
Analysing Visual Media Tests | Cultural  
Studies | Power, Self and Society |  
Contemporary Cultural Debates |  
Interculturalism in Practice | Introduction  
to Modern Ireland | Introduction to Politics |  
Introduction to International Relations and  
Security

##### Year 2

Social Psychology | Journalism History |  
Ireland, Sex and Text | Global Cultures |  
Social Innovation and Entrepreneurship |  
The Making of Contemporary Europe |  
Political Ideologies

#### Optional Modules

Theorising Social Media in everyday Life |  
Social Class in the Media | Intelligence  
National Security and Foreign Policy |  
Changemakers: Service Learning |  
Analysing Advertising | Crime, Policing  
and the Media | Women Feminism and the  
Creative Cultural Industries | Introduction  
to Gender Studies | Perspectives on the  
Networked Society

##### Year 3

Optional Study Abroad / INTRA

### What Our Graduates Say

My time in BA in Social Science and Cultural Innovation has been so rewarding. I found it difficult to find a course that covered all the subjects I was interested in - politics, culture, sociology, media studies and on this course I was able to explore these subjects and more. The course also offers the opportunity to study abroad or take part in DCU's INTRA programme which was super appealing when deciding what to put on my CAO. I've found the course to be engaging, unique and manageable. Overall, I've made some great friends, enjoyed new and exciting experiences, and learned how to think critically and outside the box thanks to my course.

*Eve McSweeney, BA in Social Science and Cultural Innovation*

#### Final Year

Creativity and the Emerging Future | Issues  
in Multiculturalism | Politics of Sub-Saharan  
Africa | Communication Culture and the  
Environment | Dissertation

#### Optional Modules

Media Law | Television Drama | Press  
and Public Relations | Perspectives on  
International Children's Literature | The  
Politics of Migration in Europe | Science,  
Technology and Society | Climate Change  
and the Media | Sexualities, Languages  
and Society | Conflict Resolution in  
Northern Ireland | Nationalism and  
Populism in the 21st Century | Representing  
Otherness | Anglo-Irish Literature: The  
Novel and the Short Story | Languages of  
Business and Media Across Cultures | Post  
Soviet Politics | Politics of South Asia | Issues  
in American Politics | Contemporary Politics  
of the Middle East and North Africa |  
Uaneen Award: DCU's Leadership and  
Engagement Module

Optional modules are chosen subject to  
timetabling constraints.

Follow us

@DCUEngineering

@DCUComputing

Recognised nationally and internationally for the outstanding quality of its courses, our Faculty focuses on preparing you to pursue careers in the engineering and ICT (information, communication and technology) sectors.

Work placement is a very successful and beneficial part of all our courses, particularly as it is highly attractive to employers. Before completing their studies, our students get the opportunity to work with some of the biggest and best companies in engineering, computing and related sectors.

Choosing a DCU degree in engineering or computing will give you the critical knowledge and skills you need to flourish in the technological society of the 21st century.

# BEng and MEng in Mechanical and Sustainability Engineering

## Engineer a better future for all

### Why DCU?

- Industrial experience as part of the course, with the option of a 10 month paid work placement under the MEng programme
- Lots of hands-on experience in labs with state-of-the-art facilities
- Great employment prospects upon graduation
- Option to select Integrated Masters in Year 3 and obtain a Masters degree
- Sustainability is at the core of DCU's University Strategy
- Going forward course will be eligible for accreditation by Engineers Ireland (guaranteeing high-quality tuition and worldwide recognition)

### About You

Do you have a passion to engage with and solve some of the greatest global challenges, including climate change, for future generations. Are you interested in understanding how to design, develop and implement knowledge and technology in a creative and ethical way for long term sustainability. Similar to most engineering degrees, ability in mathematics is a key requirement. An interest in problem solving, how things work, a logical mind and an eye for detail are also important qualities.

### Additional Requirements

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of H4 in Mathematics or H4 in Applied Mathematics with H5 in Mathematics.

### Understanding: Mechanical and Sustainability Engineering

This course prepares graduates with the knowledge and competence to meet the changing world of sustainability and the growing global challenge of transitioning to zero carbon and environmentally sound, reliable, affordable sustainable energy systems.

Planet earth is facing enormous challenges that demand innovation and specialised skills. Engineers have an important role to play in developing solutions that will help make our world more sustainable. Complex challenges require engineers who understand the environmental impact of our engineering activities, and can use tools and methods, design and implement technologies to mitigate our environmental impact. The BEng in Mechanical and Sustainability Engineering provides graduates with a strong foundation in mechanical engineering and prepares graduates to meet current and future global challenges of sustainability and decarbonisation.

All our final year students (Years 4 and 5) in the Faculty of Engineering and Computing have the opportunity to showcase their final year projects to interested employers at the end of their final semester.

### Course Structure

This four-year BEng Degree (with the option to undertake an integrated Masters degree from Year 3 subject to achieving H2.2 or higher in Years 1 and 2) has a range of academic themes, with each theme addressing a particular aspect of sustainable systems and energy engineering.

These themes are:

- Mathematics, Data Analytics and Modelling
- Thermofluid sciences
- Sustainable System Design and Integration
- Renewable, Sustainable Systems and Decarbonisation (energy, water and resource management)
- Engineering Management, Economy and Sustainable Society

The course places a strong emphasis on both academic performances in examinations and continuous assessment throughout the five years. In Year 3, you will undertake a paid work placement (INTRA) for 6 months (10 months for Integrated MEng students). This is usually with a business in Ireland but there are also opportunities to work abroad.

**Additional Information**  
This 4 year course will be accredited by Engineers Ireland.

# Common Entry into Engineering

## Become an inventor, a designer, a creator

### Why DCU?

---

- State-of-the-art facilities
- Lots of hands-on experience in labs
- Industrial experience as part of the course
- Great employment prospects upon graduation
- Option to complete a fifth year and obtain a Masters degree

### About You

---

Do you have interest in problem solving, have an enquiring mind, want to know how things work? Do you have an eye for detail and want to be educated for the future in industry? An ability in mathematics is an important quality for all engineering courses at DCU.

### Additional Requirements

---

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of H4 in Mathematics or H4 in Applied Mathematics with H5 in Mathematics.

### Understanding: Common Entry into Engineering (Undenominated Entry)

---

Of all the courses and careers you can pursue, engineering is one of the most exciting. Engineers invent and design things, they make systems work, and they analyse and solve problems in all sorts of fields. For example, one of the most recent emerging areas is the application of electronic and mechanical engineering to biology and life sciences. Engineering solutions help patients with better diagnostic imaging, improved hearing devices, better blood vessel implants and new laser surgery techniques.

Engineering solutions continue to improve the way we live, leading to innovation engineering advances in digital technology. Engineers also improve sustainability by focusing on aspects such as energy efficiency and renewable energy applications. Some of the most recent and exciting innovations in the energy sector, including wave energy converters, bioreactors and combined heat and power units, are also the work of engineers. But the list of engineers' achievements is much broader. As an engineer, you can find yourself at the heart of just about any field, from high-tech industry and medicine to financial services, energy-aware technologies and biotechnology – the cutting-edge dynamic industries of tomorrow.

Many students choose to go directly onto one of our five engineering courses. However, if you are unsure which to opt for, the Common Entry into Engineering (Undenominated Entry) option is specially designed to help you find the course most suitable for you while studying the fundamentals of engineering.

After Year 1, which is common to all five engineering degree in DCU, you can pick the course you want to pursue. (Note, however, that places on certain courses may be limited and may be allocated according to performance in Year 1.)

### Course Structure

---

The Common Entry into Engineering (Undenominated Entry) offers a common first year for all our engineering courses. On completion of the common Year 1, you may choose one of the following honours degrees:

- BEng and MEng in Electronic and Computer Engineering (DC190)\*
- BEng and MEng in Mechatronic Engineering (DC193)\*+
- BEng and MEng in Mechanical and Sustainability Engineering (DC194)+
- BEng and MEng in Mechanical and Manufacturing Engineering (DC195)+
- BEng and MEng in Biomedical Engineering (DC197)+

\* offered by the School of Electronic Engineering

+ offered by the School of Mechanical and Manufacturing Engineering

You will find further details of these courses in the following pages. Please note that following the common entry route does not mean adding an extra year to the course. After completing the one-year Common Entry into Engineering course, you continue in Year 2 of your chosen degree course.

### Additional Information

One-year only; allows entry to Year 2 of four-year Honours Bachelor or five-year Masters programmes.

# BEng and MEng in Electronic and Computer Engineering

## Gain the knowledge and skills to be at the heart of innovation

### Why DCU?

---

- Challenge yourself to meet the technologies of the future - sensors, robotics, VR interfaces and more
- Hands-on experience – lab and project work throughout, plus a 6-month paid work placement (INTRA) in Year 3
- Great employment prospects at home or abroad
- Add an MEng in Year 5 to increase your options
- Course accreditation by Engineers Ireland, guaranteeing high-quality tuition and worldwide recognition

### About You

---

An electronic and computer engineer is a problem solver by nature – a person who wonders about how things work and how to make them correctly. Mathematics is the universal language of engineering, and you will need to be comfortable with logical and methodical approaches to understanding real-world phenomena.

You also need a thirst for knowledge and a drive to contribute to society, which will lead to constant learning and innovation throughout your career. It's no surprise that 33% of top chief executive officers on the Standard & Poor 500 stock market index hold undergraduate degrees in engineering – higher than any other discipline. By comparison, only 11% have degrees in business administration.

### Additional Requirements

---

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of H4 in Mathematics or H4 in Applied Mathematics with H5 in Mathematics.

### Understanding: Electronic and Computer Engineering

---

How can you use technology to improve people's lives, health, environment and leisure? Electronic and computer engineers create and innovate to invent, design, improve and build products and technologies that really matter in people's lives.

More than any other discipline, electronic and computer engineering has been at the heart of generating the technology of our modern society. However, there are still major global and societal problems to be solved. You can be sure that, because of their knowledge and skills, electronic and computer engineers will be at the forefront in creating solutions. Whether they are dealing with problems of clean water, energy supply, global warming, nutrition or health, electronic and computer engineers find solutions and also lead the teams who tackle the job.

Fields you could work in include sensors; medical devices; communications (wireless, wired, optical); electronic and computer interfaces; mobile devices; new interfaces (3D, VR); artificial intelligence; computer vision; robotics; materials; and many more.

A Higher Leaving Certificate in Mathematics and (where available) a Leaving Certificate in Applied Mathematics, can indicate your ability for electronic and computer engineering.

# BEng and MEng in Electronic and Computer Engineering

## Gain the knowledge and skills to be at the heart of innovation

### Course Structure

Teaching methods include conventional lectures, extensive tutorials (particularly in Year 1), laboratory exercises and projects. Through these you will develop the ability to model and analyse the dynamics of a wide range of technological systems, as well as learn a creative and innovative approach to problem solving.

The curriculum of Years 1, 2 and 3 and the core modules in Year 4 are common to all ECE students. In Year 4, you select a major option and gain relevant skills through major-specific modules and an individual undergraduate project. The options for majors reflect modern trends in electronic and computer engineering and research priorities within the School of Electronic Engineering. Currently the course offers the following four majors, which we will adapt over time so that our graduates always have the most relevant and up-to-date technology and expertise:

- ECE with a Major in Systems and Devices – This is a specialisation in core electronics and semiconductor technologies, which underpin a range of research priority areas including sensors, diagnostics, medical devices, digital control of mechatronic systems, optical communications and novel materials
- ECE with a Major in High-Speed Communications – This specialisation focuses on devices communicating to devices at high speed, for example optical networks and high-speed wireless technologies. It underpins research on next-generation networks that support evolving demands from devices and applications

- ECE with a Major in Digital Interaction – This is about humans communicating to devices, and devices communicating to the world. It underpins research in human-machine interfaces. Key Year 4 modules in this area include Human Computer Interface Technology, Web Application Development, and Image Processing and Analysis
- ECE with a Major in the Internet of Things – The internet has transformed the world of human access to knowledge and information in unimaginable ways. Now the Internet of Things is about to transform the man-made environment we live in. It focuses on devices communicating to and through the internet. This major prepares you for research on smart cities and energy-efficient devices and networks

You will have the opportunity to do an individual major-relevant capstone project in Year 4. Your project will allow you to work in a specialist area of your choosing and to apply the electronic and computer engineering skills that you will have acquired. You can demonstrate your innovative capabilities, capacity for independent learning, and technical expertise. All our final year students (Years 4 and 5) in the Faculty of Engineering and Computing have the opportunity to showcase their final year projects to interested employers at the end of their final semester.

In addition to the traditional engineering focus on mathematics and design, a strong software and programming theme runs through our ECE course. In this you will learn about, C, C++, Java, embedded systems, Linux and Windows operating systems, data structures and algorithms, hardware description language, object-oriented programming and, in two of the Year 4 majors, web application development. This thematic strength reflects an enduring need in industry for software specialists who have a strong knowledge base in electronics, systems, signal processing and hardware interfacing.

The 6-month paid work placement (INTRA) in Year 3 is usually a paid engineering internship with a business in Ireland, but some students may go abroad or be placed in research positions within DCU. Some of the biggest companies in the world offer INTRA placements to our ECE students, including IBM, Philips, Google and Microsoft.

Other recent INTRA employers with a global reach include Xilinx, Cisco, Synopsys, AOL, Analog Devices, Mastercard, Deloitte and Touche, Accenture, SAP Ireland, Cypress Semiconductor Ireland, Tektronix Communications and Xerox. Degree-relevant work experience obtained on an INTRA placement can give you a big advantage when you are seeking a position as a graduate engineer.

## What Our Current Students Say

The BEng in Electronic and Computer Engineering is a mixture between computing science and electronics engineering. It is perfect for students that like to challenge themselves, as the course offers a lot of practical experiments (self-driving cars/workings with small electronics) based on the theory studied in class. You also get to complete a 6-month internship in Year 3, which will provide a good insight into how an engineer works.

*Edy Nastase, BEng and MEng in Electronic and Computer Engineering*

# BEng and MEng in Mechatronic Engineering

## You can move the world

### Why DCU?

- Learn exciting new technologies in an innovative environment
- Hands-on lab and project experience throughout, plus a 6-month paid work placement (INTRA) in Year 3
- Career opportunities with the technologies of the future – automation, robotics, medical systems and more
- Great demand for your skills at home or abroad
- Course accreditation by Engineers Ireland, guaranteeing high-quality tuition and worldwide recognition

### About You

A mechatronic engineer is a problem solver by nature. Mathematics is the universal language of engineering, and you will need to be comfortable with logical and methodical approaches to understanding real-world phenomena.

### Additional Requirements

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of H4 in Mathematics or H4 in Applied Mathematics with H5 in Mathematics.

### Understanding: Mechatronic Engineering

More and more aspects of the world around us are becoming automated, with labour-saving machines, 'always on' connected devices and robots able to perform tasks more quickly and accurately than humans. In these complex machines, huge numbers of finely tuned moving parts are precisely controlled in real time by state-of-the-art electronics. Just consider the machines you use on a daily basis - from cars to cash machines - how many moving

parts are involved. Such machines are examples of mechatronic engineering, the science that combines mechanical engineering, electronic and computer engineering and software design to create intelligent machines. In the connected world of the Internet of Things (IoT), machines interact via the internet with the electro-mechanical physical world and the virtual world of software. The skills of mechatronic engineering are key to making this happen.

Wherever your interests lie, mechatronic engineering has immense potential. You could soon be designing safer cars, building labour-saving intelligent robots or interfacing the mechanical and electronic parts of renewable energy systems.

A Higher Leaving Cert in Mathematics and Leaving Cert in Applied Mathematics, are excellent indicators of ability in the field of mechatronic engineering.

### Course Structure

This four year BEng (Honours) degree with the option to undertake an integrated Masters degree from Year 3 (subject to achieving a H2.2 or higher in years 1 and 2) has 8 academic themes addressing a particular aspect of Mechatronic Engineering. It aims to produce graduates with knowledge, understanding and skills in mechatronic engineering. It begins with fundamental scientific principles and leads through to a set of modules dealing with the design, analysis, manufacture and modelling of electromechanical products and systems.

The undergraduate course focuses on eight core areas over four years. These are:

#### Basic Science and Mathematics

You study the basic sciences and engineering mathematics that underpin mechatronic engineering.

#### Electronic Circuit and Systems Design

Electronic components and systems are explored through modules on electronics and modules on analogue and digital circuits and systems.

#### Mechanical Systems Design and Analysis

Materials engineering, fundamentals of mechanics, strength of materials and the mechanics of machines lay a foundation for the design and analysis of mechanical components and systems.

#### Software

Software design and analysis are an integral part of mechatronic engineering. You take modules introducing general techniques of software development in Years 1 and 2, with a focus on embedded systems in Year 2. You are also introduced to specific software tools (such as Matlab and Labview) throughout a range of modules and project work.

#### Mechatronic/Electromechanical System Design

This course brings together the disciplines of mechanical engineering and electronic engineering over the four years. Modules such as the Year 1 project, the Year 3 group project and the Year 4 project are designed to develop mechatronic skills and awareness. Another core area of mechatronic engineering is the design of electromechanical systems – systems that consist of both electrical and mechanical elements. A substantial part of the final year is devoted to the design, simulation, analysis and control of such systems. The Mobile Robotics module is entirely project-based and embodies the key principles of mechatronic engineering.

Contact Details  
E studenthelp@dcu.ie

Visit Us Online  
dcu.ie/DC193

It is organised around a specific robotic design challenge and will give you an opportunity to integrate and expand your knowledge in several different core areas: digital and analogue electronics, mechanics, software development and control systems.

### Automated Manufacture

Another core area of mechatronic engineering is the use of electronics, embedded systems and software in the automation of manufacturing and assembly. Year 4 places a significant emphasis on autonomous technology and manufacturing automation.

### Project based Learning

You will complete various projects during your four years, culminating in a major individual project in Year 4. The projects will normally include elements of research, design, component sourcing, construction, testing and documentation. All projects must be based on at least two of the three core mechatronic elements (namely, mechanical, electronic and software design components).

### Experiential Learning

In Year 3 you undertake a paid work placement (INTRA) for 6 months. This is usually with a business in Ireland, but opportunities may arise abroad and there are also some research positions within DCU.

### What Will I Study?

#### Year 1

Engineering Mathematics 1 and 2 | Engineering Mechanics - Statics | Project and Technical Drawing | Materials Engineering | Introduction to Electronics | Fundamentals of Professional Development | Numerical Problem | Basic Sciences | Software Development

#### Year 2

Engineering Mathematics 3 and 4 | Energy | Strength of Materials 1 | Digital and Analogue Electronics 1 | Object-Oriented Programming (OOP) 1 | Circuits | Mechanics of Machines 1 | Energy: Thermodynamics | Design and CADD | Systems | Embedded Systems | Pneumatics and Control

#### Year 3

Product Design | Data Analytics for Engineers | Measurement and Signal Processing | Electromechanical Systems | Mechanics of Machines 2 | New Enterprise Development Project | Analogue Circuits and Design | Mobile Robotics | INTRA

#### Year 4 (BEng)

Project | Manufacturing Automation | Control Systems Analysis | Image Processing and Analysis | Industrial Electronics | Project and Quality Management | Mechatronic System Simulation and Control | Robotics | Design for Manufacture and Assembly | Uaneen Award: DCU's Leadership and Engagement Module

#### Year 4 (MEng)

Project Planning and Research | MEng Project Design | Entrepreneurship for Engineer | INTRA (part 2) | Digital Filters and DFT | Design for Manufacture and Assembly | Mechanical Engineering Systems Simulation | Uaneen Module (Extra-Curricular Activities)

#### Year 5 (MEng)

Image Processing and Analysis | Year 5 Project | Computer Vision | Manufacturing Automation | Robotics | Control Systems Analysis | Mechatronic Systems Simulation and Control | Data Analysis and Machine Learning | Power Electronics

# BEng and MEng in Mechanical and Manufacturing Engineering

## Through design and production, engineers enable our day-to-day lives

### Why DCU?

---

- 6 month industrial experience as part of the course, with the option of a 10 month placement under the MEng programme
- Lots of hands-on experience in labs with state-of-the-art facilities
- Great employment prospects upon graduation
- Option to select Integrated Masters in Year 3 and obtain a Masters degree with optional majors in: Sustainable Systems and Energy or Simulation Driven Design

### About You

---

Do you question what the future will look like, do you wish to design a better future for mankind, well engineers are designing that future? Are you interested in being an experienced game changer fit for industry and the digitalisation of industry then you should choose Mechanical and Manufacturing Engineering.

### Additional Requirements

---

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of H4 in Mathematics or H4 in Applied Mathematics with H5 in Mathematics.

### Understanding: Mechanical and Manufacturing Engineering

---

Mechanical and Manufacturing engineering go hand in hand, but each is quite distinct. Mechanical engineering focuses on the efficient use of material, strength, structure, movement in the manufacture and operation of products and systems. Manufacturing engineering, meanwhile, concentrates on converting materials from one form to another, the processes and systems, ranging from basic assembly (e.g. inhalers) to high-tech manufacture (e.g. electric vehicles).

With the two disciplines combined, this degree offers an impressive background in engineering, which opens the door to many exciting career opportunities. It enables you to apply the most sophisticated computer tools to meet the traditional challenges of mechanical and manufacturing engineering.

All our final year students (Years 4 and 5) in the Faculty of Engineering and Computing have the opportunity to showcase their final year projects to interested employers at the end of their final semester.

### Course Structure

---

The four-year BEng (Honours) degree has four academic themes, with each theme addressing a particular aspect of mechanical and manufacturing engineering. These themes are:

- Fundamental Skills - Mathematics, Computing, Data Analytics, Simulation
- Engineering Mechanics - Machines, Materials, Thermofluids, Dynamics and Control
- Design and Manufacture - Product Design, Manufacturing Processes and Systems, Lean and Six Sigma
- Professional - Project Management, Professional Development, Work Placement, Ethics

An average mark over 50% in Years 1 and 2 gives you the option to transfer to the integrated 5-year Masters programme where, in addition to the longer paid work placement (INTRA) for 10 months, the extra modules in the Year 5 allows you a choice to graduate with a Major in Simulation Driven Design or Sustainable Systems and Energy. Students graduating from the integrated MEng degree will simultaneously receive their BEng degree. The course places a strong emphasis on both academic performances in examinations and continuous assessment throughout the five years.

In Year 3, you will undertake a paid work placement (INTRA) for 6-months. This is usually with a business in Ireland but there are also opportunities to work abroad.

## What Will I Study?

### Year 1

Engineering Mathematics 1 and 2 | Engineering Mechanics: Statics | Project and Technical Drawing | Materials Engineering | Introduction to Electronics | Fundamentals of Professional Development | Numerical Problem Solving | Basic Sciences | Software Development

### Year 2

Design and CAD | Mechanics of Machines | Thermofluid Mechanics | Energy: Thermodynamics | Manufacturing Processes | Strength of Materials | Engineering Computation | Engineering Mathematics

### Year 3

(Option to choose five-year MEng subject to achieving H2.2 or higher in Years 1 and 2) Measurement and Signal Processing | Product Design | Mechanics of Machines | Statistics and Probability | Manufacturing Operations Management | Project and Quality Management | Fundamentals of Control | INTRA (part 1)

## What Our Current Students Say

As far back as I can recall I have always tried to build new inventions and been curious on how everything we use in our world works. Mechanical and Manufacturing Engineering has allowed me to open my mind to this in a challenging and exciting way. A particularly big reason I chose this course is because it exposes you to incredible opportunities further down the line, whether that's working for Google, Nasa, Apple or Ford and you are not just limited in one field of expertise. The course is a brilliant opportunity to experience paid work placement in Year 3 and an opportunity to progress onto the integrated Masters in Year 5 which puts you ahead of other graduates in your area. If you're a hard-working team player who likes constantly broadening your horizons this course is for you!

*Daire Smyth, Mechanical and Manufacturing Engineering*

### Year 4 (BEng)

Mechanical and Manufacturing Engineering Project | Finite Element Design Analysis (FEA) | Heat Transfer and Fluid Mechanics | Mechanical Engineering System Simulation | Manufacturing Automation | Advanced Engineering Materials and Manufacturing Processes | Robotics | Operations Research

### Year 4 (MEng)

INTRA (part 2) | Project Planning and Research | Mechanical Engineering System Simulation | Entrepreneurship for Engineers | Operations Research Methods | Design for Assembly

### Year 5 (MEng)

Mechanical and Manufacturing Project | Research Practice and Methodology | Manufacturing Systems Simulation Major in Simulation Driven Design: Finite Element Design Analysis (FEA) | Heat Transfer and Fluid Mechanics | Computational Thermo-Fluid Analysis | Advanced FEA or Turbomachinery | Major in Sustainable Systems and Energy: Energy Systems Decarbonisation: Technology and Policy | Energy Auditing and Energy Systems | Whole Life Cycle Analysis | Advanced Sustainable Energy Systems

# BEng and MEng in Biomedical Engineering

## Engineering meets healthcare needs for the good of humankind

### Why DCU?

---

- Great employment prospects upon graduation - Ireland is home to 15 of the world's top 20 medical technology companies
- A chance to make a big improvement in people's quality of life
- Small class sizes and lots of hands-on project work
- A varied curriculum covering a wide range of sciences and technologies
- Optional to select 5-year integrated Masters in Year 3 and obtain a Masters degree
- Industrial experience as part of the course, with an option of a 10 month paid work placement under the MEng programme
- Accredited engineering course, for full details (see page 189)

### About You

---

Do you want to explore an advanced field of research and study? Do you want to study with helpful and inspiring lecturers? Are you interested in image processing software that will allow you to come up with ideas to help others, from hip replacements to advanced medical devices? Do you have a natural ability in mathematics and a logical mind with an eye for detail?

### Additional Requirements

---

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of H4 in Mathematics or H4 in Applied Mathematics with H5 in Mathematics.

### Understanding: Biomedical Engineering

---

The world of medicine is evolving rapidly, with the emergence of new treatments and the expanding sophistication of medical devices. From cameras that explore blood vessels to scanners that analyse the entire human body, biomedical engineering products are in greater demand than ever before.

Traditionally, medical device companies have relied on employing engineers from such disciplines as mechanical and electronic engineering, and then providing additional training in biomedical engineering. This course integrates aspects of biology and medicine with aspects of technical engineering required to create medical devices.

The School of Mechanical and Manufacturing Engineering, working with the School of Biotechnology and the School of Electronic Engineering, has designed this degree in consultation with the healthcare industry and medical community to ensure you receive a relevant, up-to-date and exciting education.

All our final year students (Years 4 and 5) in the Faculty of Engineering and Computing have the opportunity to showcase their final year projects to interested employers at the end of their final semester.

### Course Structure

---

This four-year BEng degree (with the option to undertake an integrated Masters degree from Year 3 subject to achieving H2.2 or higher in Years 1 and 2) has 8 academic themes, with each theme addressing a particular aspect of Biomedical engineering.

These themes are:

- Mathematics and Computing
- Design and Manufacture
- Project Management and Professional Development
- Engineering Mechanics
- Biomaterials and Manufacturing Processes
- Biology and Bioengineering
- Regulatory Requirements in the Medical Device Industry
- Rehabilitation Engineering and Surgical Device Technology

The course places a strong emphasis on both academic performance in examinations and continuous assessment. In Year 3, you will undertake a paid work placement (INTRA) for 6 months (10 months for integrated MEng students). This is usually with a business in Ireland but there are also opportunities to work abroad.

## What Will I Study?

### Year 1

Engineering Mathematics 1 and 2 | Engineering Mechanics: Statics | Project and Technical Drawing | Materials Engineering | Introduction to Electronics | Fundamentals of Professional Development | Numerical Problem Solving | Basic Sciences | Software Development

### Year 2

Mathematics | Design, CAD and CAD/CAM | Strength of Materials | Thermofluid Mechanics | Energy: Thermodynamics | Mechanics of Machines | Anatomy | Biomechanics of Human Movement | Circuits | Cell Biology and Biochemistry

### Year 3

(Option to choose five-year MEng subject to achieveing H2.2 or higher in Year 1 and Year 2) | Product Development and Regulatory Compliance | Mechanics of Machines | Immunology and Cell Biology | Lean and 6 Sigma Manufacturing | Product Design | Measurement and Signal Processing | Fundamentals of Control | Probability and Engineering Statistics | INTRA (part 1)

## What Our Current Students Say

I chose to study Biomedical Engineering as it combined the most things I enjoyed in school. DCU's curriculum is filled with plenty of theory, but also many labs and fun group projects where we learn how to assimilate what was taught to us, and how to effectively work as a team. The internships which we get to do during the Year 3 can be of great benefit to everyone, as we get to experience first-hand working in our relative fields.

*Danail Tsanov, BEng Biomedical Engineering*

### Year 4 (BEng)

Image Processing and Analysis (Plus) | Finite Element Analysis | Heat Transfer and Fluid Mechanics | Rehabilitation Engineering | Biomaterials and Processing Technology | Operations Research Methods | Surgical Device Technology

### Year 4 Project

Uaneen Award: DCU's Leadership and Engagement Module

### Year 4 (MEng)

Surgical Device Technology | Biomaterials and Processing Technology | Operations Research Methods | Rehabilitation Engineering | Entrepreneurship for Engineers | Project Planning and Research | INTRA (part 2)

### Year 5 (MEng)

Design for Clinical Practice | Finite Element Analysis | Heat Transfer and Fluid Mechanics | Image Processing and Analysis (Plus) | Advances FEA | Advanced Biomechanics and Tissue Engineering | MEng Project

# BSc in Computing for Business

## Innovation for a digital world

### Why DCU?

---

- Develop the computing and business skills that you need in industry today
- 7-month paid work placement (INTRA) in Year 3
- Transform businesses and society
- Hands-on interactive learning
- Great career prospects at home and abroad

### About You

---

Are you an inquisitive student with an entrepreneurial streak - someone who combines a business mindset with an interest in computing? You will find this course ideal if you:

- Have an interest in information technology, the web, social media and management
- Like to work creatively in teams
- Want to learn how organisations can use technology and digital solutions to meet current business needs

As well as learning about the IT/business interface, you will develop the technical and interpersonal skills that allow you to work in creative and innovative IT/business teams.

### Additional Requirements

---

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of O4 or H6 in Mathematics.

### Understanding: Computing for Business

---

Computing technology has entered every corner of the commercial and industrial world and is vital in driving innovation across the business world. It is the backbone of many organisations including banking and finance, tech enterprises, consulting companies and online retailers based on e-commerce.

This degree will provide you with an understanding of how software addresses real-world computing problems. It will teach you how you can best use computing technology to help people to work together and give companies a competitive edge in the marketplace. You will learn how to use and manage information technology and systems to improve and even re-design the way you do business.

The BSc in Computing for Business gives you the foundation for a career in managing business information systems and information technology for innovative enterprises. It aims to educate you as a high-end IT professional with knowledge of how business works and the roles of technology in the enterprise. It will teach practical skills in designing and managing information systems and deploying them effectively and creatively.

The skills you gain will be central to the development of the Irish and, indeed, the global economy over the coming decades. Moreover, those skills are portable. As a graduate of the BSc in Computing for Business, you will be ideally placed to pursue a career as an IT professional here in Ireland, elsewhere in Europe or across the world.

### Course Structure

---

Year 1 is devoted to gaining a strong overall competence in computing technologies, such as computers themselves, operating systems, web systems and the internet, and to acquiring fundamental programming and mathematical skills.

In subsequent years, you will continue to develop programming skills and will undertake courses in information technology, databases, web application development and networking, thus gaining the necessary skills to work with computing technology across a broad spectrum of business enterprises and contexts.

In Year 3, you will have the opportunity to spend 7 months on paid work placement (INTRA) programme, which integrates academic study with a closely related job. It will give you an understanding of the professional and practical business world and will help you to stand out in the graduate employment market. Indeed, many companies recruit their INTRA students on graduation. You are prepared for this work placement through modules in Years 1, 2 and 3, and especially through Business Communication Skills, which includes elements of report writing, making presentations, business communications and business practice. There may also be an option to spend Year 3 of the course abroad.

In Year 4, you will study advanced modules in information systems, business strategy and management. In addition, you will complete a major team-based project. Practical experience is an important component of your learning. Throughout the four years of the degree, there are formal lectures, with a strong emphasis on the practical applications in the computer labs, tutorials, ongoing assessments and projects drawn from real-world situations.

Contact Details  
E [studenthelp@dcu.ie](mailto:studenthelp@dcu.ie)

### What Our Current Students Say

I truly enjoyed studying business in secondary school, but I was always fascinated by technology. This degree was the perfect choice for me since it incorporates both business and computational elements. This degree is very practical and provides me with an indispensable skill set that will help me thrive in the industry.

I am looking forward to starting my INTRA work placement next year and to showcase the skills I've acquired over the last 2 years and putting them to operation.

*Destiny Ohenhen, BSc in Computing for Business*

### Future Careers

- Systems Analyst
- Business Analyst
- Technical Support
- Network Engineer
- Web Developer
- Project Manager
- Programmer

### In These Areas

- IT Companies
- Finance Companies
- Government Sector
- Self-employment

Look online (website details at top of page) for more information about future careers in your chosen field.

# BSc in Computer Science

## Computing technology affects our everyday lives

### Why DCU?

---

- Ireland's most popular computing degree
- Study an exciting range of topics, including graphics, computer networks and mobile computing
- Prepare to work in dynamic areas such as computer games and cloud computing
- Great employment prospects as a computing and IT professional at home and around the world
- Combine an in-depth knowledge of software engineering with the practical skills to apply this knowledge

### About You

---

Do you have an interest in technologies that are all around us and are used by us on a daily basis? Are you interested in computer games or robotics, mobile phones or electronic commerce? If you are interested and wish to explore how this technology works, then this course is for you.

### Additional Requirements

---

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: minimum of O4 or H6 in Mathematics.

### Understanding: Computer Science

---

Computing technology is all around us in our everyday lives, from the mobile phone that wakes us in the morning to the GPS system in the car or social media we post photos on. We use it for everything from booking concert tickets to securing a college place. As intelligent, innovative and forward-thinking people continue to develop technology, it can help us to solve all sorts of problems, for example in traffic circulation, climate modelling, the study of diseases, systems engineering, business modelling and ecology. As well as learning how computers work, you will get an understanding of the technology behind computer games, mobile phones, the internet and many other computing-based products.

This degree prepares you for a professional career in computing and information technology. It gives you an in-depth knowledge of software engineering and the practical skills to apply this knowledge to develop tomorrow's software. Such knowledge is highly sought after by employers.

### Course Structure

---

Year 1 focuses on gaining a strong competence in computer programming and acquiring essential mathematical skills. In Years 2, 3 and 4, specialisms in software engineering will give you the skills to create software and to invent new ways of using it. Examples include web applications, computer games, mobile applications and the software that is contained in the devices we use every day (e.g. mobile phones, entertainment systems and cars). There is a strong emphasis on practical work and teamwork.

In Year 3, you will have the opportunity to spend 6-months on a paid work placement (INTRA). INTRA integrates academic study with closely related jobs. It will give you an understanding of the professional and practical business world and will help you to stand out in the graduate employment market.

You will complete major projects in Years 3 and 4. These projects provide an opportunity for you to put into practice the software development techniques studied in class. An annual display of final-year students' work will allow you to showcase your talents to the industrial and business communities. It also allows potential employers to see the high standard and broad range of the development work you have carried out on the course. This display is very popular with industry and draws many prospective employers keen to hire DCU graduates. See webpage [computing.dcu.ie/fyp](http://computing.dcu.ie/fyp)

**Additional Information**

This course is recognised by the Teaching Council or Ireland for teaching Computer Studies (see page 258 for further details).

**What Our Current Students Say**

I knew I wanted to study computing, but was nervous having never programmed before or knew anything about it. The huge amount of extra supports available made DCU the obvious choice for me. This course is very hands-on. The majority of modules have at least 30% continuous assessment, meaning you're always refining your programming skills and if you keep up with assignments throughout the year there's less stress during exams. Whatever aspect of the course you find challenging there's always someone there to help from one-to-one extra tuition in the maths learning centre, to guidance from tutors during practical's even the weekly hackerclub in Year 1 helps you hone your programming skills.

*Alison Kennedy, Computer Applications*

**Future Careers**

# BSc in Data Science

## Change the world with data at DCU

### Why DCU?

---

- First dedicated undergraduate course in Data Science in Ireland
- Unique combination of mathematical theory, programming practice and communication skills
- Industry-relevant, socially responsible, entrepreneurially-driven. Solve problems in large organisations, for society, or for yourself
- Work alongside the two largest ICT research centres in Ireland – Insight SFI Research Centre for Data Analytics and the ADAPT Centre for Digital Content Technology
- Hands-on: work with real data to solve real-world problems that matter

### About You

---

If you like to ask questions and to know why or how to make better decisions, then Data Science at DCU will give you the tools and skills for this important new area. The BSc in Data Science is a blend of mathematics, computing and data analytics. You'll learn to program, to apply your mathematics knowledge in practical ways and to build the latest machine - learning models to better understand the world around you. No prior computing or programming experience is needed - we will take you from novice to expert.

### Additional Requirements

---

In addition to the general entry requirements for admission to the University (see page 232) the following entry requirements apply: minimum of H3 in Mathematics.

### Understanding: Data Science

---

The course, the first of its kind in Ireland, is aimed at the study of information – where it comes from, what it tells us and how to use it for business, government and social strategies. The ability to collect, process, analyse, understand and communicate from data is used daily to make decisions ranging from financial investments to government strategy to recommending a movie or choosing the best sports person to join your team. DCU is uniquely positioned to offer this course: our proven strengths in computing, engineering, business and mathematics combine with an enterprise-driven focus on innovation and applied problem solving. We make a difference in the real world. This course is designed to produce graduates with the skill-sets necessary to fill the ICT skills gap and meet the demands of employers both at home and abroad.

### Course Structure

---

The BSc in Data Science is focused on the combination of programming, mathematics, communication and data analytics that will equip you to use data to solve problems. The degree has been developed in close collaboration between the University, global centres of research excellence (Insight, ADAPT), and major industry players such as Accenture, AIB and Intel. You will learn relevant theory in mathematics, statistics, programming, data mining, cloud technologies and machine learning. You will then apply this knowledge to industry and socially relevant scenarios using real-world data, and learn to interpret and communicate the results. The qualification you will receive is highly marketable, with global demand across numerous sectors, and can lead to employment at the highest levels in both the public and private sectors.

# Faculty of Engineering and Computing

## Course Requirements

CAO CODE	COURSE TITLE	DURATION	POINTS
DC200	<b>Common Entry into Engineering</b>	First year only*	511
DC190	<b>BEng and MEng in Electronic and Computer Engineering</b>	4 years**	488
DC193	<b>BEng and MEng in Mechatronic Engineering</b>	4 years**	490
DC194	<b>BEng and MEng in Mechanical and Sustainability Engineering</b>	4 years**	476
DC195	<b>BEng and MEng in Mechanical and Manufacturing Engineering</b>	4 years**	500
DC197	<b>BEng and MEng in Biomedical Engineering</b>	4 years**	510

(\* Allows entry to Year 2 of all the Engineering BEng and MEng courses. In the unlikely event that places are oversubscribed, places will be allocated based on Year 1 performance)

(\*\*Option to complete Year 5 integrated MEng degree based on performance across Years 1 and 2)

### SUBJECTS REQUIRED

Leaving Certificate	Minimum of H4 Mathematics or H4 Applied Mathematics with H5 Mathematics
GCE A Level	GCE A Level C Mathematics

### OTHER ENTRY PATHS

QQI/FET Level 5	For details of QQI/FET requirements and relevant codes please see <a href="http://cao.ie/index.php?page=fetac_search">cao.ie/index.php?page=fetac_search</a> . Simply enter the DC code for the course you are interested in or if you are not sure of the code enter DC in the Select by Institution option, then click on Go.										
Transfer Applications	The engineering schools consider transfer requests based on the performance of the candidate. The overall set of guidelines which is in use for HETAC/NCEA equivalent qualifications is as follows: <table border="1" style="margin-left: 20px;"> <thead> <tr> <th>Qualification Possible</th> <th>Point of Entry</th> </tr> </thead> <tbody> <tr> <td>Relevant HETAC/NCEA Higher Certificate/National Certificate (Distinction)</td> <td>First year</td> </tr> <tr> <td>Relevant HETAC/NCEA Higher Certificate/National Certificate (Merit plus Experience)</td> <td>First year</td> </tr> <tr> <td>Relevant HETAC/NCEA Bachelor (Ordinary) Degree/National Diploma (Merit or Better)</td> <td>Second year</td> </tr> <tr> <td>Relevant HETAC/NCEA Bachelor (Ordinary) Degree/National Diploma (Distinction plus a possible interview)</td> <td>Third year</td> </tr> </tbody> </table>	Qualification Possible	Point of Entry	Relevant HETAC/NCEA Higher Certificate/National Certificate (Distinction)	First year	Relevant HETAC/NCEA Higher Certificate/National Certificate (Merit plus Experience)	First year	Relevant HETAC/NCEA Bachelor (Ordinary) Degree/National Diploma (Merit or Better)	Second year	Relevant HETAC/NCEA Bachelor (Ordinary) Degree/National Diploma (Distinction plus a possible interview)	Third year
Qualification Possible	Point of Entry										
Relevant HETAC/NCEA Higher Certificate/National Certificate (Distinction)	First year										
Relevant HETAC/NCEA Higher Certificate/National Certificate (Merit plus Experience)	First year										
Relevant HETAC/NCEA Bachelor (Ordinary) Degree/National Diploma (Merit or Better)	Second year										
Relevant HETAC/NCEA Bachelor (Ordinary) Degree/National Diploma (Distinction plus a possible interview)	Third year										

## Common First Engineering Year

---

The two engineering schools in DCU have been working together to ensure that our courses stay vibrant and relevant to the needs of the modern engineer. One development that has arisen from this effort is a common first engineering year across all four engineering courses in the Faculty. In other words, students entering via any of the CAO-denominated courses (DC190, DC193, DC194, DC195, or DC197) or the Common Entry route (DC200) will all share a common engineering Year 1.

Provided you successfully complete all modules from Year 1, you will be allowed to progress into Year 2 of any available BEng engineering undergraduate course. If you have been offered a place on a denominated course, you may, on successful completion of Year 1, opt to stay with that course. Or, if your interests have changed, you can switch to one of the other available engineering courses in the Faculty.

Note: You cannot switch to the software engineering option in BSc in Computing for Business DC120 or BSc in Computer Science DC121 or BSc in Data Science DC123.

## Accredited Engineering Courses

---

DCU has always been at the forefront in running accredited engineering courses which meet the educational requirements for Chartered Engineer status.

Through international agreements made by Engineers Ireland, Chartered Engineer accreditation is recognised by the IET (UK) and by EU nations through FEANI. It is also recognised by the USA, Canada, New Zealand, Australia, and many other countries through the Washington Accord.

Only Masters awards can achieve Engineers Ireland Chartered Engineer accreditation. Upon successful completion of Year 4 of your BEng (Hons) degree, and subject to meeting the relevant entry requirements, you will have the option to continue your studies on DCU's Masters programme in the relevant area.

- BEng and MEng in Electronic and Computer Engineering (Year 5 option) DC190
- BEng and MEng in Mechatronic Engineering (Year 5 option) DC193
- BEng and MEng in Mechanical and Sustainability Engineering (Year 5 option) DC194
- BEng and MEng in Mechanical and Manufacturing Engineering (Year 5 option) DC195
- BEng and MEng in Biomedical Engineering (Year 5 option) DC197

# Faculty of Engineering and Computing

## Course Requirements

### School of Computing Courses

If you are interested in how software addresses real-world computing problems and how information technology can be used to improve and even re-design the way business can be done, the BSc in Computing for Business course will give you the foundation for a career in information technology for the modern business enterprise. It will also teach you practical skills in designing and managing information systems, and deploying them effectively and creatively.

If you have no previous experience in writing programs and want to learn how to develop software programs that can be used in a variety of different applications (mobile apps, computer games, artificial intelligence, cloud-based applications, etc.), the BSc in Computer Science course will give you an in-depth knowledge of software engineering and the practical skills to apply this knowledge in developing tomorrow's software solutions.

The BSc in Data Science combines the three key skill sets of computing, mathematics and enterprise to provide the core knowledge needed to succeed in this growing area. The course will introduce you to the major concepts in data analytics, management, processing, modelling, visualisation and enterprise. You will study programming, and mathematics and will learn to apply these skills to data from the real world, and also to communicate the results to different audiences.

CAO CODE	COURSE TITLE	DURATION	POINTS
DC120	<b>BSc in Computing for Business</b>	4 years	403
DC121	<b>BSc in Computer Science</b>	4 years	475
DC123	<b>BSc in Data Science</b>	4 years	501

#### SUBJECTS REQUIRED

Leaving Certificate	Minimum of O4 or H6 in Mathematics (for Computer Science and Computing for Business); minimum of H3 in Mathematics (for Data Science)
GCE A Level	GCE A Level D or GCE AS Level grade C or GCSE C Mathematics (for Computer Science and Computing for Business) GCE A Level grade B Mathematics (for Data Science)

#### OTHER ENTRY PATHS

QQI/FET Level 5	For details of QQI/FET requirements and relevant codes please see <a href="http://cao.ie/index.php?page=fetac_search">cao.ie/index.php?page=fetac_search</a> . Follow us

@DCU\_IoE

Access unparalleled opportunities at the only dedicated faculty of education at an Irish university.

The DCU IoE brings together students from all education sectors. Our students take courses in early childhood education, primary and post-primary teaching, and further education and training. They work with staff who are passionate about education, who are leaders in their field, who contribute to policy and research, and who are recognised across the world for the quality of their work.

We expect you, as a student of the IoE, to share that passion for education. We will challenge you, make you think, place you in schools and educational settings unlike any you have experienced before, ask you questions and listen to yours. We will help you develop skills to enhance the learning and development of young children, to teach in the classrooms of today and tomorrow, and to build the foundation of your career in education.

# Bachelor of Early Childhood Education (BECE)

## Develop the knowledge, expertise and skills to support the development and early education of children from birth to 6 years

### Why DCU?

- We have extensive experience in helping students become professionally qualified educators
- Our course aims to develop graduates who are critical and creative thinkers, skilled in working with young children and their families, and are strong researchers and advocates for early childhood and who hold a personal stance on key issues in Early Childhood Education and Care (ECEC)
- You will work with internationally recognised experts in early childhood education and care
- You will learn through experiences in lectures with large groups, in workshops and seminars with small groups, individually in tutorials and through time in professional practice (placement)
- You can choose from a range of elective modules; examples include preparing to teach Irish as a first or second language in Naíonraí or developing entrepreneurial skills to set up and operate an early childhood setting

### About You

Do you want to develop the skills and knowledge to support the learning, development and wellbeing of young children (birth to 6 years)? Are you interested in working with children with special needs, with children and families or in support and early intervention organisations? Are you interested in developing your critical thinking and research skills? The Bachelor of Early Childhood Education (BECE) course will enable you to become a skilled professional leader in the field of early childhood.

### Additional Requirements

The general entry requirements for admission to the University apply (see page 232).

### Garda Vetting

Garda vetting has been introduced for students who have unsupervised access to children and vulnerable adults as part of their studies at DCU. You must successfully pass the Garda vetting process in order to complete the process of registration.

### Understanding: Early Childhood Education (BECE)

Early childhood is a growing field, with increasing state investment which acknowledges the importance of learning and development in the early years.

This course will equip you to take a leadership role in curriculum or management within the early childhood field. Working with young children and their families and supporting their education is rewarding and makes a real difference to children's lives. Our BECE degree will enable you to succeed by developing your skills, knowledge and understanding of:

- Children's wellbeing, development and learning (birth to 6 years)
- Curriculum planning, implementation and assessing learning
- Learning through play, indoors and outdoors
- Supporting creativity and thinking through early maths, art, music and literacy
- Being a professional, using initiative, preparing for leadership and management opportunities
- The wider social and legislative context and its impact on children and families
- Effective communication and relationship building in working inclusively with a broad range of children, families and other professionals

### Course Structure

All students take required early childhood education and care modules and spend approximately 1000 hours on professional practice placement and related activities over the duration of the course.

Each year of the BECE has a different focus. In Year 1, you will cover the core information needed to understand young children and how they develop. A range of supports are available to help students settle in academically and socially to DCU. Year 1 builds the knowledge and pedagogical foundation for the course.

Year 2 focuses on the ECEC environment and its impact in supporting young children's learning and development. You will learn how to create settings that support and challenge young children.

Year 3 explores diversity, equality, inclusion and social justice as it relates to young children and their families. You will discover how to support and engage with the rich cultures, languages, traditions and needs of a diversity of children and their families through respectful relationships. In Year 3 you will have an Erasmus option to study for a semester in places such as Belgium, Hungary and Norway.

Year 4 focuses on leadership, ethics and research. You will complete a dissertation in an area of professional interest. You will also select from a range of relevant specialisms to deepen areas of interest that may be relevant for your future careers.

Contact Details  
E studenthelp@dcu.ie

Visit Us Online  
dcu.ie/DC001

Throughout the course, you will apply your learning when out on professional practice (placement). You will undertake professional practice each year in semester 2 in a range of educational settings: full day care (Crèche; sessional (pre-school, Montessori, playgroup, Naíonra); special needs schools; specialised early intervention programmes; privately run preschools; and policy settings such as voluntary organisations and government departments or agencies. You will work with children from a variety of linguistic, social, ethnic and cultural backgrounds. You will also work with children who have special educational needs.

### What Will I Study?

#### Year 1

Child Development 1 | Child Protection and Legal Frameworks | Creativity 1 (Art) and 2 (Music) | National Frameworks for ECE (Ireland) | Play and Learning 1 | Wellbeing, Health and Nutrition 1 | Critical Social Studies 1 | Issues in Professional Learning and Practice | Professional Practice

#### Year 2

Child Development 2 | Critical Social Studies 2 | Contemporary Curriculum Approaches in ECE | Language and Cultural Diversity | Special Educational Needs | Drama and Socio-Dramatic Play | Technology in Learning | Wellbeing, Health and Nutrition 2 | Issues in Professional Learning and Practice | Professional Practice

#### Year 3

Children, Families and Communities | Children's Participation in ECE | Current Issues in ECE | Inquiry-Based Learning | Psychological Perspectives: Young Children's Thinking and Learning | Early Mathematics Learning | Outdoor Play and Learning | Language, Literacy and Culture 1 | Issues in Professional Learning and Practice | Professional Practice

#### Year 4

Assessing Early Learning and Development | Leadership in ECE Settings | Partnership in ECE | Philosophy and Childhoods | Specialisms / Elective Modules | Transitions and Change in Early Childhood | Dissertation 1 and 2 | Professional Practice

### What Our Current Students Say

The Bachelor of Early Childhood Education is more than just a teaching degree it's about helping children to develop every part of themselves. Throughout the course we cover a wide variety of topics, from child development to art and music. Alongside our lectures we have the opportunity to gain practical experience working with children aged 0-6 in our placement every year. Being part of this course has given me the tools to be able to confidently work within the sector.

*Jessica McInerney, Bachelor of Early Childhood Education*

# Bachelor of Education (BEd) Primary Teaching

## Gain the skills required to handle the complex, challenging and ever-changing primary education environment

### Why DCU?

- You will be taught by internationally recognised experts in primary teacher education
- You will gain experience in a broad range of classes in different types of schools, including multi-grade classes in small schools
- You will select from a range of specialisms designed to prepare you to be a leader and innovator in education
- Most teaching happens in small groups where you will get to know your fellow students well
- You will conduct an action research project in the final year of your course

### About You

You should be deeply interested in children, how they learn and how they experience and interpret the world. You should also enjoy working with, and learning from, other people. You must be a good communicator.

We expect you to be committed to your own personal and professional development and to be willing to challenge your own assumptions about teaching, learning, schools and society.

### Additional Requirements

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: a minimum of H5 in at least three subjects and a minimum of O6/H7 in three other subjects. Your subjects must include H4 in Gaeilge (DC003 H3); O4 or H7 in English; and O4 or H7 in Mathematics.

DC003 Iarratasóirí Gaeltachta amháin in Institiúidí Ardoideachais: Is féidir suas go 10% de na háiteanna ar na cúrsaí múinteoireachta sa bhunoideachas, a choinneáil d'iarratasóirí Gaeltachta, i.e. ní mór d'iarratasóirí cónaí a bheith orthu sa Ghaeltacht mar a aithnítear go hoifigiúil í agus an Ghaeilge a bheith in úsáid mar ghnáth-theanga teaghlaigh acu. Le hiarratas a dhéanamh, caithfidh tú a bheith in do chónaí i gceantar atá ainmnithe go hoifigiúil mar Ghaeltacht agus a bheith in ann a dheimhniú gurb í an Ghaeilge do ghnáth-theanga bhaile in ann a dheimhniú gurb an Ghaeilge do ghnáth-theanga bhaile. Féadann tú iarratas a chur isteach ar DC002 agus DC003 araon, más mian leat.

DC003 Gaeltacht pathway  
Applicants wishing to commence the Primary BEd (English medium) through the Gaeltacht Entry Route DC003 from September 2022 must meet the following updated criteria in order to be eligible to apply for entry to the course, which is done through the CAO process.

- a) Be resident in a Gaeltacht Language Planning area, and
- b) Must obtain at least a H3 in Leaving Certificate Irish

Apart from the requirement to meet both of the two criteria listed above, applicants must also meet all the other requirements for entry to the Primary BEd as normal and any particular matriculation requirements for the HEI they are applying to.

DC004 Church of Ireland Centre pathway (Restricted Entry): If you hold a minimum H6 or O4 in Gaeilge, you may be offered a place, but only if there are too few applicants with H4 in Gaeilge. A Link Module of the Leaving Certificate Vocational Programme may be presented as one of the six subjects for the calculation of points but will not qualify as a subject for matriculation purposes. You must apply through CAO by 1 February. Late applications cannot be accepted. You will be sent a separate eligibility assessment form by the University.

### Garda vetting

Garda vetting has been introduced for students who have unsupervised access to children and vulnerable adults as part of their studies at DCU. You must successfully pass the Garda vetting process in order to complete the process of registration.

### Understanding: Bachelor of Education Primary Teaching

Teaching is a highly skilled and challenging activity. It requires expert knowledge, but also the ability to apply that knowledge flexibly and to adapt it quickly to new situations. Teachers must be able to handle unexpected events in the classroom and to use these imaginatively to promote learning. We will give you the opportunities you need to develop your subject knowledge, your understanding of how children learn and how schools work, and your classroom management skills.

DC002/DC003 students who choose the optional Catholic denominational strand take three modules in Catholic Religious Education. Students must also successfully complete three additional modules leading to a Catholic Certificate in Religious Studies in order to qualify to teach in a school under Catholic patronage.

All entrants through the DC004 Church of Ireland Centre pathway must be aware of and willing to support the distinctive ethos of Protestant primary schools.

DC004 students take an additional qualification in Religious Studies and Religious Education to prepare them to teach the Follow Me programme in schools under Church of Ireland, Methodist, Presbyterian and Society of Friends patronage supported by denominational specialism track module (Religions, Ethics, Morals and Values) and a specialism which prepares you to teach in small schools and multi-level classes, a module in Irish Language and Literature in Year 1 plus a short intensive course in Irish and a one-week placement in a Gaelscoil.

### Additional Information

This course will enable you to register on graduation as a primary teacher with the Teaching Council (see page 258 for further details).

DC004 is a restricted entry pathway for those who are aware of and willing to support the distinctive ethos of primary schools under Church of Ireland, Methodist, Presbyterian and Society of Friends patronage.

## Course Structure

Our BEd is designed to help you become a skilled and creative teacher. All students study Education, complete 30 weeks' school placement and undertake two residential Gaeltacht Placements. You will also take specialism subjects relevant to teaching. You will be part of a small study group (a tutorial group) and this will give you a chance to share your experiences of school placement and your thoughts on course content.

You will spend time in schools each year, with extended placements in each of Years 3 and 4. You will start by observing the class teacher and will build up gradually to teaching all day. Throughout your placements, you will be supported by both faculty and school staff.

The majority of DC004 placements will be in schools under Church of Ireland, Methodist, Presbyterian and Society of Friends patronage, with a particular focus on developing the experience and skills for teaching multi-grade classes in small schools.

In Years 1 and 2, you will cover the basics needed for teaching. You will come to understand how children think and learn in active ways. Your curriculum courses will prepare you to teach all the subjects of the primary curriculum using approaches that develop children's understanding and motivation. You will also take modules in Psychology, Philosophy, Sociology of Education and History of Education.

In Year 3, you will review what you have learned to date and will apply it in different situations. You will deepen your understanding of classroom contexts and of how to plan for rich learning experiences. You will learn how to work with children in ways that are democratic and enable them to engage in an ethical way with the world.

Year 4 focuses on deepening your expertise. It will provide you with opportunities to think about big ideas in education such as social justice, inclusion and working in a school community. You will also undertake a research project.

### Specialism Track Modules

The BEd also provides opportunities for students to specialise in key areas of learning.

DC002 and DC003: In Year 1, you will select a maximum of three options from English, Gaeilge, Geography, History, Mathematics, Music, and Religious Studies. You can continue with one of these as a major specialism in Years 2 to 4, or may decide to opt for Digital Learning, Drama in Education, Early Childhood Education, Human Development, Human Rights and Citizenship Education, Literacy Education, Music Education, Physical Education, Science Education, Special and Inclusive Education, Maths Education, History Education, Geography Education or Visual Arts Education. (The number of places on some specialisms is restricted and options are subject to change).

DC004 Church of Ireland Centre pathway: In Year 1 you take modules in Religious Studies and Irish Language, and select one option from English, Gaeilge, Geography, History, Mathematics and Music. In Years 2 to 4, you must follow a particular specialism which prepares you to teach in small schools and multi-level classes.

## What Our Current Students Say

The BEd in Primary Teaching is a perfect course for you if you are looking for a degree that is packed with a variety of subjects and the opportunity to work with children. The course is a blend of both theoretical and practical modules with a range of different subject specialisms to choose from in Year 2. I have chosen geography as my specialism as I love learning through the outdoors and hope to incorporate that into my teaching in the future! I was always sure that I wanted to be a teacher, however if you are unsure, a day in a primary school will make it so clear for you! The course also includes a trip to the Gaeltacht in Years 1 and 3 which really helped to improve my oral Irish!

It is an incredibly fun degree with so many friendly classmates and helpful lecturers.

*Kayleigh Murphy, Bachelor of Education*

# Bachelor of Religious Education and English or History or Music (BRelEd)

## Post-Primary Teaching: Help the next generation reach their potential

### Why DCU?

---

- Specialised centre of excellence, with a rich history in teacher education – it's what we do
- Teaching placements take up 25% of the course - preparing you to teach in the 21st-century classroom
- You will be qualified to teach Religious Education (RE) and English or History or Music to Honours Leaving Certificate level
- Graduates are employed in key educational positions in Ireland, Europe and internationally
- Most teaching happens in small groups where you will get to know your fellow students well

### About You

---

Are you interested in playing a key role in the educational development of the next generation?

### Additional Requirements

---

DC010: The general entry requirements for admission to the University apply (see page 232).

DC011: The general entry requirements for admission to the University apply (see page 232).

DC012: In addition to the general entry requirements for admission to the University (see page 232), the following entry requirement apply: H4 in Music or equivalent (this requirement may be waived by the Head of Music).

### Garda vetting

---

Garda vetting has been introduced for students who have unsupervised access to children and vulnerable adults as part of their studies at DCU. You must successfully pass the Garda vetting process in order to complete the process of registration.

### Understanding: Post-Primary Teacher Education

---

The four-year Post-Primary Teacher Education degree in Religious Education and English or History or Music is a 'concurrent' teacher education course – meaning that academic study and professional teacher training are integrated in all four years. This is in contrast with the 'consecutive model', where you first complete an undergraduate degree and must then apply for entry to the Professional Masters in Education in order to qualify as a post-primary teacher.

This course, as well as preparing you in the two distinct areas of Religious Education and English or History or Music, will also place emphasis on teamwork, leadership, communication and creativity – skills that will inspire you to work as a post-primary teacher and also in a variety of other professions.

### Course Structure

---

A major attraction of this four-year course is that you will study in small class groups within the larger University context. Throughout the course you will cover the following integrated areas:

#### Foundational and Professional Studies in Education

DCU offers a student-friendly, supportive, open, dynamic and practical approach to the study of Education. Given its diverse nature, the study of Education and Religious Education is exciting, engaging, and challenging; something that is reflected in the variety of modules on offer to you over the course of your four years.

#### Teaching including School Placements

One of the most exciting and rewarding elements of the course is our hands-on approach to school placement. Over the four years of the course, you have an opportunity to gain valuable and extensive experience within a range of teaching and learning environments, including observation of practice, micro-teaching, peer-teaching, team-teaching and school-based placement (in both primary and post-primary settings). You are supported throughout your professional development by experienced school placement tutors and school-based cooperating teachers. School placement also enables you to learn about and involve yourself with the wider school community through taking part in activities, initiatives and work outside of your classroom teaching. There is a specific focus on this aspect of school life during Context and Engagement week.

### Additional Information

This course will enable you to register with the Teaching Council on graduation (see page 258 for further details).

You can then apply immediately for employment in second-level schools as a teacher of Religious Education and your related course subject (English or History or Music) up to and including Honours Leaving Certificate level.

### Contact Details

E [studenthelp@dcu.ie](mailto:studenthelp@dcu.ie)

### Visit Us Online

[dcu.ie/DC012](http://dcu.ie/DC012) (Music)

### Theology, Religious Studies and Ethics

Theology, Religious Studies and Ethics provides a strong foundation for teaching Religious Education in post-primary level schools and meets the subject criteria required by the Teaching Council. The modules include: Ethics; Philosophy; Scripture; Systematic Theology; World Religions. You are encouraged to explore a wide range of topics and develop the skills to work in contexts of cultural and religious diversity.

### English

Studying English Literature provides you with the skills to think creatively and intelligently about the fundamental roles played by storytelling and song-making in civilization. You will look at a wide range of literature and become familiar with the vital characteristics and contexts of drama, poetry, film and fiction. You will study style and substance: what literature describes, but also how it does it. Our priority is developing your critical independence, enabling you to read and reflect on literary texts across traditions: from Greek tragedy to *Breaking Bad*, *Jane Austen* to *Father Ted*, *Shakespeare* to *Kanye West*.

### History

Our aim is to provide you, as a student of history, with the material and methodologies you will need in order to discover, examine and interpret some of the major issues and questions which will inevitably arise from your studies. The course offers a broad range of modules covering topics in Irish, European and World History from the medieval to the modern period.

### Music

The study of music combines an opportunity to develop your own musicianship to a high level with a chance to experience a wide range of musical styles through performance; through historical, analytical and contextual inquiry; and through composition. Subject areas include compositional techniques, music history and contextual studies, solfège/musicianship and keyboard skills, choral and instrumental performance, Irish traditional music, choral conducting, and music technology. All students participate in performance ensembles (choir, trad group, orchestra), which play an active role in the University's cultural life, and which prepare you for the diverse challenges involved in music teaching and musical life more broadly.

#### What Our Current Students Say

The Bachelor of Religious Education is a truly innovative and progressive course that inspires and nurtures learning in every sense; instilling confidence in us as learners and teachers. It is acutely aware of developments occurring in education inside the classroom and out - as well as in your subjects. The reason we do it is to teach – to educate and care for learners; helping them to progress into the next stages of their lives. The BRelEd is consistently providing the support and education to help us to do just that.

*Ellen Maher, Bachelor of Religious Education (English)*

# Bachelor of Education in Gaeilge and French or German or Spanish

## Post-Primary Teaching: Use your ability in languages to inspire the next generation of learners

### Why DCU?

---

- Specialised centre of excellence, with a rich history in teacher education – it's what we do
- You will be taught by internationally recognised experts in language and teacher education
- Teaching placements take up 25% of the course - preparing you to teach in the 21st-century classroom
- You will complete an Erasmus placement studying in a country where your chosen modern foreign language is spoken
- You will be qualified to teach Gaeilge and French or German or Spanish to Honours Leaving Certificate level

### About You

---

Are you interested in playing a key role in the language development of the next generation? You need to be creative and articulate, with a passion for languages - learning them, using them and passing on your skill to others.

### Additional Requirements

---

In addition to the general entry requirements for admission to the University (see page 232), the following entry requirements apply: a minimum of H3 in Gaeilge and a minimum of H3 in French or German or Spanish.

### Garda vetting

---

Garda vetting has been introduced for students who have unsupervised access to children and vulnerable adults as part of their studies at DCU. You must successfully pass the Garda vetting process in order to complete the process of registration.

### Understanding: Post-Primary Teacher Education

---

The four-year Post-Primary Teacher Education – degree in Gaeilge with French or German or Spanish is a 'concurrent' teacher education course – meaning that academic study and professional teacher training are integrated in all four years. This is in contrast with the 'consecutive model' where you first complete an undergraduate degree and must then apply for entry to the Professional Masters in Education in order to qualify as a post-primary teacher.

This course will prepare you in the two distinct languages (Gaeilge, and French or German or Spanish) while also placing an emphasis on teamwork, leadership, communication and creativity - skills that will inspire you to work as a post-primary teacher and also in a variety of other professions.

### Course Structure

---

A major attraction of this four-year course is that you will study in small class groups within the larger University context. Throughout the course you will cover the following integrated areas:

### Foundational and Professional Studies in Education

We offer a student-friendly, supportive, open, dynamic and practical approach to the study of education. Given its diverse nature, the study of education and languages is exciting, engaging, and challenging - reflected in the variety of modules on offer to you over the course of your four years.

### Teaching including School Placements

One of the most exciting and rewarding elements of the course is our hands-on approach to school placement. Over the four years of the course you have an opportunity to gain valuable and extensive experience within a range of teaching and learning environments, including observation of practice, micro-teaching, peer-teaching, team-teaching and school placement (in both primary and post-primary sectors). You are supported throughout your professional development by experienced school placement tutors and school-based cooperating teachers. School placement also enables you to learn about and involve yourself with the wider school community through taking part in activities, initiatives and work outside of your classroom teaching. There is a specific focus on this aspect of school life during Context and Engagement week.

### Languages

There is a shortage of language teachers in the post-primary sector at present and graduates of this course will be highly sought after. The course will enable you to reach a high standard of competence in Gaeilge and your chosen language so that you will be a confident and effective language teacher. You will undertake a two-month internship in the Gaeltacht and the second half of Year 3 will be spent in a country where French or German or Spanish is spoken. As well as learning the languages to a high level, you will study a wide range of literature and become familiar with the vital characteristics and contexts of drama, poetry, film and fiction. You will study modules in applied linguistics, i.e. how to teach languages and how languages are learned. There will be modules on how to assess language learners and how to teach students with different learning needs.

### Additional Information

This degree enables you to register with the Teaching Council (see page 258 for further details).

You can apply immediately for employment in second-level schools as a teacher of Gaeilge and your related course subject (French or German or Spanish) up to and including Honours Leaving Certificate level.

## What Will I Study?

### Year 1

Education Theories 1 | Introduction to the Study of Language | Cúrsa Teanga 1 | Filíocht na Gaeilge | Assessment, Learning and Teaching | History of Irish Education and Current Issues | Microteaching and Placement Preparation 1 | Introduction to Applied Linguistics

- French Language 3 or German Language 3 or Spanish Language 3
- French Society and Literature or German Society and Literature or Spanish Society and Literature

### Year 2

Digital Media and Language Learning | Language Pedagogy (Irish, French/German/Spanish) (as Gaeilge) | Introduction to Inclusive Education | Cúrsa Teanga 2 | Drámaíocht agus Scannánaíocht | Assessing Language Learning | School Placement 2

- French Language 5 or German Language 5 or Spanish Language 5
- French Literature and Film or German Literature and Film or Spanish Literature and Film
- French Language 6 or German Language 6 or Spanish Language 6

## What Our Current Students Say

I have been given a wonderful opportunity to marry my love of languages with my desire to teach and inspire young people in schools. The course offers extensive school placement, with excellent support from lecturers providing invaluable experience of the real-life classroom and ensures I am capable and self-assured upon graduating. With an Erasmus placement in Year 3 and summer Gaeltacht Placements, as well as everyday lectures and tutorials, An Cumann Gaelach and Modern Foreign Language Societies, students are afforded a wealth of opportunities throughout the duration of the course to develop their confidence and competence in their languages. A unique and exciting aspect of this course is that it is delivered across all three of DCU's academic campuses, allowing students to benefit from the huge expertise and many wonderful facilities that DCU has to offer.

*Deirdre Croghan, Bachelor of Education Gaeilge and French*

### Year 3

Curriculum, Policy and Assessment | Feasacht agus Fóineolaíocht na Gaeilge | An Ghaeilge Fheidhmeach | Prós na Gaeilge 1 | School Placement 3 and Reflective Practice

Memory and Identity; German Culture, Literature and Film; Latin America: Society, Literature and Culture

- French Language | French Literature or German Language | German Literature or Spanish Language | Spanish Literature
- Foundation, Professional and Pedagogical Studies (FPP) modules delivered through the target language as part of a semester abroad in a country where French or German or Spanish is spoken

### Year 4

Research Project | Education Theories 2 (Advanced) | Cúrsa Teanga 3 | Prós na Gaeilge | School Placement 4

- French Advanced Oral Skills or German Advanced Oral Skills or Spanish Advanced Oral Skills

# BSc in Education and Training

## Gain knowledge, skills and expertise in all aspects of education, teaching and training

**Option for additional placement year: facilitates registration with the Teaching Council as a teacher in Further Education and Training (FET)**

### Why DCU?

- Join thousands of successful graduates working in education and training in Ireland and across the world
- Develop and progress your skills in a course that blends education and training
- Diversify your future career prospects
- Experience personal and professional development over the course of your study
- Qualify as a teacher for Further Education and Training (FET), fully recognised by the Teaching Council

### About You

Do you enjoy the challenge of working closely with people in a range of settings and helping them to progress their knowledge, skills and attitudes? If you are interested in how people learn and you want to understand how to use your own knowledge to teach or train them, then the BSc in Education and Training is the ideal course. We will help you gain a wide range of skills and develop an enlightened approach to teaching, learning and assessment.

### Additional Requirements

The general entry requirements for admission to the University apply (see page 232).

### Garda Vetting

Garda vetting has been introduced for students who have unsupervised access to children and vulnerable adults as part of their studies at DCU. You must successfully pass the Garda vetting process in order to complete the process of registration.

### Understanding: Education and Training

There is a strong demand for educators and trainers across Ireland from community based education to education and training programmes to QQI courses and corporate and business training. There are always people who want and need to learn. This course will give you the skills, knowledge and expertise to develop and hone those skills by:

- Developing your understanding of all aspects of education and training, in both formal and informal sectors (adult education, community education and workplace education and training) as they have evolved in the social and historical context in Ireland
- Exploring key theories in education, psychology, sociology and philosophy
- Providing you with the practical skills and theoretical understanding necessary to deliver high-quality education and training
- Applying theory and skills from entrepreneurship, sustainable development, Technology Enhanced Learning (TEL) and Universal Design for Learning (UDL) to your own practice
- Enhancing your abilities to communicate effectively as a teacher

You can complete the BEd in Education in Training in three years or can move to the four year BSc in Education & Training (Further, Adult and Continuing Education strand) after Year 2. Students on the four-year course undertake a placement year in Year 3 and are eligible to register with the Teaching Council of Ireland as a teacher in Further Education and Training (FET) upon successful completion of the course.

### Foundation Programme in Education and Training:

Students undertaking a specific Quality and Qualifications Ireland (QQI / FET) approved course in Education and Training in designated further education centres may take the degree on successful completion of a course of study jointly delivered by DCU and the designated centres (see page 208 for further details).

### Course Structure (Full-time Mode or Flexible Learning Mode)

The full-time mode is delivered during traditional university hours. The flexible mode is delivered\* two evenings per week and on occasional Saturdays and is also a designated full-time course. You must select your delivery mode upon registration.

Your degree course focuses on the development of specialist knowledge and skills in the areas of:

- Social and personal development
- Practice-based teaching and learning
- Curriculum design, implementation, assessment and evaluation, and instructional design
- Interpersonal communications and education for multicultural and diverse societies
- Information and communication technology (ICT) through learner centred approaches and Technology Enhanced Learning (TEL) in education and training settings
- Entrepreneurship and leadership in education and training
- Information and communication technology for education and training
- Policy and practice in education and training contexts

\*The availability of the flexible mode course is dependent on student numbers.

### Additional Information

This course (four-year option) will enable you to register as a further education teacher with the Teaching Council (see page 258 for further details).

### Contact Details

E [studenthelp@dcu.ie](mailto:studenthelp@dcu.ie)

### Visit Us Online

[dcu.ie/DC235](http://dcu.ie/DC235)

### Optional Year

At the end of Year 2 of the BSc in Education and Training course, you may choose to either progress directly into the final year or to register for an optional extra year of placement in further education and training (FET), after which you will complete your final year. Students on the flexi mode who do not wish to undertake the placement year may need to move to daytime mode for final year (dependent on student numbers).

Students who complete the four-year course will be recognised by the Teaching Council as qualified teachers of further education and training (FET).

### What Will I Study?

#### Year 1

Academic Writing and Reading | Curriculum Development | Education for Sustainable Development | Lifespan Development | Social and Personal Development with Communication Skills | Human Development - Power and Politics | Concepts and Contexts in Education and Training | Microteaching and Teaching Preparation | Citizenship, Diversity and Inclusion

#### Year 2

Assessment and Feedback | Advanced Teaching Strategies | Professional Skills and Practice | Psychology of Individual Difference and Diversity | Designing Instruction for the Training Environment | Mediation Skills for the Learning Context | Reflective Work-Based Practice | Policy and

### What Our Graduates Say

I have been given the tools to help me succeed in any area of education that I decide to go into. While developing these tools, I've built great relationships with my lecturers and fellow students. I highly recommend this course to all potential students.

*Olivia Sneyd, BSc in Education and Training*

Structures in Education and Training | Sociology of Education and Training | Entrepreneurship in Education and Training

#### Optional Year 3

Practical Teaching Placement | Professional Development | Reflective Practice | Quality Assurance in Further Education

#### Final Year

Values, Identity and Intercultural Learning | Human Resources and Training in a Globalised World | Equality, Access and Inclusion | Developing a Research Perspective | Project 1 | Professional Development and Lifelong Learning | Leadership and the Learning Organisation | Creating Learning Environments Using ICT | Research Project 2 | Philosophical Perspectives on Education | Research Project 2

#### Optional Modules

Uaneen Award: DCU's Leadership and Engagement Module

The Teaching Council requires those who want to register as teachers in further education to have a primary degree and a qualification in teaching for Further Education and Training (FET). DCU's four-year BSc in Education and Training is regarded as a concurrent teacher qualification and will enable you to register on graduation as a teacher in Further Education and Training (FET) with the Teaching Council.

# Foundation Programme in Education and Training (FPET) - QQI/FET Level 5 and QQI/FET Level 8 Modules

## Take the first step to a university degree

This course is offered jointly by DCU and Whitehall College of Further Education.

### Why DCU?

---

- The Foundation Programme offers an accelerated route into higher education
- We provide a bridge between further education and higher education
- The adult learning approach is suited to mature students
- If you decide not to proceed to DCU after the course, you still gain a recognised full QQI/FET Level 5 qualification
- By completing this course you gain exemption from two NFQ Level 8 modules in Year 1 of the BSc in Education and Training

### About You

---

Do you like the challenge of gaining new knowledge and skills, and of working closely with people and helping them learn? Are you interested in how people learn and in using your own knowledge to train and teach others in a range of settings?

- Have you recently completed your Leaving Certificate and want to go to university but cannot transfer directly based on your results?
- Have you completed your Leaving Certificate in the last few years but chosen not to go to university?
- Are you a mature student (aged 23 years or more) who has always wanted to go on to further study but does not know how to take that first step?
- Have you studied on a further education course and now wish to go on to higher education?

If you answer yes to any of these questions, the Foundation Programme is for you.

### Mature Students

---

In the case of mature applicants, we take into consideration other experience apart from performance in examinations – this may be work experience, further studies or other relevant experience.

We assess your case based on the details you supply in your application. In most cases you will be called for an interview conducted jointly by Whitehall College of Further Education and DCU.

DCU and Whitehall College select students on the basis of merit and are committed to equality of opportunity. We especially welcome applications from minority groups, as they are under-represented in third-level education. Members of the Travelling community, people with disabilities, people of ethnic minority and others with the skills and knowledge to work with groups from diverse backgrounds are especially welcome.

### How to Apply

---

Apply for this course directly to Whitehall College of Further Education.

See [whitehallcollege.com](http://whitehallcollege.com)

### Understanding: Foundation Programme in Education and Training

---

The ability to teach and train other people is vital to organisations and entire communities. Everywhere there are people who need and want to learn. If you are interested in teaching and training, then this course will help you to develop your skills. It will also create many opportunities by:

- Developing your understanding of all aspects of education and training, in both formal and informal sectors (adult education, community education and workplace education and training), as they have evolved in Ireland's social and historical context
- Explaining the key theories underpinning education, community development and organisational learning
- Providing you with the practical skills and theoretical understanding necessary to deliver high-quality education and training

### Garda Vetting

Garda vetting has been introduced for students who have unsupervised access to children and vulnerable adults as part of their studies at DCU. You must successfully pass the Garda vetting process in order to complete the process of registration.

**Additional Information**

This course is offered jointly by DCU and Whitehall College of Further Education.

**Contact Details**

dcu.ie/FPET

**Course Structure**

This one-year course offers modules at Quality and Qualifications Ireland (QQI/ FET) Level 5, including two modules at NFQ Level 8 which form part of the undergraduate degree in Education and Training (see page 206). You will attend DCU for one day per week each semester, so you will get to know the campus and enjoy the full university experience.

If you successfully complete both the course and the Level 5 Certificate in Education and Training (5M3635) in Whitehall College of Further Education, you may be eligible to progress to Year 1 of the full-time BSc in Education and Training course in DCU. However, this is dependent on passing the Foundation Programme and Level 5 Certificate with at least an overall merit.

Between DCU and Whitehall you will cover:

- Communications
- Concepts in Education and Training
- Interpersonal and Group Behaviour
- Personal and Professional Development
- Approaches to Early Childhood Education
- Social Studies
- Legal Practice and Procedures
- Word Processing
- Concepts and Contexts in Education and Training (DCU component)
- Social and Personal Development and Communication Skills (DCU component)

**What Will I Study?**

In addition to the core modules on your QQI/FET Level 5 course, you will study the following modules at DCU:

- Concepts and Contexts in Education and Training
- Social and Personal Development with Communication Skills

## Course Requirements

CAO CODE	COURSE TITLE	DURATION	POINTS
DC001	<b>Bachelor of Early Childhood Education</b>	4 years	445
<b>SUBJECTS REQUIRED</b>			
Leaving Certificate	No additional requirements (general entry requirements only; see page 232)		
GCE A Level	No additional requirements (general entry requirements only; see page 232)		
<b>OTHER ENTRY PATHS</b>			
QQI/FET Level 5 & 6	For details of QQI/FET requirements and relevant codes please see <a href="http://cao.ie/index.php?page=fetac_search">cao.ie/index.php?page=fetac_search</a> . Simply enter the DC code for the course you are interested in or if you are not sure of the code enter DC in the Select by Institution option, then click on Go. Students must have attained the FULL Level 5 or Level 6 QQI award with distinctions in relevant modules.		
Transfer Applications	No entry path.		
CAO CODE	COURSE TITLE	DURATION	POINTS
DC002	<b>Bachelor of Education</b>	4 years	518*
DC003	<b>Bachelor of Education for Gaeltacht applicants - Restricted entry* (See additional special course requirements for DC003)</b>	4 years	489
DC004	<b>Bachelor of Education Church of Ireland Centre pathway - Restricted entry**</b>	4 years	451
<b>SUBJECTS REQUIRED</b>			
Leaving Certificate	A minimum of H5 in at least three subjects and a minimum of O6/H7 in three other subjects. Course requirements: Gaeilge H4, English and Mathematics O4/H7. DC003 Gaeltacht pathway Applicants wishing to commence the Primary BEd (English medium) through the Gaeltacht Entry Route DC003 from September 2022 must meet the following updated criteria in order to be eligible to apply for entry to the course, which is done through the CAO process. a) Be resident in a Gaeltacht Language Planning area, and b) Must obtain at least a H3 in Leaving Certificate Irish Apart from the requirement to meet both of the two criteria listed above, applicants must also meet all the other requirements for entry to the Primary BEd as normal and any particular matriculation requirements for the HEI they are applying to.  ** DC004 Church of Ireland Centre pathway (Restricted Entry): students with minimum of H6 or O4 in Irish, you may be offered a place, but only if there are too few applicants with H4 in Irish. A Link Module of the Leaving Certificate Vocational Programme may be presented as one of the six subjects for the calculation of points but will not qualify as a subject for matriculation purposes. Applicants to DC004 may be called to interview to consider their eligibility for entry to the course. You must apply through CAO by 1 February. You will receive a Church of Ireland Centre eligibility assessment form which you must complete and return by the stated deadline. Late applications cannot be accepted.		
GCE A Level	Six subjects must be presented, at least three at GCE A Level with the remaining subjects at GCE AS or GCSE Level. A subject may be counted from only one of the examinations GCSE, GCE AS Level or GCE A Level. Particular subject requirements are: GCE A Level C Irish; GCSE C in both English and English Literature or GCSE B in either English or English Literature; GCSE D in Additional Mathematics or GCSE C in Mathematics; GCE A Level C in two further subjects; GCSE C in one other subject.		

**OTHER ENTRY PATHS**

QQI/FET Level 5	No entry path.
Transfer Applications	We will consider applications from students who are about to complete or have recently successfully completed the Year 1 of a full-time BEd degree course or its equivalent in a recognised third-level institution nationally. You must meet the entry requirements of the class you wish to transfer to, normally including the CAO points requirement. If you entered your current course as a mature student, you must satisfy the course entry requirements for mature students. You may be required to attend for interview. Transfer is subject to availability of places. DC004: No entry path.

**Additional Special Course Requirements**

**Mature applicants to Bachelor of Education (DC002 and DC004)**

If you are applying for mature entry to the Bachelor of Education course you must apply to CAO by 1 February. If you meet the eligibility criteria, you will receive a link in March to a supplementary form and instructions for completing and submitting this form from the CAO. If you meet the eligibility criteria and complete the supplementary form, you will be invited to attend for a general interview and oral Irish test.

**\*Iarratasóirí Gaeltachta Amháin (DC003)**

In Institiúidí Ardoideachais, is féidir suas go 10% de na h-áiteanna ar na cúrsaí múinteoireachta sa bhunoideachas, a choinneáil d'iarratasóirí Gaeltachta, i.e. ní mór d'iarratasóirí cónaí a bheith orthu sa Ghaeltacht mar a aithnítear go hoifigiúil í agus an Ghaeilge a bheith in úsáid mar ghnáth-theanga teaghlaigh acu. Féadann tú iarratas a chur isteach ar DC002 agus DC003 araon, más mian leat.

DCU Connected - Online Education

Wherever you live in Ireland or around the globe, DCU Connected provides access to world-class online education with courses designed to meet your needs. We offer a growing range of internationally recognised undergraduate degree courses and short course options, which you can take in a way that works for you.

At DCU, we realise that not everyone has the option of undertaking full-time, on-campus study. For these students, we aim to provide access to fully accredited DCU courses.

# Bachelor of Arts (Hons) in English and History (BAEH)

## Course Overview

This course is designed to develop students' knowledge and understanding of the English and History subject areas, and is therefore tailored to be suitable for anyone who wishes to focus specifically on these subjects in their studies, whether for personal or professional reasons.

The Bachelor of Arts (BA) in English and History course offers you the attractive opportunity to obtain a DCU undergraduate degree through online learning.

## Understanding the Course

The DCU BA in English and History is a Level 8 (on the National Framework of Qualifications (NFQ)) honours degree, which provides students with a focused, tailored course of education in English and History.

## Course Structure

The English and History subject areas are each presented as a suite of six modules. To complete the BA in English and History you need to complete the twelve modules in these two subjects as detailed in the table below. Students may choose to exit with a Diploma in English and History on completion of eight modules if they do not wish to progress to the degree qualification. Each module is awarded 15 European Credit Transfer System (ECTS) credit points. These points are accumulated towards the award of your degree. 180 ECTS credit points are required for the BA and 120 ECTS credit points are required for the Diploma in English and History.

## History

The History subject stream equips students with a wide range of skills and techniques upon which historical research and writings are based. Students will engage in the critical examination of historians' works, and the evaluation of primary sources, and will acquire the conceptual tools with which our view of the past is shaped. The modules provide perspectives on major themes in Irish and European political, economic, social and cultural history from the close of the Middle Ages to the 20th century.

## Literature

The Literature subject stream equips students with the skills and techniques to discriminate between literature and other forms of writing and representation, taking account of contemporary perspectives in criticism and theory, including feminism, historicism and post-modernism. Irish, British, American and other literature in English will be evaluated in terms of their contribution to cultural formation. Students will encounter competing ideas about writing and literature, within different historical and national frameworks.

## Career Prospects

The BA in English and History degree course facilitates those interested in pursuing any kind of work that requires critical thinking skills, high quality written expression, and transferable skills such as organisation and time-management. All these skills and abilities are highly valued by employers. Many people also enter their studies with the ambition of becoming a post-primary teacher.

# Bachelor of Arts in Humanities (BAH)

## Course Overview

---

Whether you are interested in pursuing a career in a specific discipline, for example Literature or Sociology, or are seeking a broad-based undergraduate education, the Bachelor of Arts (BA) in Humanities provides you with the means to achieve your goals.

Students can choose to explore a wide breadth of Humanities subject areas, while also specialising in at least one of the subject areas they find most rewarding. This degree's strength lies in its academic quality and its flexibility.

## Understanding the Course

---

The DCU BA in Humanities is a Level 8 (on the National Framework of Qualifications (NFQ)) honours degree. Students undertaking this degree choose to study a selection of modules in History, Literature, Philosophy, Sociology and Psychology.

## Course Structure

---

As a student on this degree you may choose to study from a range of modules in the following Humanities subject areas:

- History
- Literature
- Philosophy
- Psychology
- Sociology

To complete the BA in Humanities you need to complete twelve modules, with at least five modules in one subject area. Students may choose to exit with a Diploma in Humanities on completion of eight modules. Each module is awarded 15 European Credit Transfer System (ECTS) credit points. These points are accumulated towards the award of your degree. 180 ECTS credit points are required for the BA in Humanities and 120 ECTS credit points are required for the Diploma in Humanities.

## History

---

The BA in Humanities course facilitates those interested in pursuing any kind of work that requires critical thinking skills, high-quality written expression and transferable skills such as organisation and time-management. All these skills and abilities are highly valued by employers. Many people also enter their studies with the ambition of becoming a post-primary teacher.

# Bachelor of Arts Single Module (BASM)

## Course Overview

---

The BASM allows students to undertake study at university degree level for personal enjoyment or for continual professional development purposes without having to commit to study towards a degree.

Teachers who wish to up-skill and become registered with the Teaching Council may use the BASM course in order to accomplish this goal.

## Understanding the Course

---

BASM students study a small number of modules at degree level (level 8 on the National Framework of Qualifications) for personal enjoyment or continual professional development without having to commit to study towards a degree or diploma. Of specific interest to BASM students who are post-primary teachers is that the History, Literature, Philosophy and Sociology modules meet the Teaching Council criteria for general registration in relation to the teaching of History (History), English (Literature) CSPE (Sociology) Environmental and Social Studies (ESS) (History); and Politics and Society (History or Philosophy, Sociology). Teachers who wish to up-skill and become registered in one of these subject areas may use the BASM course in order to accomplish this goal.

## Career Prospects

---

The studying of individual modules will develop skills such as critical thinking, high quality written expression, and transferable skills such as organisation and time-management. The knowledge, abilities and skills you will develop are highly valued by employers and will also be useful and valuable to you should you undertake any further study. Many BASM students are existing teaching staff who enhance their teaching prospects by adding another subject to their repertoire.

# Bachelor of Science in Information Technology (IT)

## Course Overview

---

The course should be of particular relevance if you are working or aspiring to work in the dynamic IT/ Software industry, especially if you have no third-level IT qualification or have an IT qualification lower than an honours degree. This course provides students with critical insight into the application of Information Technology to the processes of management, innovation and administration within a range of organisations.

## Understanding the Course

---

This BSc in IT is a level 8 honours degree awarded by DCU. The course is delivered primarily online. Modules at Level 1 and Level 2 are worth 15 European Credit Transfer System (ECTS) credits each. Degree level modules are worth 20 ECTS credits each.

## Technology and Online Skills required

---

Your learning experience as a DCU Connected student is enhanced through the use of rich digital media. You can find detailed information on the necessary equipment and skills required for DCU Connected students at: [dcu.ie/connected/technology-skillsrequirements](http://dcu.ie/connected/technology-skillsrequirements)

## Mathematics - Recommendation

---

It is recommended that applicants have successfully studied mathematics at Leaving Certificate level. For those of you who have not studied Maths in a long time, we recommend you review the content in our Preparatory Maths Module, available online after you have registered.

## Credit for Prior Learning

---

If you have been in higher education before you may be able to get credit for courses you have successfully completed. It is essential to hold at least 120 ECTS credits at level 7 in order to be eligible for Direct Entry which allows candidates to complete the degree in two years.

For more information contact:  
[ict.openeducation@dcu.ie](mailto:ict.openeducation@dcu.ie)

## Course Structure

---

The course consists of an integrated series of modular courses outlined in the table below.

Students must successfully complete fourteen (14) modules, equating to 240 ECTS credits, to be eligible for the award of a degree. Students may choose to exit with the award of a Diploma on completion of the eight (8) modules at Level 1 and Level 2, equating to 120 ECTS credits.

## Career Prospects

---

You will graduate from this course with a unique mix of skills in computing and business. Graduate roles include:

- Software Developer
- Mobile App Developer
- Embedded Systems Developer
- Front End Developer
- Cloud Developer
- DevOps Engineer
- IT Project Manager
- Technical Writer
- Software Support Specialist
- Software Tester

In addition to traditional ICT career paths, graduates of this programme will have the skills to pursue innovation and entrepreneurship by starting their own ICT-enabled businesses. Additionally, you will develop many transversal skills such as critical thinking, time-management, communication, collaboration, evaluation, and of course digital skills. All these skills are highly valued by employers.

# Bachelor of Science in Management of Information Technology / Information Systems (IT/IS)

## Course Overview

---

The course should be of particular relevance to those working or aspiring to work in the Management of IT/IS, especially those with no third-level qualification or with a sub-honours degree qualification. The course is designed particularly for those interested in the management of Information Technology and Information systems and/or using IT to promote enterprise or institutional development and renewal. The course should also be of interest to those attracted to a career in industrial training and/or teaching positions in IT. The course equips students with competence in the Management of Information Technology/ Information Systems with a critical appreciation of its potential application to the processes of innovation.

## Understanding the Course

---

This BSc in Management of Information Technology and Information Systems is a level 8 honours degree awarded by DCU. The course is delivered primarily online. Modules at Level 1 and Level 2 are worth 15 European Credit Transfer System (ECTS) credits each. Degree level modules are worth 20 ECTS credits each.

## Technology and Online Skills Requirements

---

Your learning experience as a DCU Connected student is enhanced through the use of rich digital media. # Bachelor of Arts in Humanities (Psychology Major) (BAPY)

## Course Overview

---

This course is designed to develop students' knowledge, skills and competencies in Psychology, and is therefore tailored to suit anyone who wishes to study Psychology at undergraduate level; whether for personal or professional reasons.

You may have: a general interest in studying behaviour, thoughts, feelings, motivations etc.; a specific interest in one area of Psychology, for example Social Psychology or Psychological Counselling, or; a specific interest in one of the fields in which psychological knowledge, skills and competencies can be applied, such as education or health.

## Understanding the Course

---

The DCU Bachelor of Arts (BA) in Humanities (Psychology Major) is a Level 8 (on the National Framework of Qualifications) honours degree, which provides students with a focused, tailored programme of education in Psychology. The course is accredited by the Psychological Society of Ireland (PSI), which ensures that the course meets the highest standards for undergraduate, pre-professional education and training in Psychology.

## Course Structure

---

On this course you will study nine Psychology modules, which cover the core areas of Psychology. As part of this course you will also have the opportunity to complete, under supervision, an independent research project in Psychology. In addition to the Psychology modules, you will study three Sociology or three Philosophy modules that will complement your studies in Psychology. The choice of Sociology or Philosophy must be made in Year 1 of study. Once the student has completed the foundation level module in either subject area, the choice of two from the following can then be made for that subject:

### Sociology:

- SC200 - Sociology of the Lifecourse
- SOC3A - Power, Social Order, Crime, Deviance, Work and Employment
- SOC4 - Social Inequality and Intergroup Relations

### Philosophy:

- PH200 - What can I know: The Philosophy of Knowledge
- PHIL3 - Philosophy of Values: Ethics and Aesthetics
- PH220 - Philosophy of Education: Teaching, Pedagogy and Practice

To complete the BA in Humanities (Psychology Major) a student needs to successfully complete the twelve modules from these two subjects. Students may choose to exit with a Diploma in Humanities (Psychology Major) on successful completion of eight modules, if they do not wish to progress to the full degree qualification. It should be noted that this Diploma is not a route to graduate membership of the Psychological Society of Ireland, and therefore, it is not a route into the field of Psychology. Each module is awarded 15 European Credit Transfer System (ECTS) credit points. These points are accumulated towards your award of degree. 180 ECTS credit points are required for the BA and 120 ECTS credit points are required for the Diploma.

## Career Prospects

---

The knowledge, skills and competencies relating to psychological research methods that graduates will achieve on completing this course, will allow them to work in junior researcher positions. Graduates from the BA in Humanities (Psychology Major) course who intend to qualify as professional Psychologists will need to pursue further training in Psychology at Masters or Doctoral level. Graduates from the BA in Humanities (Psychology Major) will be able to go on to postgraduate study, and careers, in a number of Psychology's subdisciplines and related fields.

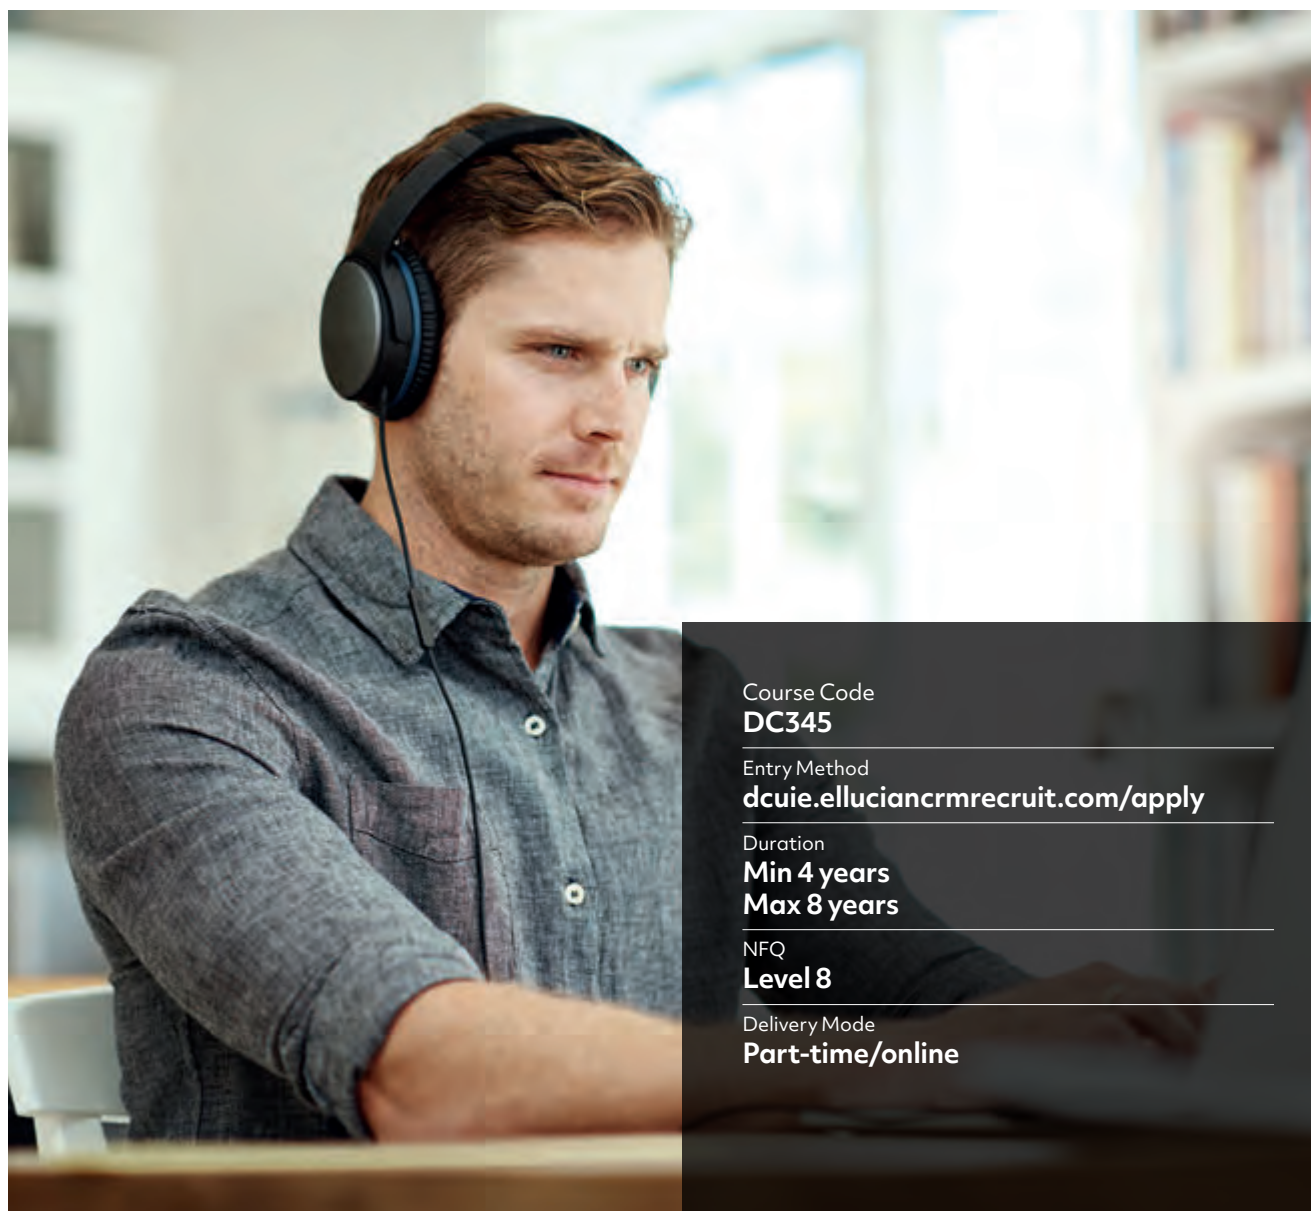

Graduates may proceed to either a taught masters or doctoral programmes in a specific sub-discipline of Psychology, or a Psychology masters or doctorate by research, where they conduct a research project, under supervision, in their area of interest.

# How to Apply

The following pages contain information for applicants applying on the basis of:

DARE	236
Deferring Your Course	235
External Transfer Applicants	237
GCE A Level	234
HEAR	237
International Students	238
Irish Leaving Certificate	232
Mature Applicants	235
QQI/FET Awards	233

### Leaving Certificate Grading Scale

The Department of Education and Skills introduced a new Leaving Certificate grading scale in 2017. The new scale has 8 grades: the highest grade is grade 1 and the lowest grade is grade 8.

The highest seven grades (1 to 7) divide the marks from 100% to 30% into seven equal grade bands, which are 10% wide. Grade 8 is awarded for percentage marks of less than 30%. The grades at higher level and ordinary level are distinguished by prefixing the grade with H or O respectively, giving H1-H8 at higher level, and O1-O8 at ordinary level.

This new 8-point grading scale replaced the 14-point scale at both Higher and Ordinary levels. Previously, the majority of students receiving a given grade were within 3 percentage marks (and 5 extra points) of a higher grade. This created pressure towards rote learning and using the marking scheme to gain those few additional marks.

The new broader grade bands aim to ease the pressure on students to achieve marginal gains in examinations and encourage more substantial engagement with each subject.

### Age Limited for Entry

Applicants must be at least 16 years of age on 15 January of the year of entry.

### English Language Requirements

All non-native speakers of English MUST provide evidence of competence in the English Language. For further information, please visit [dcu.ie/registry/english-non-native-speakers](http://dcu.ie/registry/english-non-native-speakers)

### General Entry Requirements

A minimum of six Leaving Certificate subjects at Grade O6/H7, which must include Mathematics and English or Irish. In addition, applicants must present at least two subjects at grade H5.

### Bachelor of Education (Honours Degree)

#### DC002, DC003 and DC004\*

Please note that there are specific entry requirements for the above courses. They are as follows: general entry requirements as above. In addition, you must attain a minimum of three subjects at Grade H5, to include a H4 in Irish; O4/H7 in English; O4/H7 in Mathematics.

#### DC003 Gaeltacht pathway

Applicants wishing to commence the Primary BEd (English medium) through the Gaeltacht Entry Route DC003 from September 2022 must meet the following updated criteria in order to be eligible to apply for entry to the course, which is done through the CAO process.

- Be resident in a Gaeltacht Language Planning area, and
- Must obtain at least a H3 in Leaving Certificate Irish

Apart from the requirement to meet both of the two criteria listed above, applicants must also meet all the other requirements for entry to the Primary BEd as normal and any particular matriculation requirements for the HEI they are applying to.

#### \* DC004 Church of Ireland Centre pathway (Restricted Entry):

If you hold a minimum H6 or O4 in Irish, you may be offered a place, but only if there are too few applicants with H4 in Irish.

### Course Entry Requirements

Additional course requirements are outlined in the summary tables on pages 244-255.

### Leaving Certificate Mathematics Requirements

DCU does not award points for the subject of Mathematics at Leaving Certificate Ordinary Alternative or Foundation Level. However, these courses will be accepted for admission purposes for the following courses:

- DC001 - Bachelor of Early Childhood Education
- DC009 - Bachelor of Arts: Joint Honours
- DC014 - BA in Jazz and Contemporary Music Performance
- DC131 - BA in Communication Studies
- DC132 - BA in Journalism
- DC133 - BSc in Multimedia
- DC155 - BA in Applied Language and Translation Studies
- DC231 - BA in International Relations
- DC232 - Bachelor of Civil Law and Society
- DC235 - BSc in Education and Training
- DC238 - BA in Social Sciences and Cultural Innovation
- DC291 - Bachelor of Arts – Joint Honours (Media)
- DC292 - Bachelor of Arts – Joint Honours (Law)
- DC293 - Bachelor of Arts – Joint Honours (International Languages)
- DC294 - BA in Climate and Environmental Sustainability
- DC295 - Bachelor of Arts – Joint Honours (Politics)

## Leaving Certificate Subject Combinations

Certain subjects will not be scored separately if they occur in combination with subjects that are similar in content. In each case, the highest individual grade will be scored. The following six groups of subjects are affected by this:

- 1 Music and Musicianship, Music A, Music B.
- 2 Economics, Agricultural Economics.
- 3 Physics with Chemistry - if combined with Physics and Chemistry; only two best scored - if combined with Physics or Chemistry; only best scored.
- 4 History, Economics and Economic History - if all three subjects are taken; only the best two will be scored.
- 5 Latin, Classical Studies.
- 6 Greek, Classical Studies.

Leaving Certificate (LC) applicants			
Higher Grade	Points	Ordinary Grade	Points
H1	100	O1	56
H2	88	O2	46
H3	77	O3	37
H4	66	O4	28
H5	56	O5	20
H6	46	O6	12
H7	37	O7	0

Candidates who meet the points requirements but not the specific course requirements, for example H4 in English for the BA in Journalism, are permitted to repeat that subject only to meet the course requirements.

## Bonus Points for Honours Mathematics

25 bonus points will continue to be awarded for higher level Mathematics, at grades H6 and above in the Irish Leaving Certificate or equivalent.

Leaving Certificate Vocational Programme (LCVP) Linked Modules		
Distinction	Merit	Pass
66	46	28

Please note that LCVP link modules cannot be used as a subject for general or specific course entry requirements, but can be used for the calculation of points.

All QQI/FET awards are part of the new inclusive National Framework of Qualifications (NFQ), developed by QQI/FET.

Applicants who have a full NFQ Level 5 award in the appropriate qualifications and modules, with a minimum of five distinctions, can be admitted on a competitive basis to certain DCU courses. There are a limited number of places available on courses. QQI/FET entry route is a competitive entry route with a limited number of places. A quota of places are offered based on the CAO ranked order of applicants based on performance.

NFQ has made changes to the CAS (Common Awards System). Please refer to the DCU website for specific details on the range of QQI/FET awards which link into the University's Level 8 degree courses.

## General Entry Requirements

- Full QQI/FET Level 5 Certification must be achieved in one single sitting
- QQI/FET awards are normally made up of eight minor awards, commonly known as modules
- Five distinctions from the eight modules must be achieved

## Course Entry Requirements

There may be some courses that require additional requirements. For the most up-to-date information on course requirements, please see the student resources page on [cao.ie](http://cao.ie)

## Applying to DCU

Students make their application through the CAO and are ranked based on their performance in the eight modules that make up their award.

## Please note:

- 1 A Major Award must be achieved. Component Certificates or Records of Achievement are not acceptable.
- 2 In certain courses, DCU will require the achievement of certain grades and/or specified components, (e.g. five distinctions, including a minimum pass in Mathematics, or four specific science modules).
- 3 A Major Award may be achieved over a number of sittings; however, for scoring purposes, only results achieved in a single sitting are assessed (e.g. between 1 August and 31 July). It is the responsibility of the applicant to ensure that their QQI/FET centre applies for a Major Award to QQI/FET where courses are taken over more than one year.

# General Certificate in Education GCE A Level

## General Entry Requirements

In order to meet the general entry requirements, students must meet one of the following requirements:

- Two Grade C at GCE A Level plus four Grade C at GCSE Level, which must include the subjects Mathematics and English (or Irish)
- Two Grade C at GCE A Level plus two Grade C at GCE AS Level plus two Grade C at GCSE Level, which must include the subjects Mathematics and English (or Irish)
- Two Grade C at GCE A Level plus one Grade C at GCE AS Level plus three Grade C at GCSE Level, which must include the subjects Mathematics and English (or Irish)

## Bachelor of Education (Honours Degree) - DC002 and DC003 and DC004 (CIC)\*

Please note that there are specific course entry requirements for above courses. Six subjects must be presented, at least three subjects at GCE A Level and the remaining subjects at GCE AS and A level. The six subjects must include Irish, English and Mathematics.

The minimum grades required are as follows:

- Irish: Grade C at GCE A Level
- English: Grade C at GCSE Level in both English and English Literature, or Grade B at GCSE Level in either subject
- Mathematics: Grade D at GCSE Level in Additional Mathematics or Grade C at GCSE Level in Mathematics
- Grade C at GCE A Level in two further subjects
- Grade C in one other subject at GCSE Level

\*DC004 is a restricted entry pathway for those who are aware of and willing to support the distinctive ethos of primary schools under Church of Ireland, Methodist, Presbyterian and Society of Friends patronage.

## Course Entry Requirements

Additional course requirements are indicated in the details of each course in this prospectus.

## General Certificate in Education

After satisfying the general entry requirements and course entry requirements, applicants are ranked for admission based on a score calculated on the basis of either:

- The best four GCE A Level grades from one academic year, or
- The best three GCE A Level grades from one year, plus one AS Level grade in a different subject from the same or preceding year only

The points that apply to each grade are indicated in the following table:

Grade	GCE A Level	4th A Level	GCE AS Level
A*	185	45	31+
A	156	38	26
B	131	32	22
C	106	26	18
D	84	20	14
E	63	15	11

## Bonus Points for Mathematics

25 bonus points will be awarded to students who have passed GCSE A Level Mathematics.

## Additional Notes:

- Applied A Levels are not accepted
- For a list of accepted GCE subjects, please visit [dcu.ie/acceptable-entry-subject](http://dcu.ie/acceptable-entry-subject)

## Deferring Your Course

If you wish to defer an offer of a place at DCU, do not accept your CAO offer. Instead, you must email the Registry Office immediately at [deferredapplications@dcu.ie](mailto:deferredapplications@dcu.ie)

You must give your name as it appears on your CAO application, quote your CAO application number and the course code of the offer you wish to defer, and set out the reason(s) for the request.

Applicants must mark "DEFERRED ENTRY" clearly on the in the subject line of the email.

The email must arrive in the Registry Office at least two days before the reply date shown on the CAO offer notice. DCU will communicate a decision to you directly.

If you defer your entry, you will have to re-apply the following year through the CAO, putting the deferred course as the first and only option on your application form. If not, you will automatically forfeit your deferred place.

DCU reserves the right to refuse any deferral application.

## Mature Applicants

At DCU, we welcome students of all ages and backgrounds. We recognise that adults returning to study bring a wealth of skills, knowledge and experiences they have gained from work, family and life in general. Mature students who choose DCU will find exciting challenges, a vibrant learning community and a network of supports.

If you apply as a mature student (aged 23 or over on 1 January in the year of entry), you do not compete with Leaving Certificate students for a place. Instead, we consider your lifelong learning such as work experience, studies, personal interests and any other relevant experience – along with your motivation to return to study.

We appreciate the contributions that mature students make and provide supports, such as dedicated workshops, to help you make the most of your time here. We also recognise the economic, educational and social challenges that some may face. The Mature Students Officer can provide support and information before you apply and throughout your studies.

The social aspect of DCU is important too. Mature students can bring valuable skills and experience to the many clubs and societies. You can also meet others at the Mature Students Society – for support, for study groups or simply for coffee.

**Mature Applicants EU/EEA and Non-EU**  
DCU has an active mature student body and strongly encourages applications from mature candidates (those aged 23 years or above on 1 January in the year of entry). As a mature student, your wealth of knowledge and experience will make a valuable contribution to the university, and we are always working towards widening participation to allow mature students gain entry onto DCU courses.

### What are the entry requirements?

Applying as a mature applicant means that you do not compete with Leaving Certificate students for places at DCU. Instead, experience other than examination grades is taken into consideration – this may be work experience, further studies or other

relevant experience. For some courses, however, particular Leaving Certificate subjects may be necessary. In all cases, the university will want to know that you have the ability and motivation to make the most of your studies at DCU.

### What supports are available for mature students?

There is a wide network of services. Writing Head Start is a one week course which prepares you for college life through workshops on topics such as academic writing, citing, referencing and resiliency awareness. Throughout your studies you will have access to various supports such as the Mathematics Learning Centre, IT supports and the Mature Student Society. You will also have access to Student Support and Development workshops throughout the academic year for example CV Clinics, Learning Students and Motivational Workshops. The Mature Student Officer is available for one to one meetings and offers various workshops and information session. For more information please visit [dcu.ie/mature-students](http://dcu.ie/mature-students)

### What financial supports are available to mature students?

There are a number of sources, including the Government's Free Fees Initiative, the Higher Education Grants Scheme, the Back to Education Allowance, the DCU Student Assistance Fund and the 1916 Bursary once you become a registered student. For further information, please visit [studentfinance.ie](http://studentfinance.ie)

### How do I apply?

All mature applicants for full-time study must apply to the Central Applications Office (CAO) by 1 February in the year of entry.

For information please contact the Mature Student Officer,  
T +353 (0)1 700 6987  
E [orla.stafford@dcu.ie](mailto:orla.stafford@dcu.ie)

For general and admission enquiries, please contact Registry  
T +353 (0)1 700 5338  
W [dcu.ie/registry/undergrad](http://dcu.ie/registry/undergrad)

# Disability Access Route to Education (DARE)

## Mature Application - SPECIAL CASES

### Bachelor of Education DC002 and DC003 and Bachelor of Education Restricted Entry DC004

If you are applying for mature entry to the Bachelor of Education course you must apply to CAO by 1 February. In March, those meeting the eligibility criteria will receive a supplementary form and instructions from the CAO for completing and submitting this form. Applicants who meet the eligibility criteria and complete the supplementary form will be invited to attend for a general interview and oral Irish test.

### BSc in Nursing

- All candidates applying for the BSc in Nursing (four year/ four-and-half-year-course) must apply through the Central Applications Office (CAO).
- Mature Entry is for those that are 23 years of age or older by 1 January in the year of entry, applicants are also required to sit a test.
- Candidates are assessed by the Nursing Careers Centre (NCC) of An Bord Altranais agus Cnáimhseachais na hÉireann (Nursing and Midwifery Board of Ireland, NMBI).
- Mature entry route is based on applying for a nursing/ midwifery course via cao.ie by 1 February or late application date of 1 May. Applicants can also avail of the change of mind facility on CAO up to 1 July. Although it is possible to make a late application to mature nursing, it is not possible to apply late for other mature entry routes. Other mature entry routes should be applied for by 1 February, to ensure they can engage in any mature assessments.

For details please visit: [nursingcareers.ie](http://nursingcareers.ie) or email: [careersinformation@NMBI.ie](mailto:careersinformation@NMBI.ie) to request a copy of their nursing and careers booklet.

The Disability Access Route to Education (DARE) is a supplementary admissions scheme for school leavers with disabilities.

School leavers who meet the eligibility criteria, compete for a quota of places allocated to applicants on a reduced points basis in DCU. All applicants must meet the Irish Leaving Certificate (or equivalent) matriculation/minimum entry and the specific course entry requirements.

### Who Should Apply to DARE?

DARE is for school leavers (be under the age of 23 as of 1 January 2022) who have the ability to benefit from, and succeed in, higher education but who may not meet the points requirements for their preferred course due to the effect of a disability. Mature and QQI/FET students have different admissions routes. Further information is available at [dcu.ie/registry/undergrad](http://dcu.ie/registry/undergrad)

### How to Apply to DARE

- 1 Apply to CAO by 5.15pm on **1 February 2022**.
- 2 After applying to CAO, you must indicate that you wish to be considered for the DARE scheme on Section A of the fully completed Supplementary Information Form by 5.15 pm on **1 March 2022**.
- 3 You will receive instruction about the completion and return of Sections B and C of the Supplementary Information Form, which must arrive at the CAO by 5.15pm on **15 March 2022**.

### Conditions of a DARE Offer

Students who receive a DARE offer must register with the Disability and Learning Support Service and agree on a schedule of meetings with the service.

More information on DARE is available from your school Guidance Counsellor or from the DCU Disability and Learning Support Service - [dcu.ie/disability](http://dcu.ie/disability) Information is also available online at [accesscollege.ie](http://accesscollege.ie) or [cao.ie](http://cao.ie)

### What does DCU mean by the term 'disability'?

'Disability' means a physical, sensory, mental health or specific learning difficulty that has a substantial and long-term adverse effect on your ability to carry out normal day-to-day activities.

For information on what kind of supports are available if you have a disability, go to [dcu.ie/disability](http://dcu.ie/disability) or contact a member of the team:

E [disability.service@dcu.ie](mailto:disability.service@dcu.ie)

# Access DCU and Higher Education Access Route (HEAR)

With over thirty years of experience in welcoming and supporting access students to DCU, we have one of the largest and most successful programmes in Ireland. We are committed to offering 10% of places on every undergraduate degree courses to students entering through our access routes.

DCU Access Service co-ordinates two programmes aimed at increasing participation in higher education by students who, for a variety of financial or social reasons, might not view going to university as a viable option. DCU participates in the national Higher Education Access Route (HEAR) and continues to operate its own access route, Access DCU.

## 1 Access DCU

Access DCU is an entry route for school leavers from socio-economically disadvantaged backgrounds applying for courses in DCU. Eligible students compete for a place from a quota of reduced-points places in DCU or for a number of subsidised on-campus accommodation scholarships. Students who get a university place through Access DCU also get a range of personal, academic and social supports.

To find out more about Access DCU or to find out if you are eligible for the scheme, please go to [dcu.ie/access](http://dcu.ie/access)

## 2 Higher Education Access Route

The Higher Education Access Route (HEAR) is a third-level admissions scheme for school leavers from socio-economically disadvantaged backgrounds. HEAR has been established by a number of higher education institutions based on the evidence that socio-economic disadvantage has a negative impact on educational achievement at school and on progressing to higher education. School leavers who provide satisfactory evidence relating to their socio-economic circumstances and meet the Irish Leaving Certificate matriculation/minimum entry and subject requirements are eligible to compete for a quota of places allocated to applicants on a reduced points basis in DCU. As the minimum entry and subject requirements may be different for each

course, applicants should check this prospectus for the requirements of each preference listed on your CAO form.

## Who should apply to HEAR?

HEAR is for school leavers (be under the age of 23 on 1 January 2022). Mature and QQI/FET students have different admission routes. Further information is available at [dcu.ie/registry/undergrad](http://dcu.ie/registry/undergrad)

## How to Apply to HEAR

- 1 Apply online to CAO by 5.15pm on **1 February 2022**. You must indicate in your CAO application that you wish to apply for the HEAR scheme no later than 5.15pm on **1 February 2022**.
- 2 You must fully and correctly complete all elements on the HEAR form (the HEAR form is a part of your CAO application) by 5.15pm on **1 March 2022**.
- 3 You must submit relevant evidence in support of your application to arrive at the CAO no later than 5.15pm on **15 March 2022**. HEAR applications can only be made online at [cao.ie](http://cao.ie).

More information on HEAR is available from your school Guidance Counsellor or the DCU Access Office. Information is also available at [accesscollege.ie](http://accesscollege.ie), [cao.ie](http://cao.ie) and [dcu.ie/access](http://dcu.ie/access)

## Conditions of a HEAR Offer

Students who receive a HEAR offer must attend an orientation programme before the first term begins. Students who accept places in DCU through HEAR are offered a variety of academic, personal and social supports while studying at third level. Details are available at [accesscollege.ie](http://accesscollege.ie) and [dcu.ie/access/post-entry-supports](http://dcu.ie/access/post-entry-supports)

# External Transfer Applicants

Applicants taking higher education studies at another institute, who are seeking to transfer to a course of study at DCU must apply directly to DCU by the 1 July. A transfer applicant may be eligible for advanced entry to a course. This will depend on the curriculum of previous studies, performance on the previous course and competition in the year of entry.

Full documentation, including course syllabus and transcripts, must be included in the application. An interview may be required as part of the application assessment. Please note that not all courses accept transfer applications. Please refer to course-specific information in this prospectus. For further information [dcu.ie/registry/transfer-applicants](http://dcu.ie/registry/transfer-applicants)

DCU assesses the content and knowledge levels attained from all other national and international school leaving examinations. Applicants should note that not all school leaving examinations are of a standard sufficient for admission to DCU.

For further information, EU/EFTA applicants (other than Leaving Certificate), please see student resources page at [cao.ie](http://cao.ie)

- 1 Applicants are assessed based on their performance in their school leaving examinations. Applicants must meet DCU's minimum general entry requirements as well as the specific course requirements (see pages 244-255).
- 2 Applicants who satisfy the minimum entry requirements are ranked for admission in order of merit, on the basis of their results in their school leaving examinations.
- 3 This ranking/scoring will be based on one sitting of school leaving examinations. For example, Irish school leavers will have their points score calculated on the basis of one sitting of the Leaving Certificate examinations.
- 4 The regulations regarding general entry requirements and specific course requirements may be satisfied by results obtained from more than one sitting. For example, candidates who meet the points requirements but not the specific course requirements, for example H4 in English for the BA in Journalism, are permitted to repeat that subject only to meet the course requirements.
- 5 All those presenting EU/EEA qualifications must apply through the CAO by 1 February.

If you have any queries regarding entry requirements for admission to DCU, please contact the Registry Office at:

**T** +353 (0)1 700 5338  
**F** +353 (0)1 700 5504  
**W** [dcu.ie/english-language](http://dcu.ie/english-language)

International students are an essential part of life at DCU. Your experiences, language and culture are welcomed and highly valued. As an international student, you may have queries that are not answered elsewhere in this prospectus. The International Office can offer guidance and assistance before, during and after you join us at DCU.

The International Office team are committed to international education. Our considerable expertise will help to make the application process smoother and the overall undergraduate experience at DCU more enjoyable for you. We provide a tailored orientation period that all students must attend before beginning their studies. You will be provided with detailed information about this orientation programme before arriving at DCU.

### Applying for a Degree

Applicants who are applying for admission to full-time undergraduate study and who are presenting with Non-EU qualifications should apply directly to the International Office using the IO10 Undergraduate Application form. This procedure does not apply to candidates who wish to be considered as a mature student, or who apply for Nursing courses.

Applicants are primarily assessed on the basis of their second level examinations. Candidates are expected to:

- Have taken school-leaving examinations of a standard that is equivalent to the Irish Leaving Certificate or to the GCE A Level
- Satisfy the general entry requirements (page 232) plus course specific entry requirements, as outlined on pages 244-255, and
- Satisfy the English language requirements

For more information on international assessments please visit [dcu.ie/international/how-apply](http://dcu.ie/international/how-apply)

### Information for Non-EU applicants

- Applications for 2022/2023 are accepted on an ongoing basis from October 2021 to 15 July 2022
- All non-EU candidates are advised to apply early, particularly if they are nationals of a non-EU state where a study visa is required. Places are limited, particularly in the more popular courses, so early application is advised to avoid disappointment
- All applications are assessed carefully and we will write to you when a decision has been made. If your application is successful, you will receive an offer which may be a conditional offer (based on your final academic or English language results) or a Full Offer. You will be required to accept this offer
- Non-EU applicants who require a visa to study in Ireland should be aware of Ireland's immigration regulations associated with studying part-time or distance education programmes.  
Please visit: [inis.gov.ie/en/INIS/Pages/Study](http://inis.gov.ie/en/INIS/Pages/Study)
- All non-EU high-achieving applicants will automatically be considered for Merit Scholarships worth up to €2000 for entry in 2021/22

## Visiting Students: Erasmus+, Exchange and Study Abroad

DCU welcomes students from outside Ireland who wish to study for one semester or one year at the University and accumulate credits towards their registered degree programme at their home university. Applications must be made directly to the International Office by 1 July for entry in September and by 30 November for February entry. More details on this opportunity please visit [dcu.ie/international/visiting-students](http://dcu.ie/international/visiting-students)

## International Foundation Year

The International Foundation Year Programme is carefully designed to equip international students with the appropriate academic and English preparations for their full time degree at DCU. It will also help you adjust to the culture of Irish university learning. Upon successful completion of your foundation programme, you will progress to year 1 of your chosen undergraduate degree. For further information, please visit [english.dcu.ie/courses/ify-international-foundation-year](http://english.dcu.ie/courses/ify-international-foundation-year)

## English Language Programmes

DCU Language Services (DCULS), based on the Glasnevin Campus, offers English language courses all year round. These are popular with international students. Whether you want to improve your fluency, undertake international exams, acquire professional language skills for your career, or apply for a pre-sessional English course, DCULS have courses to suit you. DCULS have over 20 years' experience teaching English as a foreign language.

## International Office

The International Office can help you with:

- Application procedures
- Immigration support documentation and assistance with immigration registration
- Pre-arrival information
- Airport collection (on dedicated dates)
- Welcome Week/Tailored Orientation at the start of each semester
- Social events throughout the year
- International Student Ambassador Programme
- US Federal Aid

Comprehensive information and updates are posted on our website and social media accounts.

## International Foundation Programme

The International Foundation Programme is carefully designed to equip International students with the appropriate academic and English preparations for their full time degree at DCU. It will also help you adjust to the culture of Irish university learning. Upon successful completion of your foundation programme, you will progress to year 1 of your chosen undergraduate degree.

For further information, please visit [dcu.ie/international-foundation-programme](http://dcu.ie/international-foundation-programme)

## Immigration Regulations

The Department of Justice and Equality provides information for students wishing to apply for study visas in Ireland.

For further information, please visit [inis.gov.ie](http://inis.gov.ie)

## Do you offer English-language courses?

DCU Language Services (DCULS), based on the DCU Glasnevin campus, offers English-language courses all year round. Whether you want to improve your fluency, undertake international exams, acquire professional language skills for your career, apply for a pre-sessional English course or for a Pre Master Programme, DCULS has courses to suit you. DCULS has over 30 years' experience teaching English as a foreign language.

For further information, please visit [english.dcu.ie](http://english.dcu.ie)

## Do I need to prove my competency in the English language?

All applicants for undergraduate and postgraduate courses must provide evidence of competence in the English language.

For information on the types of tests and the minimum standards of English required for entry, please visit [dcu.ie/english-language](http://dcu.ie/english-language)

## DCU IELTS Exam Centre

The International English Language Testing System (IELTS) is internationally respected and accepted for migration, study, work, and training purposes.

DCU holds regular IELTS test dates for both IELTS Academic and IELTS General Training on the DCU Glasnevin campus.

For further information on upcoming test dates, please visit [ieltsireland.com/register](http://ieltsireland.com/register)

### \*DCU Performance Sports Programmes CAO Points Concession

#### How to Apply

To apply for the CAO Points Concession and/or the Sport Scholarship programme applicants must complete an online application form. Please note:

- There is one application form for both programmes and you must indicate if you wish to apply for one or both programmes
- Applicants that apply for the CAO Points Concession programme must also make an application for a DCU programme of study through the CAO, [cao.ie](http://cao.ie) from early November 2021 until 1 May 2022
- DCU Performance Sport online applications will open in February 2022
- The closing date for applications is 1 May 2022. The online application form is available at [dcu.ie/sportscholarships](http://dcu.ie/sportscholarships)

### SPECIAL CASES

#### Bachelor of Education

If you are applying for mature entry to the Bachelor of Education course you must apply to CAO by 1 February. In March, applicants meeting the eligibility criteria will receive a link to a supplementary form and instructions from the CAO for completing and submitting it. Applicants who meet the eligibility criteria and complete the supplementary form will be invited to attend for a general interview and oral Irish test.

#### BSc in Nursing (four-year/ four-and-a-half year course)

All candidates applying for the BSc in Nursing (four year/ four-and-half-year-course) must apply through the Central Applications office (CAO).

Mature Entry is for those that are 23 years of age or older by 1 January in the year of entry, applicants are also required to sit a test.

Candidates are assessed by the Nursing Careers Centre (NCC) of An Bord Altranais agus Cnáimhseachais na hÉireann (Nursing and Midwifery Board of Ireland, NMBI).

Mature entry route is based on applying for a nursing/midwifery course via [cao.ie](http://cao.ie) by 1 February or late application date of 1 May. Applicants can also avail of the change of mind facility on CAO up to 1 July. Although it is possible to make a late application to mature nursing, it is not possible to apply late for other mature entry routes. Other mature entry routes should be applied for by 1 February, to ensure they can engage in any mature assessments.

For details please visit: [nursingcareers.ie](http://nursingcareers.ie) or email: [careersinformation@NMBI.ie](mailto:careersinformation@NMBI.ie) to request a copy of their nursing and careers booklet.

# Fees Information

The University has three undergraduate fee rates. These are based on whether the applicant is designated as an EU or non-EU citizen, and whether the EU applicant qualifies under the Free Fees Scheme or not.

For the 2021/2022 academic year, full-time undergraduate Irish/EU/EEA/Swiss State students qualifying under the Free Fees Scheme are required to pay a registration fee of €3,000 plus a combined Student Centre Levy and Union of Students of Ireland fee of €43.

The EU fee rates and the non-EU fee rates vary by course. For more information on student fees, go to [dcu.ie/fees](http://dcu.ie/fees)

## Are you an EU or a non-EU applicant?

For fees purposes, this is based on whether you are from the EU/EEA/Swiss State or from a non-EU country. Students who wish to be designated as an EU/EEA/Swiss State applicant must meet certain criteria. For more information, go to [dcu.ie/international/fees](http://dcu.ie/international/fees)

Eligibility will be determined on a case-by-case basis by the International Office after we have received a completed application for fee status assessment. Assessments take place after an applicant has received an offer from DCU.

## Free Fees Scheme

Students who are designated as from the EU/EEA/Swiss State will be liable to pay the EU fee level but will qualify for the Free Fees Scheme in the following circumstances:

- 1 It is the student's first undergraduate degree AND
- 2 The applicant is a national of an EU/EEA/Swiss member state (evidence must be provided) AND
- 3 The applicant has spent three of the last five years ordinarily resident in an EU/EEA/Swiss member state before the start of the first year of their course

Applicants who are eligible for the Free Fees Scheme must pay the Student Contribution fee plus the combined Student Centre Levy and Union of Students of Ireland fee. In 2021/2022, this amounts to €3,043.

## Notes

- Students already holding an undergraduate or postgraduate qualification will not qualify for the Free Fees Scheme
- Students will not qualify for the Free Fees Scheme if they are repeating a year, either because they failed their end-of-year examinations, or as a result of changing courses. (Note: This exclusion may be waived when a student has to repeat a year due to certified serious illness. In such a case, the University will request documentary evidence that the student's failure was as a direct result of his/her illness.)

- Students will not qualify for the Free Fees Scheme if they are undertaking a second undergraduate course. (Note: Students who hold a National Certificate or Diploma and are progressing to degree courses may still be eligible.)
- Students will not qualify for the Free Fees Scheme if they have already attended but did not complete a certificate, diploma or degree course. (Note: If a student did not complete a course and is returning to study after a break of five years, the student is classified as a Second Chance Student. Subject to fulfilling the other criteria above, Second Chance Students will be entitled to free tuition for the degree course.)
- If a student on the Free Fees Scheme at another institution has not secured a terminal qualification and subsequently resumes third-level studies, they will not be eligible for free fees for the equivalent period of time spent on the course taken at that other institution

## Further Considerations on Fees Matters

- Students classified as non-EU for fees purposes will not be permitted to change their fee status following admission except where EU/EEA nationality is granted. The following timelines apply to these exceptions:
- Students who acquire EU/EEA citizenship up to 30 September in an academic year may be entitled to change for the academic year
- Students who acquire EU/EEA citizenship up to 31 January in an academic year may be entitled to change from the second half of the academic year
- Students who acquire EU/EEA citizenship from 1 February may be entitled to change from the commencement of the next academic year
- If a Student is naturalised during the year of registration, they may be eligible for the Free Fees Scheme
- Students who have been classified as non-EU for the entire undergraduate registration will retain this status for postgraduate registration unless they have worked full-time for a period of at least three years in an EU/EEA/Swiss member State before the start of the postgraduate course

Students, however, who complete their full undergraduate degree at DCU may be eligible for a DCU student discount for postgraduate study at DCU. Students who progress from the International Foundation Certificate onto an undergraduate degree course will also retain their non-EU status.

For further information, please visit [dcu.ie/fees-info](http://dcu.ie/fees-info)

# Paying Your Way While You Study at DCU

You already know there are various costs associated with a third-level degree such as, books, college materials and academic fees. Even though your studies are an investment towards future higher earnings, it is advisable to be aware of the living costs whilst studying. We estimate average costs for 9-months (September 2021 - May 2022 excluding programme fees and living expenses during holidays) to be - Living away from home €12,222 / Living at home €5,679.

Further information on the cost of attending university 2021/2022 please visit our Student Support & Development website, 'Financial Survival' [dcu.ie/students/financial-survival-university-financial-assistance-service](https://dcu.ie/students/financial-survival-university-financial-assistance-service)

You will find detailed information on the cost of living away from home and at home, sample monthly budgets for both and blank budget templates. You will also find information on possible ways to bridge the gap and useful contacts.

Our website 'Finance at University' also provides information on grants and scholarships, remission of fees, ESF student assistance fund and 1916 Bursary - [dcu.ie/students](https://dcu.ie/students) Click on 'Finance' within the banner on top of page.

## Grants and Scholarships

- Irish students may qualify for funding through SUSI (Student Universal Support Ireland) [susi.ie](https://susi.ie)
- Students from an EU/EEA/Swiss member state (and who are not from Ireland) may apply for a fees-only grant under the Higher Education Grants Scheme through Dublin City Council [dublincity.ie](https://dublincity.ie)
- Students from Northern Ireland should apply to their local Education and Library Board [delni.gov.uk/studentfinance](https://delni.gov.uk/studentfinance)
- International students should apply to the relevant institutions in their home countries for possible scholarships and financial assistance
- Each grant/scholarship is held for one year, and then it will be reviewed

The holder of the grant or scholarship will undertake a normal academic course and must fulfil all the requirements of their course of study. First-year candidates may only apply if they have obtained a place at DCU through the CAO system.

## Studying abroad as part of your course

Opportunities to study abroad typically come in the third year. Whether your course requires you to spend a year abroad or you choose to participate in the Erasmus/Exchange programme, it is important to prepare early for the costs of preparation, travel, insurance and setting yourself up in another country.

### Within Europe

If you hold an Irish or EU passport, you will not need a visa to study in EU-member states, and you can expect the cost of living to be slightly lower than in Ireland. (If you lived at home during the first two years of your course at DCU, you will have the additional expense of accommodation while abroad). Studying abroad often brings added expenses such as language preparation courses, insurance and travel. Students who study within Europe may be eligible for an Erasmus grant from the European Commission to help with these costs but the Erasmus grant is not designed to cover day-to-day living expenses.

### Outside Europe

In addition to higher travel expenses, you will need to prepare for the time and expense of obtaining a student visa and suitable insurance. Students are often required to present evidence of financial self-sufficiency as part of the visa application and some countries may request bank statements showing a balance of €10,000 or more. Immigration rules change frequently, so you are advised to begin preparation by checking the consular website of your host country early in your second year at DCU.

<b>Education (continued)</b>			
DC010	Bachelor of Religious Education and English (BRelEd)	Four years	University's minimum general entry requirements, see NOTE ONE (see page 254)
DC011	Bachelor of Religious Education and History (BRelEd)	Four years	University's minimum general entry requirements, see NOTE ONE (see page 254)
DC012	Bachelor of Religious Education and Music (BRelEd)	Four years	H4 in Music or equivalent (this requirement may be waived by the Head of Department)
DC013	Bachelor of Education in Gaeilge and French or German or Spanish	Four years	H3 in Gaeilge and H3 in French or H3 in German or H3 in Spanish
DC235	BSc in Education and Training (Daytime - Full-time)	Three-Four years	University's minimum general entry requirements, see NOTE ONE (see page 254)
DC235	BSc in Education and Training (Flexible Learning Mode)	Three-Four years	University's minimum general entry requirements, see NOTE ONE (see page 254)

### Note One:

#### Minimum entry requirements for all degree courses

A minimum of six Leaving Certificate subjects at Grade O6/H7, which must include Mathematics and English or Gaeilge. In addition, applicants must present at least two subjects at Grade H5. The university does not award points for the subject of Mathematics at Leaving Certificate Ordinary Alternative or Foundation Level. This subject will be accepted for admission purposes into the University for the following courses:

- DC001 - Bachelor of Early Childhood Education
- DC009 - Bachelor of Arts: Joint Honours
- DC014 - BA in Jazz and Contemporary Music Performance
- DC131 - BA in Communication Studies
- DC132 - BA in Journalism
- DC133 - BSc in Multimedia
- DC155 - BA in Applied Language and Translation Studies
- DC231 - BA in International Relations

- DC232 - Bachelor of Civil Law and Society
- DC235 - BSc in Education and Training
- DC238 - BA in Social Sciences and Cultural Innovation
- DC291 - Bachelor of Arts – Joint Honours (Media)
- DC292 - Bachelor of Arts – Joint Honours (Law)
- DC293 - Bachelor of Arts – Joint Honours (International Languages)
- DC294 - BA in Climate and Environmental Sustainability
- DC295 - Bachelor of Arts – Joint Honours (Politics)

### Note Two:

#### BA in Applied Language and Translation Studies (DC155)

In addition to the general entry requirements for admission to the University (see NOTE ONE), the following entry requirements apply: Grade H4 at Higher level in a relevant foreign language (French, German or Spanish) at Leaving Certificate level (or equivalent). All students are required to spend Year 3 studying at a partner university in the country of one of their chosen languages. Students of Japanese or Chinese are required to spend Year 3 in Japan or China respectively.

### Note Three:

#### BA in Jazz and Contemporary Music Performance (DC014)

An aural/theory test is not required as entry will be by audition/performance. This is a restricted entry course, meaning prospective students will need to have selected DC014 as one of their CAO choices by February. Availing of the change of mind will not be an option.

Minimum First Round Points in 2021 (2020)	Approximate Number of First-Year Places in 2021	Possible Careers for Graduates	<sup>†</sup> Indicates places under review
384 (429)	45	Post-Primary Teacher, Principal, Educational Leadership, Educational Admin, Consultant, Broadcaster, Journalism, Chaplaincy, Parish Ministry, The Arts, Poetry

302 (309)	30	Teaching/Training in Adult, Further and Continuing Education or in Private or Public Sector Training, Classroom Assistant in Primary, Post-Primary or Special Needs Education, Develop Knowledge and Skills in the Fields of Social, Personal and Civic Education, ICTs in Education and Training and 'Soft Skills' for the Training Industry	
302 N/A	20 (*Places under review)	As DC235 above	

### Group One – Science Courses

Physics, Chemistry, Biology, Physics with Chemistry, Agricultural Science, Computer Science

### Group Two – Science Courses

Physics, Chemistry, Biology, Physics with Chemistry, Applied Mathematics

### Additional Special Course Requirements

#### \* Bachelor of Education Restricted Entry (DC003)

##### DC003 Gaeltacht pathway

Applicants wishing to commence the Primary BEd (English medium) through the Gaeltacht Entry Route DC003 from September 2022 must meet the following updated criteria in order to be eligible to apply for entry to the course, which is done through the CAO process.

a) Be resident in a Gaeltacht Language Planning area, and

b) Must obtain at least a H3 in Leaving Certificate Irish

Apart from the requirement to meet both of the two criteria listed above, applicants must also meet all the other requirements for entry to the Primary BEd as normal and any particular matriculation requirements for the HEI they are applying to.

Applicant details are forwarded to the Department of Arts, Heritage and the Gaeltacht to determine eligibility for this entry route.

#### \*Iarratasóirí Gaeltachta Amháin (DC003)

In Institiúidí Ardoideachais, is féidir suas go 10% de na h-áiteanna ar na cúrsaí múinteoireachta sa bhunoideachas, a choinneáil d'iarratasóirí Gaeltachta, i.e. ní mór d'iarratasóirí cónaí a bheith orthu sa Gaeltacht mar a aithnítear go hoifigiúil í agus an Ghaeilge a bheith in úsáid mar ghnáth-theanga teaghlaigh acu. Féadann tú iarratas a chur isteach ar DC002 agus DC003 araon, más mian leat.

#### \*\*Bachelor of Education Church of Ireland Centre pathway Restricted Entry: (DC004)

If you hold a minimum H6 or O4 in Irish, you may be offered a place, but only if there are too few applicants with H4 in Irish. At present, all 32 places on DC004 BEd are reserved for those who are aware of and willing to support the distinctive ethos of Protestant primary schools under Church of Ireland, Methodist, Presbyterian and Society of Friends patronage. Eligible candidates are required to complete a supplementary form and MAY be required to attend for an interview to be considered for a place on the course.

# Explanation of Unfamiliar Terms

Some of the terms in this Prospectus may not be familiar to you. We have therefore provided a glossary to help you to understand them.

<b>Bachelors Degree</b>	A primary degree, usually called an undergraduate degree. This normally requires 3/4 years of full-time study. All DCU undergraduate degrees are honours courses, Level 8 NFQ.
<b>Credits</b>	Each module carries a number of credits (on average five) and you are expected to complete enough modules in a year to amount to 60 credits. This would mean taking 12 modules in a year or six per semester.
<b>Core modules</b>	These are compulsory modules that you must complete.
<b>Discipline</b>	A subject area you will be studying, for example, business, marketing, computing, physics, law, biology or politics.
<b>Elective</b>	An optional module or subject that you may select.
<b>Faculty</b>	A group of departments in a college that specialise in a particular subject or group of subjects.
<b>Graduate</b>	A student who has received an academic degree or diploma.
<b>Hackathon</b>	Is a 24 hour event in which a large number of students meet to engage and establish a collaborative environment to build, create, produce and deliver a product/solution/idea in a short amount of time.
<b>Hybrid Learning</b>	Lectures that are primarily delivered online with students attending some face-to-face on-campus laboratory classes, practical sessions and small group interactions.
<b>Interdisciplinary</b>	Involving two or more disciplines taken together that would usually be considered separate from each other, such as marketing and engineering or business and languages.
<b>Intersarsity</b>	Competition between different universities or colleges.
<b>Module</b>	Each course is made up of modules which are different topics that are essential to your learning.
<b>NQT</b>	Newly Qualified Teacher.
<b>Postgraduate</b>	A student who continues studies after graduation.
<b>Semester</b>	A division of an academic year, 15 weeks in length. In DCU, the year is divided into 2 semesters, September-December and January-May with exams at the end of each semester.
<b>Specialism</b>	The concentration on a particular field of study, such as marketing or HR management, software engineering or information systems.
<b>Tutorials</b>	Small group discussions that compliment lectures.
<b>Optional modules</b>	You are often provided with a list of modules you can choose to take along with the required core modules to make up the required 60 credits in a year.

## Teaching Council Information

The Teaching Council was established on a statutory basis in March 2006 to promote teaching as a profession at primary and post-primary levels, to promote the professional development of teachers and to regulate standards in the profession.

## Specifically, its functions are:

- To promote teaching as a profession
- To promote the continuing professional development of teachers
- To establish and maintain a register of teachers
- To establish, publish, review and maintain Codes of Professional Conduct for Teachers, which include teaching knowledge, skill and competence
- To regulate the teaching profession
- To maintain and improve standards of teaching, knowledge, skill and competence

The following degrees are recognised as concurrent teacher education courses by the Teaching Council for registration as teachers with no further teacher training qualifications required:

Degree	Page Number in Prospectus	Subjects
<u>Primary teaching:</u>		
Bachelor of Education (BEd) (DC002 and DC003)	196	
Bachelor of Education (BEd) – CIC Restricted Entry (DC004)	196	
<u>Post-primary teaching:</u>		
Bachelor of Religious Education and English (DC010)	200	Religious Education, English
Bachelor of Religious Education and History (DC011)	200	Religious Education, History
Bachelor of Religious Education and Music (DC012)	200	Religious Education, Music
BSc in Science Education (DC203)	100	(Two of) Chemistry, Mathematics, Physics
BSc in Physical Education with Biology (DC205)	96	Physical Education, Biology
BSc in Physical Education with Mathematics (DC206)	98	Physical Education, Mathematics
Bachelor of Education in Gaeilge and French or German or Spanish (DC013)	204	Gaeilge (plus one of) French, German or Spanish

**Other degrees:**

Holders of other DCU degrees are eligible to seek registration as a post-primary teacher, provided that;

(a) they meet the subject requirements as laid down by the Teaching Council and

(b) they complete an acceptable postgraduate teacher training qualification (e.g., the Professional Masters in Education) or its equivalent.

**The following degrees (dependent on module choices) meet the requirements as set down by the Teaching Council for registration in respect of subjects below:**

<b>Degree</b>	<b>Page Number in Prospectus</b>	<b>Subjects</b>
Bachelor of Business Studies (DC111)	44	Business Studies
BA in Accounting and Finance (DC115)	52	Accounting, Business
BA in Economics, Politics and Law (DC230)	148	Economics, CSPE
BSc in Education and Training (DC235)	206	CSPE
BA in Applied Language and Translation Studies (DC155)	146	French, German, Japanese, Spanish
BSc in Computer Science (DC121)	184	Computer Studies
BSc in Analytical Science (DC161)	82	Biology, Chemistry
BSc in Chemical and Pharmaceutical Sciences (DC162)	84	Chemistry
BSc in Actuarial Mathematics (DC126)	68	Mathematics*
BSc in Psychology and Mathematics	62	Mathematics*
Common Entry into Actuarial and Financial Mathematics (DC127)	66	Mathematics*
Bachelor of Arts: Joint Honours (DC009, DC291-DC293 & DC295)	124	CSPE, English, French, Gaeilge, German, Geography, History, Music, Religious Education, Spanish
BSc in Biotechnology (DC181)**	74	Biology
BSc in Genetics and Cell Biology (DC168)**	76	Biology
BSc in Chemistry with Artificial Intelligence (via DC163)**	80	Chemistry
BSc in Applied Physics (via DC175)**	90	Physics
BSc in Physics with Biomedical Sciences (via DC175)**	90	Physics
BSc in Physics with Data Analytics (via DC175)**	91	Physics
BSc in Physics with Astronomy (via DC175)**	90	Physics
BSc in Environmental Science and Technology (DC166)**	86	Chemistry/Biology

\* Graduates of this course are well placed to undertake a postgraduate qualification in teaching, and have completed over 90% of the mathematics required for Teaching Council recognition. For further details contact the Teaching Council.

\*\* With an appropriate selection of modules graduates applying for registration on or after the 1 January 2023 will meet the Teaching Council subject curricular requirements.

# How to Get to DCU

There are three main academic campuses at DCU, DCU Glasnevin, DCU St Patrick's and DCU All Hallows. The campuses are all in north Dublin city approx. midway between Dublin city centre, Dublin Airport and both the M50 and M1 motorways. The walking distance between campuses is about 2.5 km (about 20-30 minutes).

Active commuting (walking/cycling) to DCU is strongly encouraged with secure cycle parking available on all campuses and weekly free bicycle service clinics for all students and staff during term time. There are cycle lanes on the approach routes to the campuses many of which are being extended and upgraded. There are active commuter shower facilities available on all DCU Academic Campuses.

All campuses are well serviced by public transport, with Dublin Bus, Go Ahead and Bus Éireann providing in excess of 20 routes to one or more of the campuses. There are daily private bus services from Dundalk and Drogheda (Matthews Coaches) and Monaghan

(Collins Coaches). PLEASE NOTE the public bus network in Dublin is being significantly upgraded over the coming year as part of the Bus Connects project. There will be many changes but it is expected that the new system will provide enhanced connectivity to DCU for all staff and students. It is expected that changes in 2021/2022 will include commencement of the N4 Orbital Route (Blanchardstown Shopping Centre – Finglas – DCU – Collins Ave – Clontarf – Docklands) in January 2022 with a service every 10 mins. This will result in the termination of the 31d, 42d and 70d term time only routes in December 2021. Further information on connectivity to DCU will be available on [dcu.ie/how-to-get-here](http://dcu.ie/how-to-get-here) or [transportforireland.ie](http://transportforireland.ie) or [busconnects.ie](http://busconnects.ie)

Please check regularly on the [Transport for Ireland website](http://transportforireland.ie) for updates particularly with the phased implementation of the Bus Connects scheme : [transportforireland.ie](http://transportforireland.ie) or our website for: [dcu.ie/how-to-get-here](http://dcu.ie/how-to-get-here)

## Dublin Bus Routes - See map for key to bus numbers

### No. 1 DCU The Helix (stop # 7571)

- 31d** DCU (The Helix) to Baldoyle via Collins Ave, Howth Rd, Dublin Rd, Strand Rd - Bus departs Baldoyle at 7.45am (arriving DCU at 8.35am) and will depart DCU at 5.15pm (term time only)
- 44** DCU (The Helix) to Enniskerry via city centre and Dundrum
- 42d** DCU (The Helix) to Portmarnock via Collins Ave, Ballymun Rd, M50, M1, Holywell, Swords Rd, Yellow Walls Rd, Malahide Village, Blackwood Lane, Wendell Ave, Strand Rd - Bus departs Portmarnock at 7.30am (arriving DCU at 8.40am) and will depart DCU at 5.10pm (term time only)
- 70d** DCU (The Helix) to Dunboyne via Ballymun Rd, Griffith Ave Extension, Finglas Rd, Ballyboggan Rd, Rathoth Rd, Nephin Rd, Navan Rd, Castleknock Rd, Blanchardstown Village, Clonee - Bus departs Dunboyne at 7.15am (arriving DCU at 8.30am) and will depart DCU at 5.05pm (term time only)
- 104** DCU (The Helix) to Clontarf via Beaumont Hospital, Donnycarney and Vernon Ave - DART link for Killester DART station
- 220** DCU to Mulhuddart via Blancherstown

### No. 2 Ballymun Road (Stop # 37 (towards city centre) #4680 (away from city centre))

- 4** Harristown to Monkstown Ave via city centre
- 9** Charlestown to Limekiln Ave, Walkinstown via centre centre
- 11** Wadelai Park to Sandyford Ind Est via city centre
- 13** Harristown to Grange Castle Business Park, Clondalkin via city centre
- 155** IKEA (Ballymun) Towards Bray Rail Station via city centre

### No. 3 Collins Avenue (stop #135021)

- 109A** Bus Eireann Busaras – Kells (term time only)

### No. 4 Whitehall (stop #1642)

- 1** Santry (Shanard Rd) towards Merrion Square
- 33** Balbriggan to city centre via Swords Rd (Collins Ave Ext)
- 41 (abc)** Swords to city centre via Swords Rd/Dublin Airport (41 only)

### No. 5 Whitehall

- 101** Busaras to Drogheda
- 909/900** Dublin to Dundalk (operated by Matthews Coaches)

### No. 6 Collins Ave Ext (stop # 215 (towards Dublin Airport) #237 toward city centre)

- 16** Dublin Airport towards Ballinteer (Kingston)

### No. 7 (Drumcondra Rd Upper (stops #21/#7602 (away from city centre)/ stops #45/#7603 (towards city centre)

Computing for Business (DC120)	182

## D

Data Science (DC123)	186
Digital Business and Innovation (DC241)	40
DCU Connected – Online Education	
BA (Hon) in English and History (DC340)	218
BA (Hons) in Humanities (DC341)	220
BA Single Module (DC342)	222
BSc (Hons) in Information Technology (DC343)	224
BSc (Hons) in the Management of IT/IS (DC344)	226
BSc (Hons) in Humanities (Psychology Major) (DC345)	228

## E

Early Childhood Education, Bachelor of (DC001)	194
Economics, Politics and Law (DC230)	148
Education, Bachelor of Primary Teaching (DC002/3)	196
Education, Bachelor of Primary Teaching Church of Ireland Centre pathway (DC004)	196
Education, Bachelor in Gaeilge and French or German or Spanish (DC013)	204
Education and Training (Full-time and Flexible Learning) (DC235)	206
Education and Training (Foundation) FPET (DC235)	208
Electronic and Computer Engineering (DC190)	172
English (BA: Joint Honours) (DC009, DC291) (DC010)	124
Environmental Science and Technology (DC166)	68

## G

Gaeilge (BA: Joint Honours) (DC009, DC293)	124
Genetics and Cell Biology (DC168)	76
Geography (BA: Joint Honours) (DC009, DC295)	124
Global Business Canada (DC119)	50
Global Business France (DC112)	50
Global Business Germany (DC113)	50
Global Business Spain (DC114)	50
Global Business USA (DC116)	50
Global Challenges (DC189)	50
Gnó agus Gaeilge / Business and Irish (Irish-medium) (DC118)	142

## H

Health and Society (DC209)	104
History (BA: Joint Honours) (DC009, DC292, DC295) (DC011)	124
Humanities (BA: Joint Honours) (DC009)	124
Human Development (BA: Joint Honours) (DC009)	124

## I

International Languages (BA: Joint Honours) (DC293, DC291, DC292)	124
International Relations (DC231)	150

## J

Jazz and Contemporary Music Performance (DC014)	140
Journalism (DC132)	136

## L

Law and Society (BCL) (DC232)	152
Law (BA: Joint Honours) (DC292, DC295)	124

## M

Marketing, Innovation and Technology (DC240)	54
Mechanical and Manufacturing Engineering (DC195)	178
Mechanical and Sustainability Engineering (DC194)	168
Mechatronic Engineering (DC193)	162
Media Studies (BA: Joint Honours) (DC291)	124
Multimedia (DC133)	138
Music (BA: Joint Honours) (DC009) (DC012) (DC014)	124

## N

Nursing Children's and General, Integrated (DC218)	106
Nursing General (DC215)	106
Nursing Mental Health (DC216)	106
Nursing Intellectual Disability (DC217)	106

## P

Philosophy (BA:Joint Honours) (DC009)	124
Physical Education with Biology (DC205)	96
Physical Education with Mathematics (DC206)	98
Physics General Entry (DC175)	88
Physics with Data Analytics (via DC175)	91
Politics (BA: Joint Honours) (DC295, DC293, DC291)	124

### Post Primary Teaching

Education, Bachelor in Gaeilge and French or German or Spanish (DC013)	204
Physical Education with Biology (DC205)	96
Physical Education with Mathematics (DC206)	98
Religious Education and English, Bachelor of (DC010)	200
Religious Education and History, Bachelor of (DC011)	200
Religious Education and Music, Bachelor of (DC012)	200
Science Education (DC203)	100

### Primary Teaching

Education, Bachelor of (DC002, DC003 and DC004)	196
Psychology (DC208)	102
Psychology with Disruptive Technologies (DC210)	64
Psychology and Mathematics (DC207)	62

## R

Religious Education and English, Bachelor of (DC010)	200
Religious Education and History, Bachelor of (DC011)	200
Religious Education and Music ,Bachelor of (DC012)	200

## S

Science Education (DC203)	100
Social Sciences and Cultural Innovation (DC238)	154
Sport Science and Health (DC202)	92

## W

World Religions and Theology (BA:Joint Honours) (DC009, DC295)	124
